4. Setup and Assembly Instructions

Assembly typically takes less than an hour for one adult. All necessary tools are included.

4.1. Step-by-Step Assembly

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a soft surface and compare them against the parts list to ensure everything is present.
2. **Assemble Headboard and Footboard:** Attach the headboard and footboard panels to their respective metal frames using the provided bolts and Allen wrench. Ensure they are securely fastened.
3. **Connect Side Rails:** Attach the left and right side rails to the assembled headboard and footboard using the designated bolts. Do not fully tighten all bolts until the frame is mostly assembled.
4. **Install Center Support:** Place the center support beam(s) into position and secure them to the frame. Attach the support legs to the center beam(s) and the frame.
5. **Install Metal Slats:** The bed features a snap-in slat design. Insert each metal slat into the designated slots on the side rails and center support. Ensure each slat clicks securely into place. The structure includes foam padding for noise reduction.

6. **Assemble Storage Drawers:** Each drawer consists of a metal basket and a wooden front panel. Attach the wooden panel to the metal basket. Install the smooth wheels onto the bottom of each drawer basket.
7. **Insert Drawers:** Slide the assembled drawers under the bed frame. The metal frame and wood out-cover of the drawers are designed to fit snugly, preventing dust accumulation.
8. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and screws.

The VECELO bed frame includes four extra-large storage drawers designed for convenient under-bed storage. Each drawer is equipped with smooth wheels for easy access.

- To open a drawer, gently pull the wooden front panel outwards.
- To close a drawer, push it inwards until the wooden front panel aligns with the bed frame, preventing dust entry.
- Organize items within the metal basket. The design helps keep contents tidy.

6. Maintenance

6.1. Cleaning

- Wipe the metal frame and wooden headboard/footboard with a soft, damp cloth.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- For the storage drawers, wipe the metal baskets and wooden fronts as needed.

6.2. Fastener Checks

- Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight.
- Re-tighten any loose fasteners to maintain the bed frame's stability and prevent squeaking.

7. Troubleshooting

Problem	Possible Cause	Solution
Bed frame squeaks	Loose fasteners; friction between metal parts.	Ensure all bolts and screws are securely tightened. The frame includes foam padding to reduce noise; verify it is correctly placed.
Mattress slides on the frame	Lack of friction between mattress and slats.	Consider placing a non-slip mat or rug gripper between the mattress and the slats to increase friction.
Drawers do not slide smoothly	Wheels are dirty or obstructed; drawer is overloaded.	Check wheels for debris and clean if necessary. Ensure drawers are not overloaded beyond their capacity.
Missing or damaged parts	Shipping error or manufacturing defect.	Contact VECELO customer support immediately for free replacement parts.
