# EasyKeys Tubular Replacement Key for CompX Fort 57392 Instruction Manual

Model: 57392 | Brand: EasyKeys

## INTRODUCTION

This manual provides essential information for the proper use and care of your EasyKeys Tubular Replacement Key, specifically designed for CompX Fort locks with code 57392. Please read these instructions carefully to ensure correct application and longevity of your key.

## PRODUCT OVERVIEW

The EasyKeys Tubular Replacement Key (code 57392) is a precision-cut key designed to replace lost or damaged keys for CompX Fort Key Series 40001 - 60000. It is compatible with various CompX Fort cam locks and is cut on a D137-CLC key blank. This key features a durable brass construction and is designed for a precise fit.

- **Compatibility:** CompX Fort Key Series 40001 - 60000.
- **Key Code:** 57392.
- **Material:** Durable Brass.
- **Special Features:** Custom Cut Key, Adjustable Fit.

## IDENTIFYING YOUR LOCK CODE (SETUP)

Before using your replacement key, it is crucial to verify that your lock's code matches the key's code (57392). Lock codes are typically found in several locations, such as on the original key, on the lock face, or on a label inside/behind the lock or on the cabinet/door. Always consult your lock's documentation or the manufacturer's guidelines for precise code identification.

### Important Notes:

- Lock codes are manufacturer-specific. Always order by the manufacturer and the exact lock code.
- Key cuts differ between brands, even if codes appear similar. Ensure your key is from EasyKeys for

CompX Fort 57392.

## PRODUCT VISUALS

### OPERATING INSTRUCTIONS

1. **Insert the Key:** Gently insert the tubular key into the lock cylinder. Do not force the key.

2. **Turn the Key:** Once fully inserted, turn the key clockwise or counter-clockwise (depending on the lock mechanism) to engage or disengage the lock.
3. **Remove the Key:** After locking or unlocking, return the key to its original insertion position and gently pull it out.

If the key does not insert smoothly or turn easily, do not force it. Refer to the Troubleshooting section.

## MAINTENANCE

Your tubular replacement key requires minimal maintenance to ensure long-lasting performance:

- **Keep Clean:** Periodically wipe the key with a soft, dry cloth to remove dirt or debris.
- **Avoid Damage:** Do not use the key for purposes other than operating the lock. Avoid bending or scratching the key.
- **Lubrication (Optional):** If the lock mechanism becomes stiff, a small amount of graphite-based lubricant designed for locks can be applied to the lock cylinder, not directly to the key. Consult your lock manufacturer's guidelines for lubrication.

## TROUBLESHOOTING

If you encounter issues with your replacement key, consider the following:

Problem	Possible Cause	Solution
Key does not insert fully.	Incorrect key code, debris in lock, bent key.	Verify lock code. Check for obstructions in the lock. Inspect key for damage.
Key inserts but does not turn.	Incorrect key cut, lock mechanism jammed, key not fully inserted.	Ensure key is fully inserted. Try gently wiggling the key while turning. If still stuck, the lock mechanism may require professional attention.
Key feels stiff or difficult to turn.	Lack of lubrication in lock, minor debris.	Apply a small amount of graphite lubricant to the lock cylinder. Clean the key.

If problems persist, contact EasyKeys customer support or a qualified locksmith.

## SPECIFICATIONS

Feature	Detail
