Twinzee 850W Centrifugal Juicer

Twinzee 850W Centrifugal Juicer Instruction Manual

This manual provides essential information for the safe and efficient operation, maintenance, and care of your Twinzee 850W Centrifugal Juicer. Please read it thoroughly before first use and retain it for future reference.

1. PRODUCT OVERVIEW

The Twinzee 850W Centrifugal Juicer is designed for efficient extraction of juice from various fruits and vegetables. It features a powerful motor, a wide feeding chute, and two-speed settings to accommodate different produce types, ensuring a fresh and nutritious juice every time.

2. IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electric shock, or injury, always follow these basic safety precautions:

- Read all instructions before using the appliance.
- Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting.
- Do not immerse the motor base in water or other liquids.
- Keep hands and utensils out of the feeding chute during operation to prevent injury and damage to the juicer.
- Always ensure the juicer is properly assembled and the safety locking arm is securely in place before operating.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.

3. COMPONENTS

Familiarize yourself with the various parts of your Twinzee juicer:

- Food Pusher
- Feeding Chute Cover
- Stainless Steel Filter Basket
- Juicer Base with Motor Unit
- Pulp Container (2L capacity)
- Juice Jug (1L capacity)
- Cleaning Brush

Image 3.1: An exploded view of the Twinzee juicer components, including the 2-liter pulp container, the main centrifugal unit, the 1-liter juice jug, and the cleaning brush.

4. SETUP AND ASSEMBLY

1. **Unpack:** Carefully remove all components from the packaging. Remove any protective films or stickers.
2. **Clean:** Wash all detachable parts (feeding chute cover, filter basket, pulp container, juice jug, food pusher) in warm soapy water, rinse thoroughly, and dry. The motor base should only be wiped with a damp cloth.
3. **Assemble:**
 - a. Place the motor base on a stable, flat, and dry surface.
 - b. Insert the stainless steel filter basket firmly onto the motor base. Ensure it clicks into place.
 - c. Position the feeding chute cover over the filter basket and align it with the motor base.
 - d. Secure the safety locking arm by lifting it and hooking it over the cover until it locks into position. The juicer will not operate if the locking arm is not correctly secured.
 - e. Place the pulp container under the pulp spout and the juice jug under the juice spout.
 - f. Insert the food pusher into the feeding chute.

5. OPERATING INSTRUCTIONS

5.1 Fruit and Vegetable Preparation

- Wash all fruits and vegetables thoroughly.
- For most items, the 75mm wide feeding chute allows for whole fruits and vegetables, reducing pre-cutting. Remove large seeds (e.g., peaches, plums) and hard pits.
- Peel citrus fruits, pineapples, and other fruits with thick or inedible skins.
- Cut larger items into pieces that fit comfortably into the feeding chute without forcing.

Image 5.1: The Twinzee juicer features a 75mm wide feeding chute, allowing for whole fruits and vegetables to be processed with minimal pre-cutting.

5.2 Juicing Process

1. Ensure the juicer is correctly assembled and the juice jug and pulp container are in place.
2. Plug the power cord into a suitable electrical outlet.
3. Select the appropriate speed setting using the control knob:
 - a. **Speed 1 (Low):** Ideal for softer fruits and vegetables such as berries, grapes, tomatoes, and leafy greens.
 - b. **Speed 2 (High):** Suitable for harder fruits and vegetables like apples, carrots, celery, and ginger.

4. Turn the juicer ON. Allow the motor to reach full speed before adding produce.
5. Gradually feed the prepared fruits and vegetables into the feeding chute using the food pusher. Do not force the produce; let the juicer work at its own pace.
6. The fresh juice will flow into the juice jug, and the pulp will collect in the pulp container.
7. Once juicing is complete, turn the juicer OFF and unplug it from the power outlet.

Image 5.2: Illustration of the two-speed settings: 'Soft' for softer produce like berries and citrus, and 'Hard' for firmer items such as carrots and apples, ensuring optimal juice extraction for various ingredients.

Image 5.3: A visual sequence demonstrating the rapid juicing process, showing fruit being inserted, the juicer in operation, and fresh juice collected in just 6 seconds.

6. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the lifespan of your juicer.

- 1. Disassembly:** After unplugging the juicer, unhook the safety locking arm and remove the feeding chute cover. Carefully lift out the stainless steel filter basket. Empty the pulp container and juice jug.
- 2. Cleaning Parts:** All detachable parts (feeding chute cover, filter basket, pulp container, juice jug, food pusher) are dishwasher safe. For manual cleaning, wash them in warm soapy water. Use the included cleaning brush to thoroughly clean the mesh of the filter basket, as pulp can easily get trapped there.
- 3. Motor Base:** Wipe the motor base with a damp cloth. Never immerse the motor base in water or any other liquid.
- 4. Drying and Storage:** Ensure all parts are completely dry before reassembling or storing the juicer. Store in a clean, dry place.

7. TROUBLESHOOTING

If you encounter any issues with your juicer, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Juicer does not start	Not plugged in; Safety locking arm not secured; Overheating.	Check power connection; Ensure locking arm is fully engaged; Unplug and let cool for 30 minutes.
Low juice yield or excessive pulp	Filter basket clogged; Incorrect speed setting; Produce fed too quickly.	Clean filter thoroughly; Use appropriate speed for produce; Feed produce slowly and steadily.
Excessive vibration or noise	Filter basket not properly seated; Juicer on an uneven surface.	Disassemble and reassemble filter basket correctly; Place juicer on a stable, flat surface.
Juice leaks from sides	Cover not properly secured; Too much produce fed at once.	Ensure cover is correctly aligned and locking arm is engaged; Feed produce gradually.

If the problem persists after attempting these solutions, please contact customer support.

8. SPECIFICATIONS

Technical details of your Twinzee 850W Centrifugal Juicer:

Feature	Detail
Brand	Twinzee
Model	850W Centrifugal Juicer
Color	Silver and Grey
Product Dimensions	30 x 20 x 39.5 cm
Product Weight	4.4 kg
Power	850W
Voltage	230 Volts
Number of Speeds	2
Blade Material	Stainless Steel
Power Source	Corded Electric
Manufacturer	BMS International
