Follow these steps carefully for a quick and easy assembly. It is recommended to have two people for assembly.

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface. Refer to the "Package Contents" section to ensure all parts are present.
2. **Attach Headboard to Side Rails:** Connect the upholstered headboard to the two side rails using the provided bolts and washers. Hand-tighten initially.
3. **Attach Footboard to Side Rails:** Connect the footboard to the other end of the side rails using the provided bolts and washers. Hand-tighten initially.
4. **Install Center Support Beam:** Secure the center support beam to the headboard and footboard brackets. Attach the center support legs to this beam.

5. **Attach Outer Support Legs:** Screw the remaining support legs into the designated points on the side rails and footboard.
6. **Tighten All Connections:** Once the frame is fully assembled, go back and securely tighten all bolts using the Allen wrench. Ensure the frame is stable.

### **Mattress Placement**

Once the bed frame is fully assembled, carefully place your King size mattress directly onto the wooden slats. No box spring is required for this platform bed design.

### **Weight Capacity**

The bed frame is designed to support a maximum weight of 500 pounds, including the mattress and occupants. Do not exceed this limit to ensure the longevity and safety of the product.

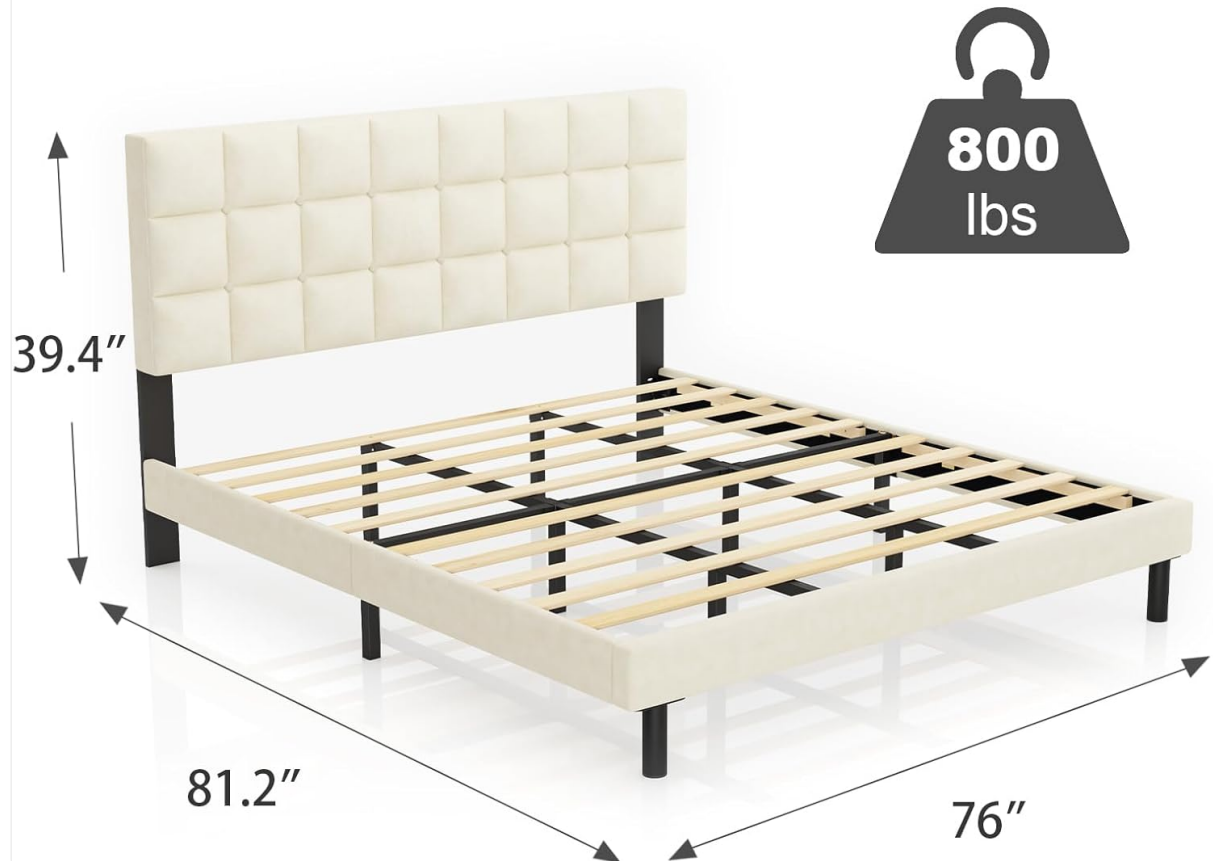

### **Under-Bed Storage**

The bed frame provides approximately 7.5 inches of clearance underneath, offering convenient space for storage bins or other items. Ensure items stored do not obstruct airflow or put undue pressure on the frame.

## MAINTENANCE

---

### Cleaning

- **Upholstered Headboard:** For general cleaning, gently vacuum the fabric to remove dust. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first.
- **Metal Frame:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Wooden Slats:** Wipe with a dry or slightly damp cloth to remove dust. Ensure slats are completely dry before placing the mattress back.

### Periodic Checks

Every 3-6 months, inspect all bolts and connections to ensure they are still tight. Re-tighten if necessary to maintain the bed frame's stability and prevent noise.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is squeaking or making noise.	Loose bolts or connections. Slats not properly seated.	Ensure all bolts are securely tightened. Verify that the Velcro on the wooden slats is properly aligned and attached to the frame.
Bed frame feels unstable or wobbly.	Loose connections or uneven floor.	Check and tighten all bolts. Ensure the bed frame is on a level surface. If the floor is uneven, consider using furniture pads under the legs to stabilize.
Headboard appears flat or less plush than expected.	This is a design characteristic.	The headboard is designed with a specific level of padding. No action is required as this is not a defect.
Missing parts or damaged components upon arrival.	Shipping error or manufacturing defect.	Do not proceed with assembly. Contact customer support immediately for assistance and replacement parts.
