## 4. OPERATING INSTRUCTIONS

### 4.1 Basic Scanning

1. **Launch Software:** Double-click the NetumScan Pro Software icon on your desktop or find it in your Start Menu (Windows) / Applications (Mac OS).
2. **Place Document:** Position the document or book on the positioning pad, ensuring it is flat and properly aligned with the marks.
3. **Adjust Lighting:** Use the stepless dimming knob on the camera base to adjust the built-in LED light for optimal illumination.

4. **Scan:** Select the desired function (e.g., "Scan," "Document") from the main menu in the software. Click the "Scan" button to capture the image. The software features one-key automatic correction for skewed images.

## 5. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and the device body. Avoid using liquid cleaners or abrasive materials.
- **Storage:** When not in use, fold the document camera for compact storage. Store it in a cool, dry place away from direct sunlight and extreme temperatures.
- **Software Updates:** Periodically check the NetumScan website ([www.netumscan.com](http://www.netumscan.com)) for software updates to ensure optimal performance and access to new features.

## 6. TROUBLESHOOTING

- **Device Not Recognized:**
  - Ensure the USB cable is securely connected to both the camera and the computer.

- Try connecting to a different USB port.
- Restart your computer and try again.
- Verify that the NetumScan Pro Software is correctly installed.

- **Poor Image Quality:**

- Ensure the document is flat and properly aligned on the positioning pad.
- Adjust the LED lighting using the stepless knob to eliminate shadows or glare.
- Clean the camera lens with a soft, dry cloth.
- Check software settings for resolution and image enhancements.

- **OCR Errors:**

- Ensure the scanned document is clear and well-lit.
- Verify that the correct language is selected in the OCR software settings.
- For best results, use high-quality original documents.

- **Software Running Slowly:**

- Close other unnecessary applications running on your computer.
- Ensure your computer meets the minimum system requirements for the software.
- Restart the software or your computer.
