INITIAL SETUP

Follow these steps to set up your new HP laptop for the first time:

1. **Unpack the Laptop:** Carefully remove the laptop and all accessories from the packaging. Ensure all components listed in the "What's in the Box" section are present.
2. **Connect the Power Adapter:** Plug the AC smart pin charger into the charging port on the side of your laptop and then into a power outlet. Allow the battery to charge sufficiently before first use.
3. **Power On:** Open the laptop lid and press the power button, usually located on the top right of the keyboard or on the side.
4. **Follow On-Screen Instructions:** The laptop will guide you through the initial Windows 11 setup process, including language selection, network connection, and user account creation.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and optimal performance of your HP laptop:

- **Cleaning:** Use a soft, lint-free cloth slightly dampened with water or a screen cleaner to wipe the display. For the keyboard and chassis, use a dry, soft cloth. Avoid harsh chemicals.
- **Battery Care:** To maximize battery life, avoid extreme temperatures. It's recommended to let the battery discharge partially before recharging, rather than keeping it constantly at 100%.
- **Software Updates:** Regularly update your operating system (Windows 11) and drivers to ensure security and performance improvements.
- **Ventilation:** Ensure the laptop's vents are not obstructed to prevent overheating. Use the laptop on a hard, flat surface.

TROUBLESHOOTING COMMON ISSUES

This section provides solutions for common problems you might encounter:

Power Issues

- **Laptop not turning on:** Ensure the power adapter is securely connected and the outlet is working. Try holding the power button for 15 seconds to perform a hard reset.
- **Battery not charging:** Verify the charger is correctly plugged into both the laptop and the wall. Check for any visible damage to the charger cable or port.

Display Problems

- **Blank screen:** Connect an external monitor to check if the display output is working. If it is, the laptop's screen might be faulty. Try adjusting screen brightness.
- **Flickering screen:** Update your graphics drivers. This can often resolve flickering issues.

Connectivity Issues

- **Wi-Fi not connecting:** Ensure Wi-Fi is enabled in Windows settings. Restart your router and the laptop. Check for updated wireless drivers.
- **USB devices not recognized:** Try plugging the device into a different USB port. Restart the laptop. Ensure device drivers are installed.
