Troubleshooting

Problem	Possible Cause	Solution
Bookshelf is wobbly/unstable.	Not properly anchored to the wall; uneven floor; loose hardware.	Ensure the anti-tip kit is correctly installed. Place on a level surface or use shims. Tighten all screws.
Gaps between panels or shelves.	Hardware not fully tightened; panels misaligned during assembly.	Loosen relevant screws, realign panels, then retighten firmly. Ensure cam locks are fully engaged.
Missing or damaged parts.	Packaging error or transit damage.	Do not proceed with assembly. Contact VASAGLE customer support with your model number and a description of the issue.
Difficulty inserting back panel.	Grooves are obstructed or frame is not perfectly square.	Check grooves for debris. Gently adjust the frame to ensure it is square before sliding the back panel.
