3. SETUP INSTRUCTIONS

Setting up your ESSAGER USB 2.0 Hub is a simple plug-and-play process.

Connecting the Hub:

1. Locate an available USB A port on your host device (laptop, desktop PC, Xbox, PS5, etc.).
2. Plug the USB A connector of the ESSAGER Hub into the available USB A port on your host device.
3. The hub is now ready for use. No additional drivers or software installation is typically required.

Connecting Peripherals:

- Connect your USB devices (e.g., mouse, keyboard, flash drive, printer) into the available USB 2.0 ports on the ESSAGER Hub.
- Ensure that each device is securely plugged in.

4. OPERATING INSTRUCTIONS

Once connected, the ESSAGER USB 2.0 Hub functions as a direct extension of your device's USB ports.

Data Transfer:

- Insert your USB flash drives or external hard drives into any of the four USB 2.0 ports.
- Data transfer will occur at speeds up to 480 Mbps, which is standard for USB 2.0.
- For optimal performance, avoid transferring extremely large files simultaneously across all four ports if you experience slowdowns.

Powering Devices:

- The hub can provide sufficient power for most USB peripherals.
- It is capable of driving a 2TB hard drive, making it suitable for connecting high-power devices without an external power adapter.

5. MAINTENANCE

Proper care will help extend the life of your ESSAGER USB 2.0 Hub.

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the hub. Avoid liquid cleaners or abrasive materials.
- **Storage:** When not in use, store the hub in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the device or subjecting it to strong impacts. Do not attempt to disassemble the hub.

6. TROUBLESHOOTING

If you encounter issues with your ESSAGER USB 2.0 Hub, please refer to the following common solutions:

• Device Not Recognized:

- Ensure the hub is securely connected to your host device's USB A port.
- Try connecting the hub to a different USB A port on your host device.
- Ensure the peripheral device (e.g., mouse, flash drive) is securely connected to the hub.
- Restart your host device.

• Slow Data Transfer:

- Verify that the connected devices are USB 2.0 compatible. USB 1.1 devices will operate at slower speeds.
- Avoid connecting multiple high-bandwidth devices simultaneously if possible.
- Ensure your host device's USB A port is functioning correctly.

• External Hard Drive Not Powering On:

- While the hub supports 2TB drives, some high-power external hard drives may require their own external power supply.
- Ensure the hard drive cable is fully inserted into the hub.

If these steps do not resolve the issue, please contact ESSAGER customer support for further assistance.
