Manfrotto MB PL-CL-DK

Manfrotto Pro Light Cineloader Divider Kit (MB PL-CL-DK) Instruction Manual

1. INTRODUCTION AND OVERVIEW

This instruction manual provides detailed guidance for the Manfrotto Pro Light Cineloader Divider Kit (MB PL-CL-DK). This kit is designed to enhance the internal organization of your Manfrotto Cineloader Medium or Large video camera bag, transforming it into a versatile storage solution for lenses, camera bodies, and various accessories.

The kit includes a selection of M-Guard dividers in S, M, and L sizes, allowing for flexible customization of your bag's interior. These dividers are constructed from high-density EVA foam, offering superior shock absorption while maintaining a slim profile. Their distinct gray color differentiates them from the standard red dividers, ensuring easy identification. Additionally, a transparent storage pouch is included, ideal for organizing cables and other small accessories.

Important Note: This divider kit is specifically compatible with Manfrotto Cineloader Medium and Large bags. It is not designed for use with the Cineloader Small bag.

2. SETUP AND INSTALLATION

Follow these steps to set up and install the dividers within your Manfrotto Cineloader Medium or Large bag:

1. **Prepare Your Bag:** Ensure your Cineloader bag is empty and clean before installing the dividers.
2. **Assess Your Gear:** Lay out the camera equipment (lenses, bodies, accessories) you intend to store. This will help you plan the optimal divider arrangement.
3. **Insert Main Dividers:** Begin by placing the larger L-size M-Guard dividers to create primary compartments for your main camera bodies or larger lenses. The dividers attach securely to the interior fabric of the bag using hook-and-loop fasteners.
4. **Subdivide with Smaller Dividers:** Use the S and M-size dividers to create smaller, customized sections within the main compartments. This allows for snug and secure fitting of individual lenses, flashes, or other accessories.
5. **Adjust as Needed:** The modular design allows for easy repositioning of dividers. Experiment with different configurations to find the best fit and protection for your specific gear.

3. OPERATING (USAGE)

The Manfrotto Pro Light Cineloader Divider Kit is designed for intuitive use and maximum flexibility:

- **Customizable Protection:** The M-Guard dividers can be easily rearranged to accommodate different camera setups or new equipment. Their high-density EVA foam construction provides excellent cushioning against impacts.
- **Quick Identification:** The unique gray color of these dividers allows for quick visual distinction from other standard dividers, streamlining your workflow.
- **Transparent Storage Pouch:** Use the included transparent pouch for organizing smaller items such as cables, batteries, memory cards, or cleaning cloths. The clear window allows you to quickly identify contents without opening the pouch.

Figure 4: The transparent storage pouch, shown here organizing various cables, allows for easy content identification.

4. MAINTENANCE

Proper maintenance ensures the longevity and effectiveness of your divider kit:

- **Cleaning Dividers:** For light dirt, wipe the dividers with a damp cloth. For more stubborn stains, use a mild soap solution and a soft brush, then air dry completely. Do not machine wash or tumble dry.
- **Cleaning Pouch:** The transparent pouch can be wiped clean with a damp cloth. Avoid harsh chemicals that may damage the clear material.
- **Storage:** When not in use, store the dividers and pouch in a clean, dry place away from direct sunlight and extreme temperatures.

5. TROUBLESHOOTING

This divider kit is a passive accessory and typically does not require troubleshooting. However, if you encounter any issues:

- **Dividers not fitting:** Ensure you are using the kit with a Manfrotto Cineloader Medium or Large bag. This kit is not compatible with the Cineloader Small bag.
- **Lack of protection:** Ensure dividers are securely fastened to the bag's interior and arranged snugly around your equipment to prevent movement during transport.

6. SPECIFICATIONS

Feature	Specification
Model Number	MB PL-CL-DK
Manufacturer	Manfrotto
Product Dimensions	32 x 22.61 x 5.08 cm (12.6 x 8.9 x 2 inches)
Weight	349 g (0.77 lbs)
