Lost Vape Centaurus M100 Box Mod Kit User Manual

Brand: Lost Vape | **Model:** Centaurus M100 (lo00007)

1. INTRODUCTION

The Lost Vape Centaurus M100 Box Mod Kit is a high-performance vaping device designed for both power and convenience. It features a robust 100W maximum output, powered by a single 18650 battery (sold separately), and comes paired with the Centaurus Sub Coo Tank Atomizer. This kit offers advanced functionalities such as a built-in screen, 510 clearomizer connection, and Temperature Control (TC) capabilities, ensuring a customizable and satisfying direct-to-lung (DTL) vaping experience with excellent flavor recovery.

The Lost Vape Centaurus M100 Box Mod Kit in Dusty Rose, alongside other available color variants.

2. PACKAGE CONTENTS

Please verify that all the following items are included in your Lost Vape Centaurus M100 Box Mod Kit package:

- 1pc Centaurus M100 Box Mod
- 1pc Centaurus Sub Coe Atomizer (4ml)
- 1pc UB MAX X5 0.2ohm Coil
- 1pc UB MAX X4 0.3ohm Coil
- 1pc Spare Pyrex Glass (5ml)
- 8pcs O-rings
- 1pc USB-C Cable
- 1pc User Manual (this document)
- 1pc Warranty Card

3. PRODUCT FEATURES

The Centaurus M100 Kit is engineered with several key features to enhance your vaping experience:

- **High Power Output:** Capable of delivering up to 100W for robust vapor production.
- **Single 18650 Battery:** Designed for long-lasting performance and autonomy (battery sold separately).
- **3-in-1 Jog Dial Interface:** A versatile control system for easy navigation and adjustments, including a 360° rotational wheel for quick wattage changes, an activation button, and an LED battery indicator.
- **Built-in Screen:** Provides clear display of vaping parameters and settings.
- **Temperature Control (TC):** Offers advanced control over your vaping experience.
- **Centaurus Sub Coo Tank (4ml):** Features a convenient top-fill system and an 810-sized drip tip for ease of use.
- **Adjustable Airflow:** Stepless airflow adjustment allows for precise customization of your draw.
- **UB MAX Coil Compatibility:** Supports UB MAX X1, X2, and X3 coils for diverse vaping options and excellent flavor.
- **Leak-proof Design:** Engineered to minimize e-liquid leakage.
- **USB-C Charging:** For quick and convenient recharging.
- **Customizable Snap-On Panels:** Magnetic panels allow for personalization (additional panels sold separately).

Unlimited Snap-On Panels

Customize with our magnetic snap-on panels, designed for multifaceted personalization. Choose from a diverse range of designs and textures to reflect your unique style, easily attaching them for a secure, tool-free update.

Key features including the 18650 battery compartment, 100W maximum output, and the innovative 3-in-1 jog dial.

✦ STANDARD KIT

- 1x Centaurus M100 Box Mod
- 1x Centaurus Sub Coo Tank (4ml)
- 1x 0.2Ω UB Max X2 Coil
- 1x 0.3Ω UB Max X3 Coil
- 1x Spare Glass Tube (5ml)
- 8x O-rings
- 1x Type-C Cable
- 2x User Manuals
- 1x Warranty Card

Information on UB MAX coil compatibility, Direct-to-Lung (DTL) vaping support, and the tank's leak-proof design.

4. SETUP GUIDE

4.1. Battery Installation

1. Ensure the device is powered off.
2. Locate the battery compartment on the mod.
3. Insert one 18650 battery (sold separately) according to the polarity indicators (+/-) inside the compartment.

4. Securely close the battery compartment cover.

4.2. Coil Installation

1. Unscrew the base of the Centaurus Sub Coo Tank.
2. Align the new UB MAX coil with the slot in the tank base and push it firmly into place. Ensure it is seated correctly.
3. Screw the tank base back onto the tank securely.

4.3. E-liquid Filling

1. Locate the top cap of the Centaurus Sub Coo Tank.
2. Push or slide the top cap to reveal the filling port.
3. Insert the nozzle of your e-liquid bottle into the filling port and gently squeeze to fill the tank (do not overfill).
4. Close the top cap securely.
5. **Important:** After filling for the first time or after changing a coil, let the tank stand for 5-10 minutes to allow the e-liquid to fully saturate the coil. This prevents dry hits and extends coil life.

5. OPERATING INSTRUCTIONS

5.1. Power On/Off

- To power on the device, rapidly press the activation button (part of the jog dial) **five times** within 2 seconds.
- Repeat the same action (five clicks) to power off the device.

5.2. Wattage Adjustment

- Once powered on, rotate the 360° rotational wheel of the jog dial clockwise to increase wattage and counter-clockwise to decrease wattage.
- The current wattage will be displayed on the screen. Adjust to your preferred setting within the coil's recommended wattage range.

5.3. Screen Lock/Unlock

- To lock the screen and prevent accidental adjustments, rapidly press the activation button **three times**.
- Repeat the same action (three clicks) to unlock the screen.

5.4. Vaping

- With the device powered on and the tank filled, press and hold the activation button while inhaling from the drip tip.
- Release the button when you finish inhaling.

5.5. Temperature Control (TC) Mode

The Centaurus M100 supports Temperature Control. Refer to the on-screen menu or the full user manual (if provided separately) for detailed instructions on how to activate and adjust TC settings for compatible coils.

6. MAINTENANCE

6.1. Coil Replacement

Coils are consumable parts and need to be replaced regularly, typically every 1-2 weeks depending on usage and e-liquid. Follow the steps in Section 4.2 for coil installation.

6.2. Tank Cleaning

To clean your Centaurus Sub Coo Tank:

1. Disassemble the tank by unscrewing all parts (drip tip, top cap, glass tube, coil, base).
2. Rinse all parts (except the coil) with warm water. You may use a mild dish soap if necessary, ensuring thorough rinsing afterward.
3. Allow all parts to air dry completely before reassembling.

6.3. Charging

To charge the device:

- Connect the included USB-C cable to the charging port on the mod.
- Connect the other end of the cable to a suitable USB power source (e.g., wall adapter, computer USB port).
- The screen will indicate charging status. Disconnect the cable once fully charged.

7. TROUBLESHOOTING

If you encounter issues with your Centaurus M100 Kit, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device not turning on	Battery low or dead; Battery incorrectly installed; Device off.	Charge battery; Reinstall battery correctly; Press activation button 5 times rapidly to turn on.
No vapor or weak vapor	No e-liquid; Coil not saturated; Coil burnt out; Low wattage; Poor connection.	Refill tank; Wait 5-10 mins after filling; Replace coil; Increase wattage; Ensure tank is screwed on tightly.
Leaking from tank	Overfilled; Damaged O-rings; Coil not installed correctly; Loose tank parts.	Do not overfill; Check/replace O-rings; Reinstall coil; Tighten all tank components.
Burnt taste	Coil dry or burnt; Wattage too high.	Ensure coil is saturated; Replace coil; Reduce wattage.

8. SPECIFICATIONS

Unit:	1 Set
Tank Capacity:	4ml
Filling Method:	Top-fill
Screen:	Yes
Atomizer Connection:	510

Inhalation Type:	DTL (Direct-to-Lung)
