# Yaheetech Universal Hammock Stand Instruction Manual

Model: YT81et0001001

## INTRODUCTION

This manual provides comprehensive instructions for the assembly, operation, maintenance, and troubleshooting of your Yaheetech Universal Hammock Stand. Designed for durability and versatility, this heavy-duty steel stand accommodates hammocks ranging from 9 to 14.5 feet in length and supports up to 475 lbs. Please read this manual thoroughly before use to ensure safe and proper operation.

## SAFETY INFORMATION

### Important Safety Precautions:

- Always read and understand all instructions before assembly and use.
- Keep these instructions for future reference.
- Ensure all components are securely fastened and inspected before each use.
- Do not exceed the maximum weight capacity of **475 lbs (215 kg)**. This stand is designed to hold 2-3 people.
- Use the hammock stand only on a flat, stable, and level surface.
- Avoid using the stand in strong winds without proper anchoring to prevent tipping.
- Keep children and pets away from the stand during assembly and disassembly to prevent injury.
- Regularly check for wear and tear on all parts, especially chains and connection points.

## PACKAGE CONTENTS

Before beginning assembly, verify that all parts listed below are present and undamaged. If any parts are missing or damaged, do not proceed with assembly and contact customer support.

# Package List

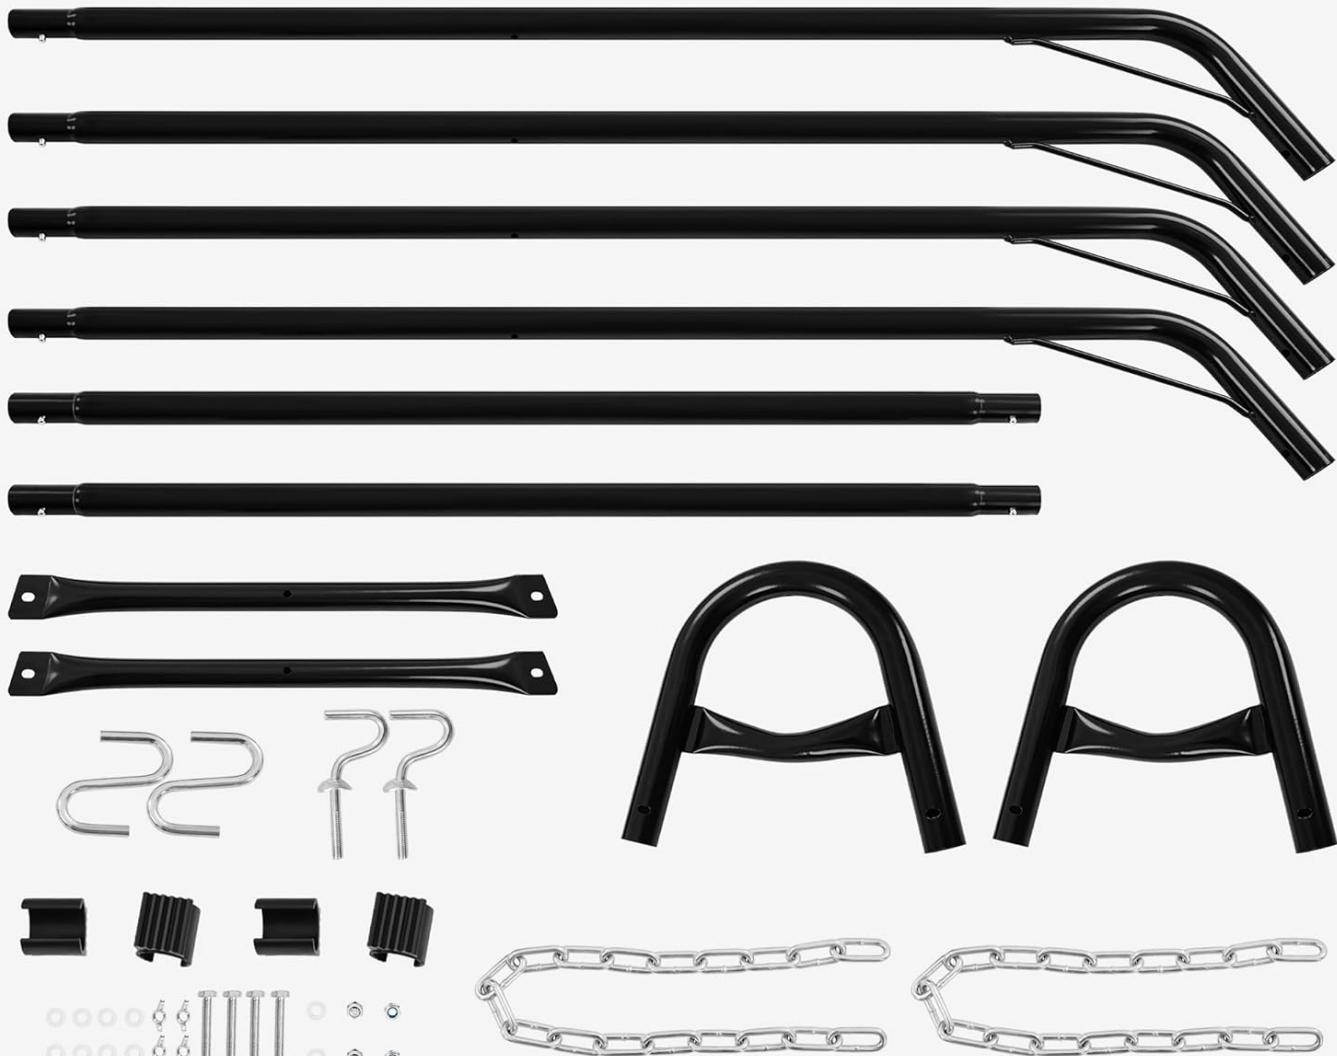

Figure 1: All components included in the package, such as various steel pipes, connectors, hooks, chains, and anti-slip foot pads.

## SETUP AND ASSEMBLY

Assembly of the Yaheetech Universal Hammock Stand is designed to be straightforward. While one person can assemble it, two people may find it easier to manage the larger components.

- Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Refer to the Package Contents diagram (Figure 1) to identify each piece.
- Assemble Base Frame:** Connect the horizontal base pipes using the provided connectors and bolts. Ensure all connections are secure but do not fully tighten bolts until the entire frame is assembled.
- Attach Upright Supports:** Insert the upright support pipes into the designated slots on the base frame. These form the main structure for hanging the hammock.
- Install Crossbars and Braces:** Attach the reinforcing crossbars and corner-strengthening bars between the legs and base tubes. This creates the "double iron tubes" and "sturdy triangle structure" for enhanced stability.
- Secure All Bolts:** Once the frame is fully assembled, go back and securely tighten all bolts. This ensures the stand's stability and safety.

6. **Attach Anti-slip Foot Pads:** Place the anti-slip foot pads onto the bottom of each leg. These pads increase friction with the ground, enhancing stability and protecting surfaces from scratches.
7. **Prepare Hanging Chains:** Attach the provided chains to the top hooks of the upright supports. These chains will be used to connect your hammock.

## OPERATING INSTRUCTIONS

The Yaheetech Universal Hammock Stand offers versatile hanging options for various hammock types.

1. **Hammock Compatibility:** This stand is designed to accommodate hammocks ranging from 9 to 14.5 feet in length. Ensure your hammock falls within this range for optimal fit and safety.
2. **Two-Way Hanging:** The stand features two different attachment options for securing your hammock.
  - **Option 1 (Higher Attachment):** Use the higher attachment points for a tighter hammock suspension, providing a more elevated and taut lying surface.
  - **Option 2 (Lower Attachment):** Use the lower attachment points for a more relaxed and deeper hammock

curve, often preferred for Brazilian or curved hammocks.

3. **Adjusting Hammock Tension:** The included chains allow for fine-tuning the hammock's tightness and height. Simply adjust the chain links connected to your hammock's loops until the desired tension and height are achieved.
4. **Safe Entry and Exit:** Always enter and exit the hammock carefully. Distribute your weight evenly when getting in and out to maintain stability.

## 2-way hanging meets your diverse needs

## MAINTENANCE

The Yaheetech Universal Hammock Stand is constructed from specially treated galvanized iron, providing excellent water and weather resistance. Regular maintenance will ensure its longevity.

- **Cleaning:** Wipe down the frame periodically with a damp cloth to remove dirt, dust, and debris. For stubborn stains, a mild soap solution can be used, followed by rinsing with clean water and thorough drying.
- **Rust Prevention:** The treated surface is designed to shield the iron from oxidation and paint shedding. However, inspect the frame regularly for any signs of rust, especially in areas where the coating might be scratched or chipped. Touch up any damaged areas with rust-inhibiting paint if necessary.
- **Hardware Check:** Periodically check all bolts, hooks, and chains to ensure they remain tight and secure. Tighten any loose fasteners.
- **Storage:** If storing the hammock stand for extended periods, especially during harsh weather conditions, it is recommended to disassemble it and store it in a dry, protected area to further prolong its lifespan.

## TROUBLESHOOTING

This section addresses common issues you might encounter with your hammock stand.

Problem	Possible Cause	Solution
Stand feels unstable or wobbly.	Loose bolts, uneven ground, missing anti-slip pads.	Ensure all bolts are fully tightened. Move the stand to a flat, level surface. Verify all anti-slip foot pads are correctly installed.
Hammock is too low or too high.	Incorrect chain adjustment.	Adjust the length of the hanging chains by hooking them to different links until the desired height and tension are achieved. Refer to "Operating Instructions" for two-way hanging options.
Hammock does not fit the stand.	Hammock length is outside the compatible range.	This stand is suitable for hammocks between 9 and 14.5 feet in length. If your hammock is outside this range, it may not fit properly.
Rust appearing on the frame.	Surface coating damage, prolonged exposure to moisture.	Clean the affected area, lightly sand if necessary, and apply rust-inhibiting paint. Store in a dry area when not in use for extended periods.

## SPECIFICATIONS

Feature	Detail
Brand	Yaheetech
Model Number	YT81et0001001
Material	Galvanized Iron
Color	Black
Product Dimensions (L x W x H)	122.83 x 39.17 x 51.17 inches
Item Weight	35.3 pounds
Max Weight Capacity	475 lbs (215 kg)
Suitable Hammock Length	9 - 14.5 feet
