3. INSTALLATION

The Kucacci Smart Door Handle Lock is designed for easy installation, typically taking about 10 minutes with a simple screwdriver. No additional drilling is required for standard door setups.

3.1. Pre-Installation Check

Before beginning installation, ensure your door dimensions are compatible with the lock. Refer to the diagram below for required measurements.

Wide Compatibility

○ Before

● After

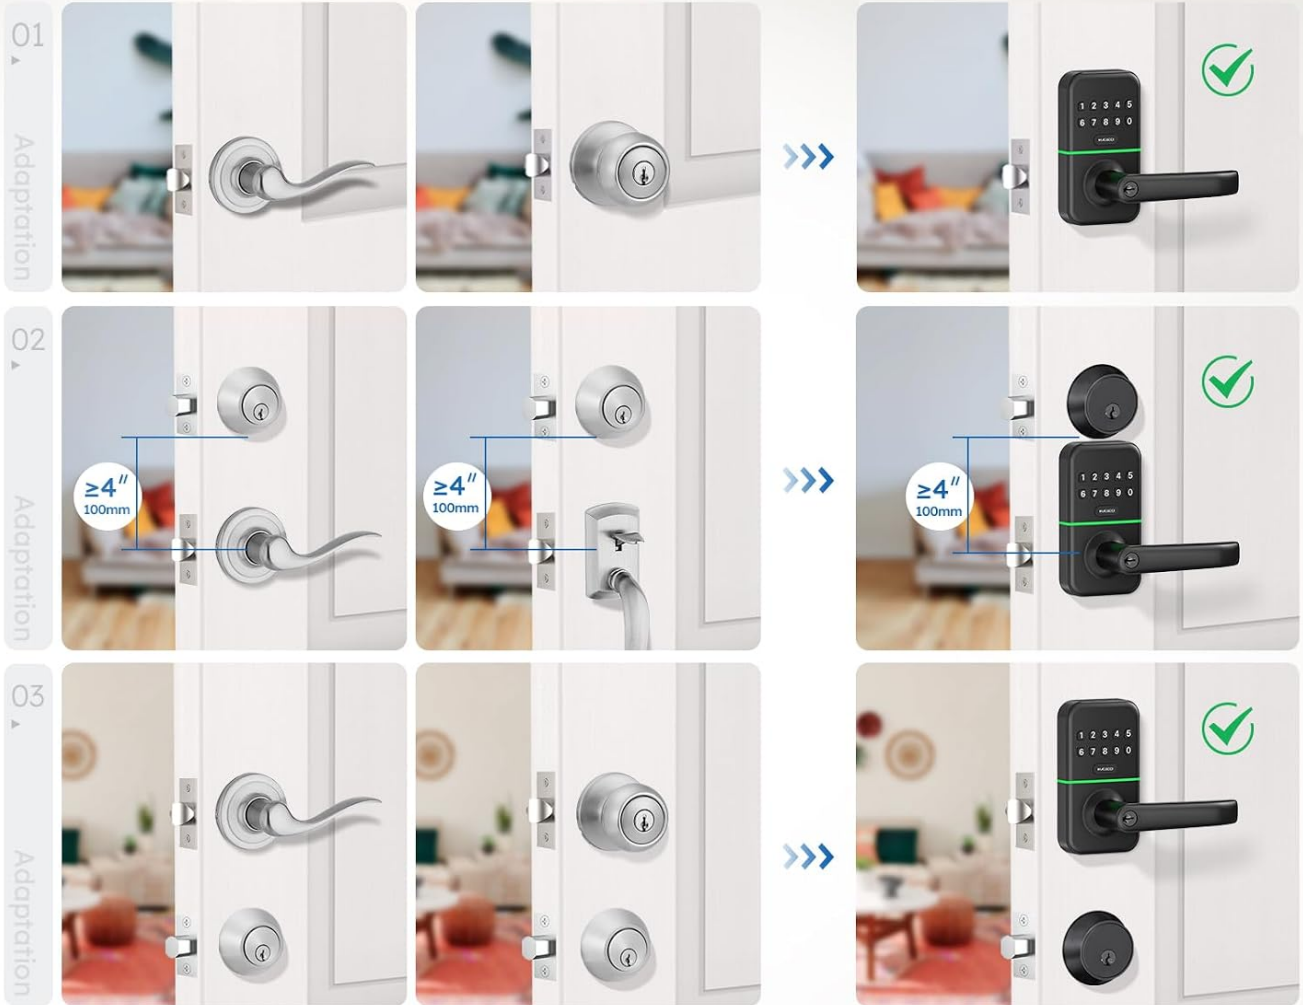

Figure 3.1: Verify door dimensions including door hole (2-1/8" / 54mm), door thickness (1-3/8"-2" / 35mm-50mm), backset (2-3/8" or 2-3/4" / 60mm or 70mm), and latch length (1" / 25.4mm).

3.2. Installation Steps

Follow the step-by-step instructions provided in the included User Manual. A visual guide is also available:

Long Battery Life & Durability

Figure 3.2: Installation is straightforward, requiring only a screwdriver to replace existing door hardware.

Your browser does not support the video tag.

Video 3.1: Official Kucacci Z3 Installation Video. This video demonstrates the complete installation process for the smart lock.

3.3. Reversible Handle Adjustment

The handle is reversible to accommodate both left and right-hand opening doors. Adjust the handle direction as needed during installation.

4. OPERATION

4.1. Keyless Entry with Keypad

To unlock the door using a code, enter your programmed 4-8 digit PIN on the backlit keypad. The lock will confirm successful entry.

4.2. Auto-Lock Feature

The lock can be configured to automatically lock after a set period (5-99 seconds) once unlocked. This feature can also be

disabled if continuous unlocked access is desired.

4.3. One-Touch Locking

To quickly lock the door from the outside, simply press and hold any button on the keypad for 2 seconds.

Figure 4.1: The lock features convenient auto-lock and one-touch locking capabilities for enhanced security and ease of use.

4.4. One-Time PIN Code Usage

Generate temporary one-time codes for guests or service providers. These codes expire after a single use, providing secure, limited access.

Check Door Size Before Purchase

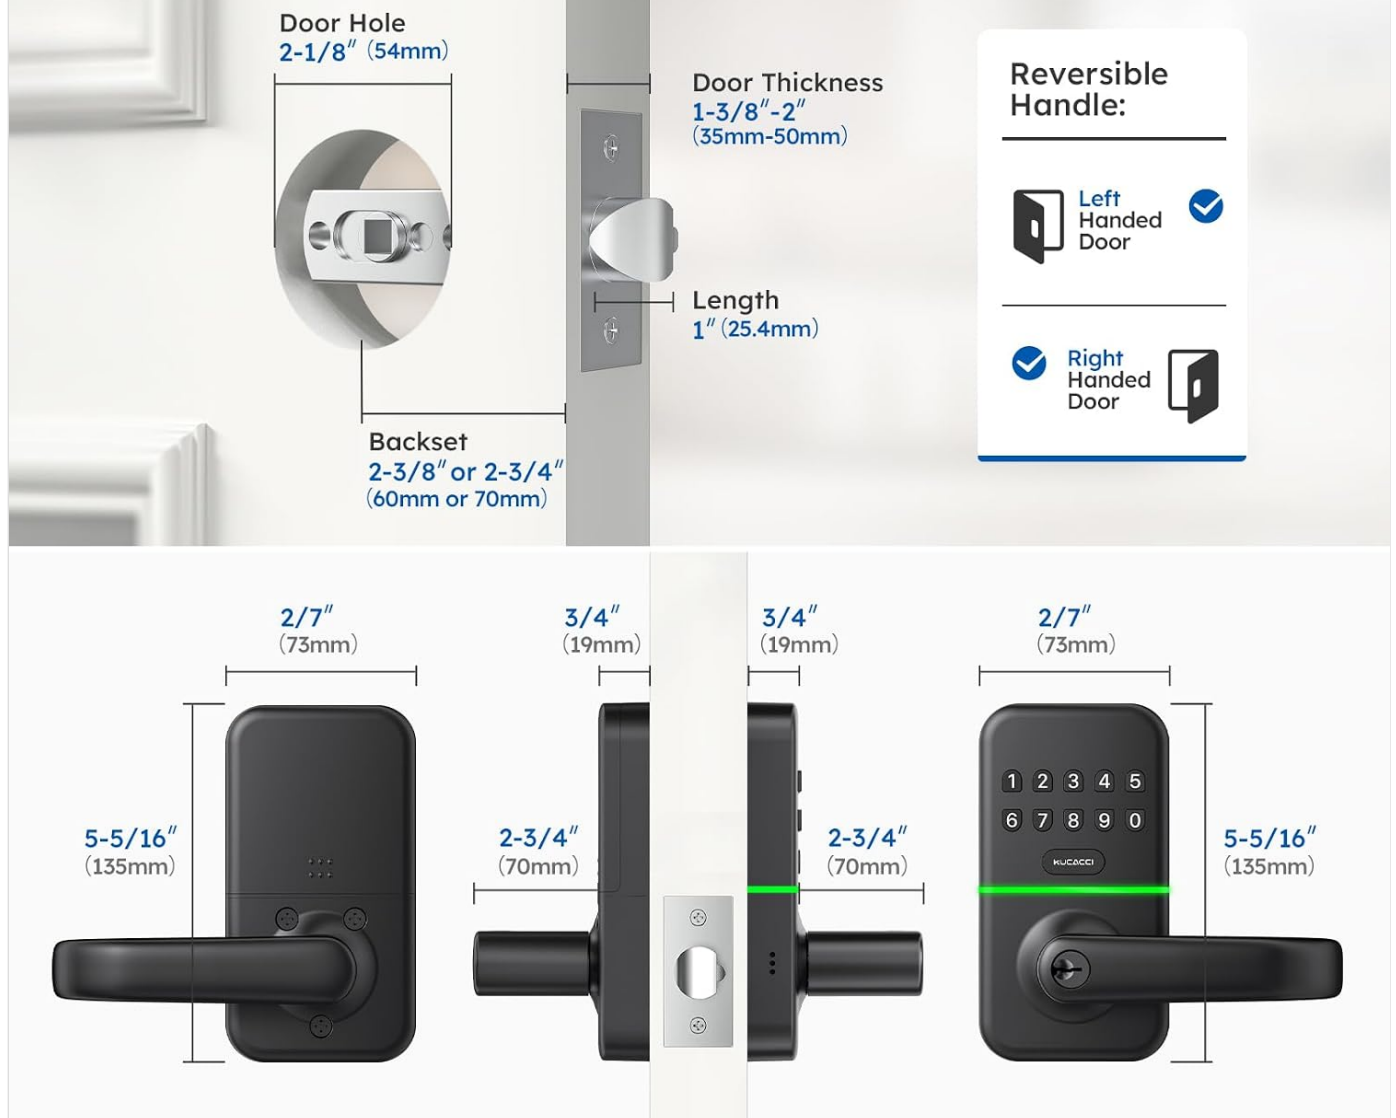

Figure 4.2: One-time PIN codes can be provided for temporary access, ideal for deliveries or short-term visitors.

5. PROGRAMMING

This section covers how to program user codes and adjust lock settings.

5.1. Setting User Codes

Refer to the detailed instructions in your included User Manual for steps on adding, modifying, or deleting user codes. Ensure you follow the sequence precisely for successful programming.

5.2. Adjusting Auto-Lock Time

The auto-lock duration can be customized between 5 and 99 seconds. Consult your User Manual for specific programming steps to change this setting.

5.3. Silent Mode and Vacation Mode

The lock offers silent mode for quiet operation and vacation mode for enhanced security when you are away. Instructions for activating these modes are in the User Manual.

6. MAINTENANCE

6.1. Battery Replacement

The lock requires 4 AA batteries (not included). When the low battery indicator activates, replace all four batteries promptly to ensure continuous operation. The lock is designed for approximately 1 year of battery life under normal use (300+ days).

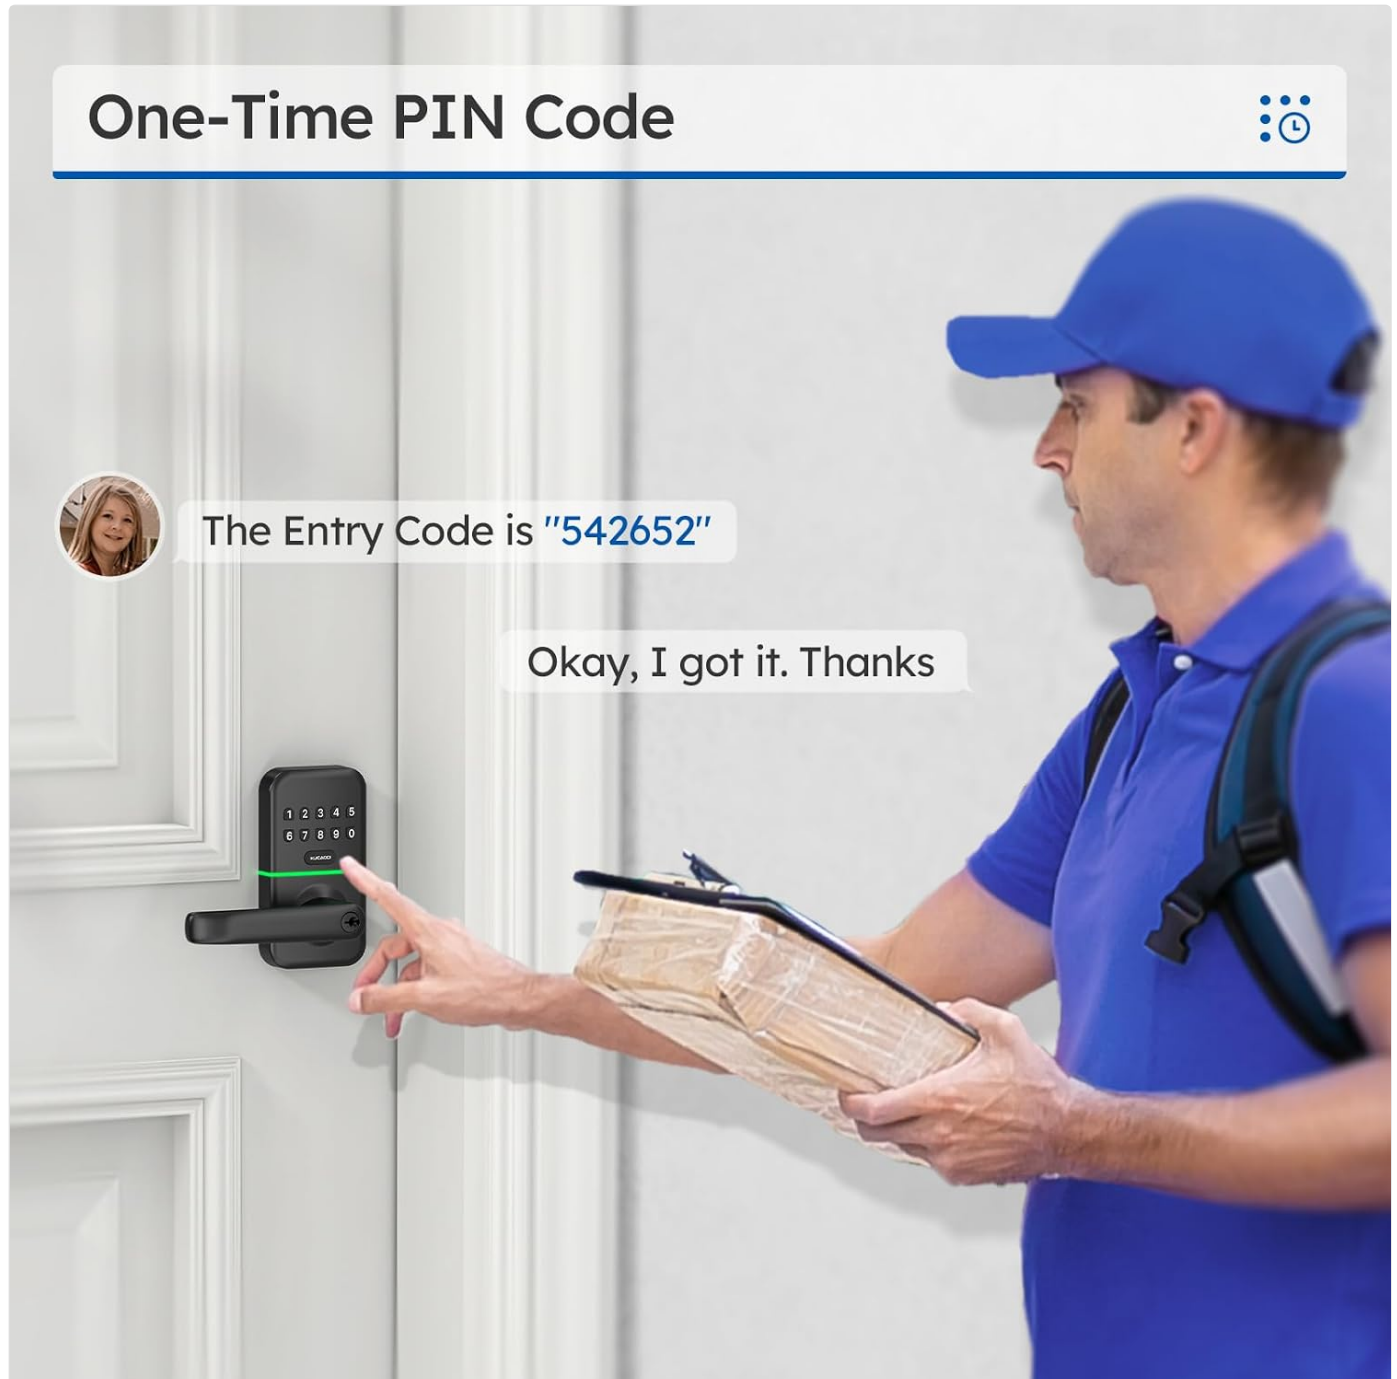

Figure 6.1: The lock features a backlit keypad and a low battery alarm. It operates on 4 AA batteries (not included) with an estimated 1-year battery life.

6.2. Cleaning

Clean the lock's exterior with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or electronic components.

6.3. Weather Resistance

The lock has an IP66 weather resistance rating, protecting it from dust and strong jets of water. While designed for outdoor use, avoid direct and prolonged exposure to extreme weather conditions where possible to maximize lifespan.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Lock does not respond to keypad entry.	Low batteries; incorrect code entered; battery contact issue.	Replace batteries (4 AA). Ensure batteries are inserted correctly and make good contact. Re-enter code carefully.
Lock does not auto-lock.	Auto-lock feature disabled or set to a long delay.	Check auto-lock settings in programming mode and adjust the delay time.
Mechanical key does not work.	Incorrect key; debris in keyhole.	Ensure you are using the correct mechanical key. Check for any obstructions in the keyhole.
Keypad not lighting up.	Batteries are completely drained.	Replace batteries immediately.

If you encounter issues not listed here or if the suggested solutions do not resolve the problem, please contact Kucacci customer support.
