2. **Placement:** This refrigerator is designed for under-counter installation. Ensure the chosen location has sufficient space for ventilation (refer to safety information).
3. **Leveling:** Use the adjustable feet to level the appliance. A level refrigerator operates more efficiently and quietly.
4. **Door Reversal (Optional):** If you need to change the door swing direction, refer to the detailed instructions provided in the separate installation guide (if applicable) or consult a qualified technician.
5. **Power Connection:** Before plugging in, ensure the voltage (220V) matches your household power supply. Connect the appliance to a dedicated, grounded power outlet.
6. **Initial Operation:** After plugging in, allow the refrigerator to stand for at least 2-4 hours before loading food. This allows the refrigerant to settle.

4. OPERATING INSTRUCTIONS

Your ELBA-16 refrigerator is designed for user-friendly operation.

- **Temperature Control:** The refrigerator features digital temperature control. Use the control panel (usually located inside or on the top front) to set your desired temperature. Refer to the specific markings for colder or warmer settings.
- **Door Open Alarm:** An audible alarm will sound if the refrigerator door is left open for an extended period, helping to conserve energy and maintain food freshness. Close the door fully to silence the alarm.

- **Freezer Compartment:** The integrated 16-liter freezer compartment is suitable for short-term storage of frozen items.

5. MAINTENANCE AND CLEANING

Regular maintenance ensures optimal performance and extends the lifespan of your refrigerator.

1. **Cleaning the Interior:** Disconnect power before cleaning. Clean the interior regularly with a mild detergent and warm water. Rinse thoroughly and dry with a soft cloth. Do not use abrasive cleaners or solvents.
2. **Cleaning the Exterior:** Wipe the exterior surfaces with a soft, damp cloth. For stubborn stains, use a mild detergent.
3. **Automatic Defrost:** This appliance features an automatic defrost system for the refrigerator compartment, eliminating the need for manual defrosting. Water from defrosting is evaporated automatically.
