Each model comes with its own specific, detailed step-by-step instructions within the packaging. Please refer to these individual instruction sheets for precise assembly guidance.

1. **Unpack:** Carefully open the product box and remove all contents, including the individual bags of blocks and instruction sheets for each of the 6 models.
2. **Sort Blocks:** Before starting, it is recommended to sort the blocks by color and shape. This will significantly aid in the assembly process due to the small size of the pieces.
3. **Follow Instructions:** Select a model to build and refer to its dedicated instruction sheet. Each step is illustrated with clear diagrams showing which blocks to use and where to place them.
4. **Layer by Layer:** nanoblock models are typically built layer by layer from the base upwards. Pay close attention to the orientation of each block.

Display and Collection

Once assembled, your nanoblock models are perfect for display. Their small size allows them to fit in various spaces, from desks to shelves. You can collect all 6 figures from this assortment and combine them with other nanoblock sets to create larger scenes or dioramas.

Maintenance

- **Cleaning:** To clean your nanoblock models, gently wipe them with a dry, soft cloth. For more stubborn dust, a soft brush or a can of compressed air can be used. Avoid using water or harsh cleaning agents, as these may damage the blocks or cause discoloration.
- **Storage:** Store unassembled blocks in their original packaging or in a secure container to prevent loss of small pieces. Assembled models should be kept in a stable location to avoid accidental falls and disassembly.
