## VIRIBUS Beach Cruiser Bike

# VIRIBUS Beach Cruiser Bike 24-inch 7-Speed User Manual

Model: Beach Cruiser Bike

## INTRODUCTION

Thank you for choosing the VIRIBUS Beach Cruiser Bike. This 24-inch, 7-speed bicycle is designed for comfortable commuting, leisurely beach rides, exercise, and daily errands. It features a durable high-carbon steel frame, a low step-through design, a 7-speed Shimano derailleur, and convenient front and rear storage options. This manual provides essential information for the assembly, operation, maintenance, and troubleshooting of your new bicycle to ensure a safe and enjoyable riding experience.

## SAFETY INFORMATION

Before your first ride, and periodically thereafter, review the following safety guidelines:

- Always wear a properly fitted helmet when riding.
- Ensure both front and rear brakes are functioning correctly before each ride.
- Check tire pressure to ensure it is within the recommended range.
- Be aware of your surroundings, traffic, and pedestrians.

- Familiarize yourself with local traffic laws and regulations for bicycles.
- Do not ride under the influence of alcohol or drugs.
- Ensure all quick-release levers and bolts are securely tightened.

## SETUP AND ASSEMBLY

---

Your VIRIBUS Beach Cruiser Bike requires assembly. It is recommended to have basic tools and potentially a second person for assistance. The estimated assembly time is approximately one hour or more.

### Included Components:

- 1x Women's Comfort Bike Frame and Wheels
- 1x Front Basket
- 1x Bike Lock
- 1x Assembly Instructions
- 1x Tool Kit (basic wrenches and hex keys)
- Mudguards

### Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging. Check against the included components list to ensure everything is present.
2. **Install Handlebars:** Attach the handlebars to the stem, ensuring they are centered and tightened securely. Adjust the angle for comfortable riding.
3. **Install Front Wheel:** Insert the front wheel into the fork dropouts. Ensure the quick-release skewer or axle nuts are tightened properly.
4. **Attach Pedals:** Identify left (L) and right (R) pedals. Thread the pedals into the crank arms, ensuring the correct direction (left pedal is reverse threaded). Tighten firmly.
5. **Install Seat Post and Saddle:** Insert the seat post with the saddle attached into the frame's seat tube. Adjust the height for comfortable leg extension and tighten the quick-release or bolt.
6. **Attach Front Basket and Rear Rack:** Secure the rattan front basket to the handlebars and front fork mounts. Install the reinforced rear rack to the designated frame mounts.
7. **Adjust Brakes:** Ensure both front and rear V-brakes are properly aligned and the brake levers provide firm, responsive stopping power. Adjust cable tension as needed.
8. **Adjust Gears:** Test the 7-speed thumb shifters and derailleur for smooth and precise gear changes across all speeds. Fine-tune the derailleur limits and cable tension if necessary.
9. **Inflate Tires:** Inflate both tires to the recommended pressure indicated on the tire sidewall.

## OPERATING INSTRUCTIONS

### Gear Shifting (7-Speed Shimano Derailleur):

Your bike is equipped with a 7-speed Shimano derailleur and user-friendly thumb shifters located on the right handlebar. To shift gears:

- **To shift to a higher gear (harder pedaling, faster speed):** Push the larger lever or button on the thumb shifter. This

moves the chain to a smaller cog on the rear wheel.

- **To shift to a lower gear (easier pedaling, slower speed):** Push the smaller lever or button. This moves the chain to a larger cog on the rear wheel.
- Shift gears smoothly while pedaling to avoid strain on the drivetrain. Anticipate terrain changes and shift proactively.

# 7-SPEED SHIMANO DERAILLEUR

Steady Control for Long Commutes on Any Terrain

## Braking (Dual V-Brakes):

The bike features reliable front and rear V-brakes for effective stopping power. The right lever controls the rear brake, and the left lever controls the front brake.

- Apply both brakes simultaneously for controlled stopping.
- Avoid sudden, hard application of the front brake, especially at high speeds, as this can cause loss of control.
- Practice braking in a safe, open area to become familiar with the bike's stopping characteristics.

## Cargo Capacity:

Utilize the integrated storage features for convenience:

- **Front Rattan Basket:** Designed to carry up to 11 lb (5 kg) of essentials. Ensure items are secured to prevent them from falling out during transit.
- **Reinforced Rear Rack:** Capable of carrying up to 55 lb (25 kg). Use bungee cords or straps to secure items firmly to the rack.

## RATTAN-WRAPPED WIRE MESH BASKET

Easily Carry Your Essentials in Style

**11 lb.**  
Capacity

**Waterproof**  
Security

**Sleek**  
Design

## MAINTENANCE

---

Regular maintenance ensures the longevity and safe operation of your bicycle.

- **Tires:** Check tire pressure weekly and inflate to the recommended PSI. Inspect tires for wear, cuts, or embedded debris. The duplex aluminum alloy rims are designed for durability.
- **Brakes:** Regularly inspect brake pads for wear and replace them when necessary. Ensure brake cables are free of fraying and properly tensioned for effective braking.

- **Chain:** Clean and lubricate the chain every few weeks, or more often if riding in wet or dusty conditions. This prevents rust and ensures smooth gear changes.
- **Gears:** Periodically check the derailleur for proper alignment and smooth shifting. Adjust limit screws and cable tension if gears are skipping or not shifting precisely.
- **Frame:** Clean the high-carbon steel frame with a damp cloth and mild soap. Avoid harsh chemicals. Inspect the frame for any signs of damage or cracks.
- **Saddle:** The cushioned saddle features waterproof leather. Wipe it clean with a damp cloth.
- **Bolts and Fasteners:** Periodically check and tighten all bolts and fasteners, including those on the handlebars, seat post, wheels, and accessories.

## TROUBLESHOOTING

---

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Gears not shifting smoothly	Derailleur misalignment, stretched cable, dirty chain	Adjust derailleur limit screws, check cable tension, clean and lubricate chain.
Brakes feel spongy or ineffective	Loose brake cable, worn brake pads, misaligned pads	Tighten brake cable, replace worn pads, adjust pad alignment.
Tire goes flat quickly	Puncture in inner tube, valve stem issue	Inspect tire for punctures, repair or replace inner tube, check valve for leaks.
Creaking noises while pedaling	Loose crank arms, bottom bracket, or pedals	Check and tighten crank bolts, bottom bracket, and pedals.

If you are unable to resolve an issue, it is recommended to consult a professional bicycle mechanic.

## SPECIFICATIONS

---

Key specifications for your VIRIBUS Beach Cruiser Bike:

- **Bike Type:** Cruiser Bike
- **Age Range:** Adult
- **Brand:** VIRIBUS
- **Number of Speeds:** 7
- **Color:** Snow White
- **Wheel Size:** 24 Inches
- **Frame Material:** High-Carbon Steel
- **Suspension Type:** Rigid
- **Special Features:** 7 Speed, Front Basket, Rear Rack, Front & Rear Fenders
- **Maximum Weight Recommendation:** 330 Pounds (150 kg)
- **Assembly Required:** Yes
- **Brake Style:** Linear Pull (V-Brakes)
- **Model Name:** Beach Cruiser Bike

- **Recommended Rider Height:** 5'1" to 5'7" (155 cm to 170 cm)
- **Item Dimensions (LxWxH):** Approximately 51.57 x 8.07 x 28.74 inches (131 x 20.5 x 73 cm)
- **Package Weight:** Approximately 41.4 Pounds (18.8 kg)

## WARRANTY AND SUPPORT

---

For information regarding product warranty, please refer to the documentation included with your purchase or contact VIRIBUS customer service directly. For technical support or assistance with parts, please visit the official VIRIBUS website or contact their customer support team.
