

BoxWave ClearTouch Crystal ToughShield 9H

BoxWave ClearTouch Crystal ToughShield 9H Screen Protector

User Manual for Foxwell T2000WF Compatible Devices

Model: ClearTouch Crystal ToughShield 9H

1. INTRODUCTION

The BoxWave ClearTouch Crystal ToughShield 9H is a high-quality screen protector engineered to provide superior protection for your Foxwell T2000WF device's display. Crafted from a tough yet flexible film material, it offers a 9H hardness rating, ensuring robust defense against scratches, scrapes, and impacts without the risk of chipping or cracking associated with traditional tempered glass.

This screen protector maintains 99% visual transparency, preserving the vibrant colors and clarity of your device's screen. Its precision-cut design guarantees a perfect fit, allowing full access to all screen functionalities. Each package includes two screen protectors and essential installation accessories.

2. KEY FEATURES

- **9H Hardness Rating:** Provides exceptional scratch and impact resistance, comparable to tempered glass but without the fragility.
- **Crystal Clear Visibility:** Offers 99% transparency, ensuring your screen's original brightness and color vibrancy are fully preserved.
- **Flexible and Shatterproof:** Made from a durable film that resists shattering, providing reliable protection.
- **Precision Cut:** Custom-designed to perfectly fit the dimensions and contours of your Foxwell T2000WF screen, ensuring full functionality.
- **Two-Pack:** Includes two screen protectors and installation accessories for convenience and a spare.

Scratch-Resistant

Helps protect your screen from damaging scratches and scrapes.

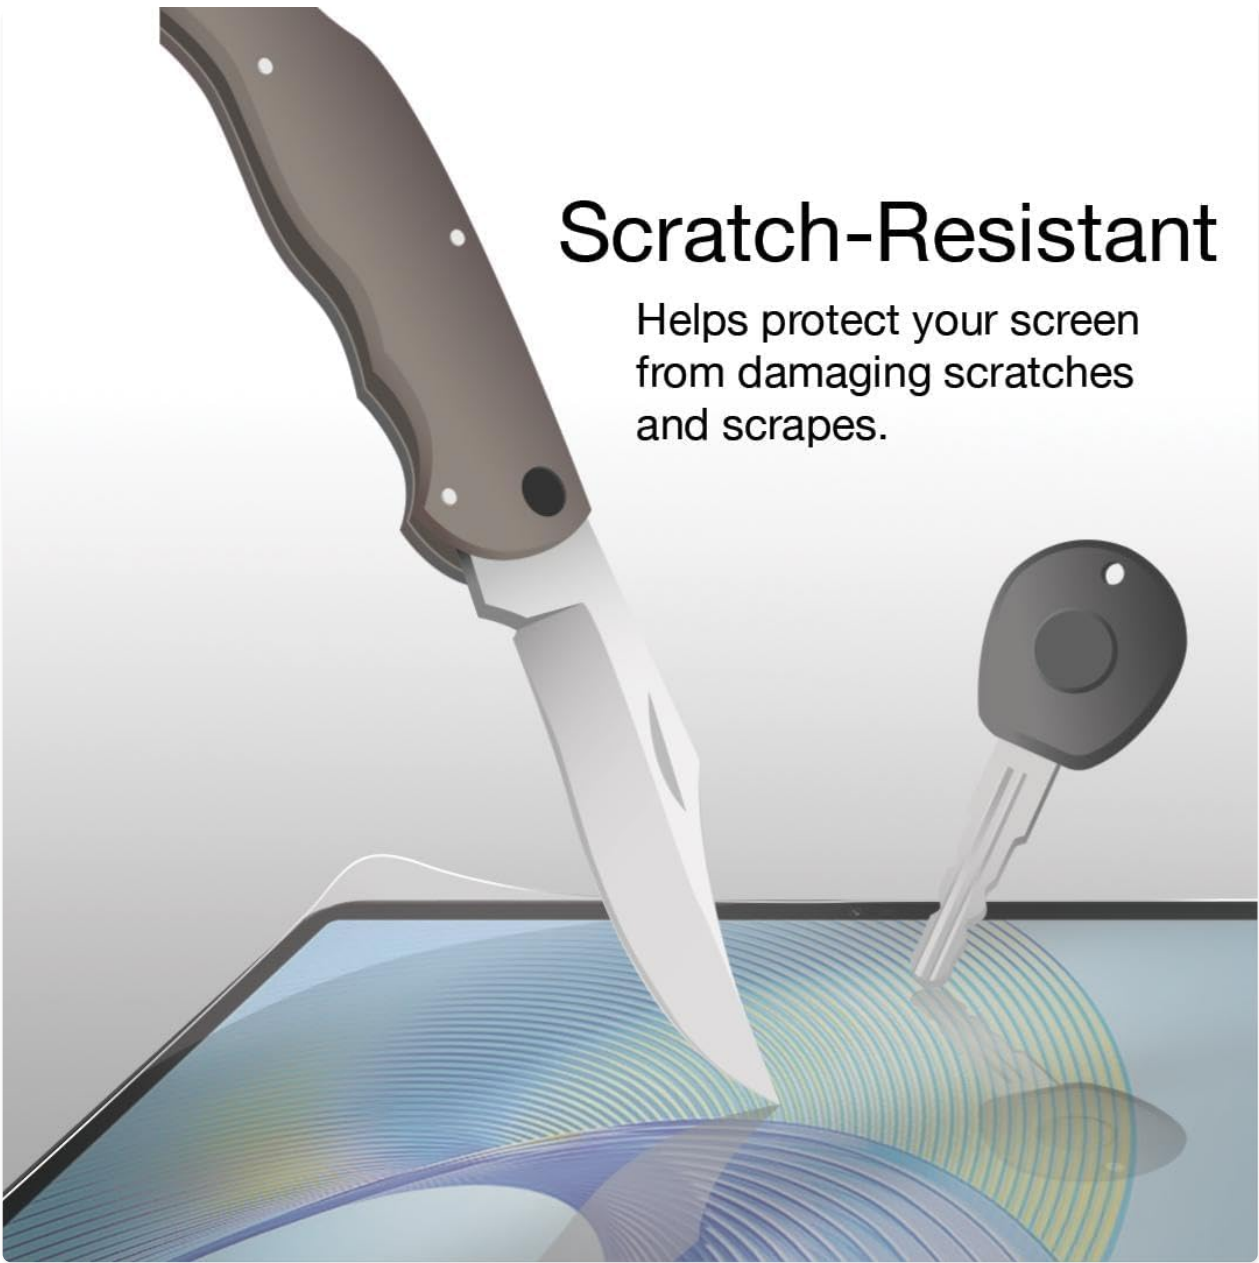

Image 2.1: Illustration of the screen protector's scratch-resistant properties against common objects like a knife and key.

Strong and Impact Resistant

Highly protective and durable.
Does not shatter or crack.

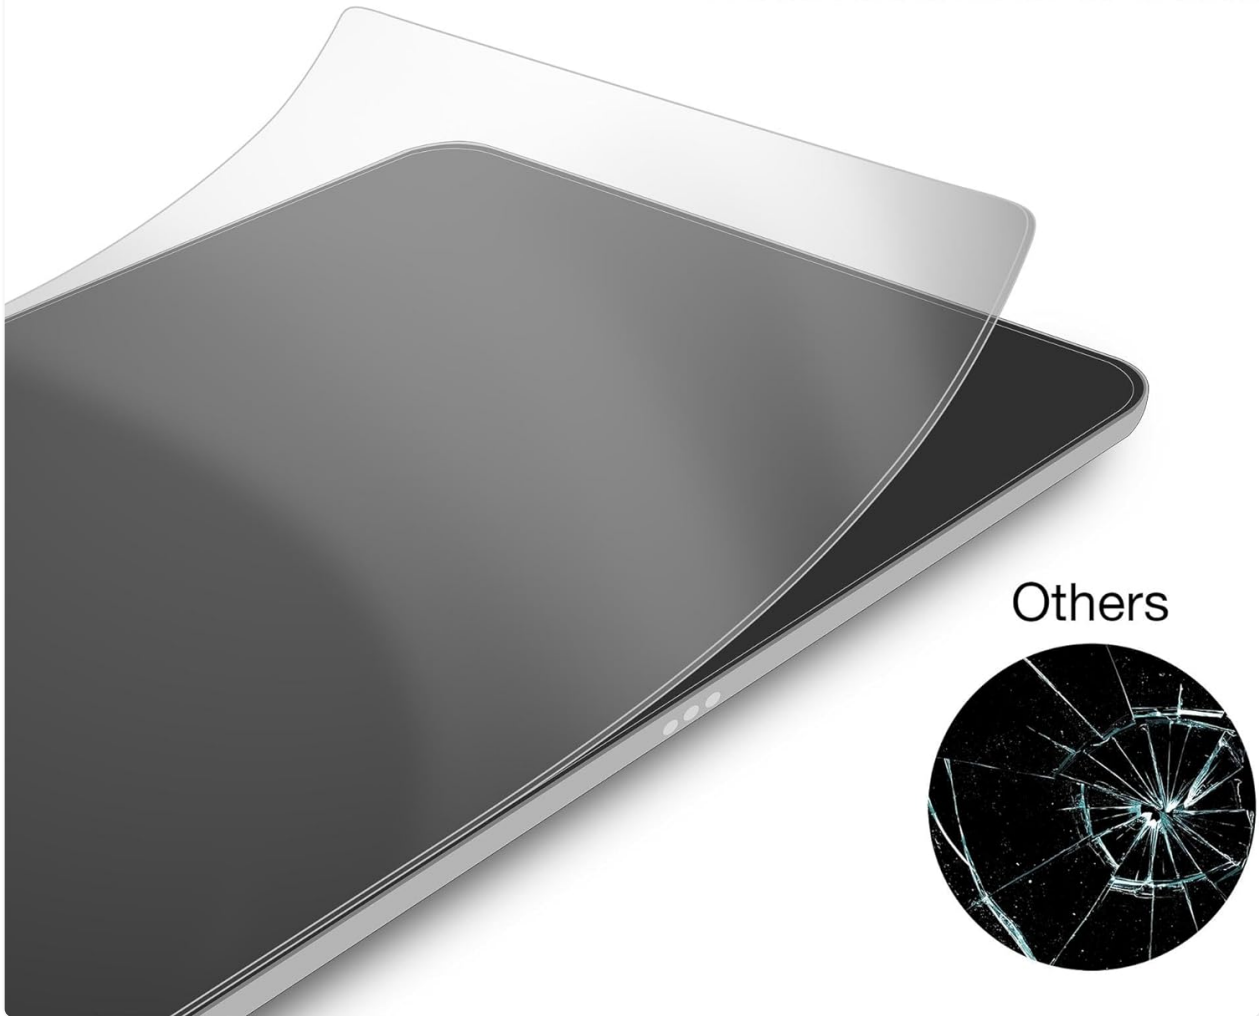

Image 2.2: Visual comparison showing the screen protector's strong and impact-resistant nature versus a shattered glass screen.

High Definition Clarity

Provides 99% visual transparency that preserves crystal clear optical clarity with vibrant colors

Image 2.3: The screen protector showcasing its high definition clarity, allowing 99% visual transparency.

3. INSTALLATION GUIDE

Proper installation is crucial for optimal performance and appearance of your screen protector. Please follow these steps carefully:

1. **Prepare Your Workspace:** Choose a clean, dust-free environment with good lighting. Wash your hands thoroughly to avoid transferring oils or dirt to the screen.
2. **Clean the Device Screen:** Use the included microfiber cleaning cloth to thoroughly wipe down your Foxwell T2000WF screen. Ensure all dust, smudges, and fingerprints are removed. For stubborn marks, a screen cleaning solution (not included) can be used sparingly.
3. **Remove Dust:** Use the dust removal sticker (if included) to dab the screen and lift any remaining dust particles. Inspect the screen carefully under light to ensure it is perfectly clean.
4. **Align the Protector:** Carefully peel back a small portion of the protective film (usually marked 'Step 1' or 'Back') from one end of the screen protector. Align the exposed edge of the protector with the corresponding edge of your device screen. Pay close attention to cutouts for cameras, sensors, or buttons.
5. **Apply and Smooth:** Once aligned, slowly lower the rest of the screen protector onto the device screen,

peeling off the remaining protective film as you go. Use the included applicator card or a soft, lint-free cloth to gently push out any air bubbles from the center towards the edges.

6. **Final Touches:** If small bubbles remain, try to push them out to the nearest edge. Some tiny bubbles may disappear on their own within 24-48 hours. Once satisfied, gently peel off the top protective film (usually marked 'Step 2' or 'Front').

4. USAGE AND CARE

Once installed, the ClearTouch Crystal ToughShield 9H screen protector requires minimal maintenance. It is designed to be highly responsive to touch and maintain optical clarity.

- **Cleaning:** To clean the screen protector, gently wipe it with a soft, lint-free cloth. For smudges or fingerprints, lightly dampen the cloth with water or a mild, non-abrasive screen cleaner. Avoid harsh chemicals or abrasive materials.
- **Avoid Sharp Objects:** While the protector is highly resistant to scratches, extreme force from very sharp objects can still cause damage.

- **Reusability:** The ClearTouch screen protector is equipped with installation forgiveness, allowing for minor adjustments or reinstallation if needed, provided the adhesive side remains clean.

5. TROUBLESHOOTING

Here are solutions to common issues you might encounter during or after installation:

- **Bubbles After Installation:** Small bubbles are common. Use the applicator card to push them towards the nearest edge. For persistent small bubbles, they often dissipate within 24-48 hours as the adhesive fully cures.
- **Dust Under the Protector:** If you notice dust particles, carefully lift the nearest corner of the protector using a piece of tape. Use another piece of tape to dab the dust off both the screen and the adhesive side of the protector. Reapply the protector slowly.
- **Misalignment:** If the protector is misaligned, gently lift it from one corner and carefully re-align it before slowly reapplying. Ensure the screen is clean before reapplication.
- **Edges Not Sticking:** Ensure the screen is completely clean and free of oils or residue, especially near the edges. Apply firm, consistent pressure to the edges with the applicator card.

6. SPECIFICATIONS

| Attribute | Value |
|----------------------------|-----------------------------------|
| Brand | BoxWave |
| Model | ClearTouch Crystal ToughShield 9H |
| Material | Polyethylene Terephthalate (PET) |
| Hardness Rating | 9H |
