

ChunHee HI05-IM

ChunHee Wireless Intercom System User Manual

MODEL: HI05-IM

Introduction

This manual provides comprehensive instructions for the ChunHee Wireless Intercom System, designed for hands-free, full-duplex 2-way communication within homes, garages, basements, yards, offices, and apartments. It is ideal for maintaining real-time contact with family members, including the elderly, children, or those needing care.

The ChunHee Wireless Intercom System includes two units, each with a dedicated charging dock, designed for convenient and reliable communication.

Package Contents

- 2 x ChunHee Wireless Intercom Units
- 2 x Charging Docks
- 2 x USB-C Charging Cables
- 2 x Power Adapters
- 1 x User Manual

Each package contains two intercom units, two charging docks, two USB-C charging cables, and two power adapters, along with the user manual.

Initial Setup

Charging the Units

Before first use, fully charge both intercom units. The units can be charged in two ways:

1. **Using the Charging Dock:** Place each intercom unit into its respective charging dock. Connect the USB-C cable to the dock and the power adapter to a wall outlet.
2. **Direct USB-C Charging:** Connect the USB-C cable directly to the USB-C port on the side of the intercom unit and then to a power adapter.

A full charge provides 72-96 hours of standby time or 8 hours of typical usage. The unit will audibly alert you every 20 seconds when the battery is low.

After connecting, both sides can talk at the same time.

The intercom units offer flexible charging options: either through their dedicated charging docks or directly via a USB-C cable.

Operation

Power On/Off

Press and hold the power button (red button with circle and line) to turn the unit on or off.

Making a Call

To initiate a call, press the green call button (phone icon). The other unit will ring.

Answering a Call

To answer an incoming call, press the green call button.

Ending a Call

To end a conversation, press the red hang-up button (phone icon).

Adjusting Volume

Use the "VOL-" and "VOL+" buttons to adjust the listening volume. There are 8 different volume levels.

Changing Ringtone

The system offers 5 different ringtones. Refer to the detailed manual for specific instructions on how to cycle through and select ringtones.

The advertisement features a large orange banner at the top with the text "Easier to use than cell phone" in white. Below this, an older man with a beard and glasses is shown talking on a black mobile phone. A circular inset shows a close-up of the ChunHee intercom device's control panel, which includes buttons for "VOL-", a power button, "VOL+", a red call button, and a green call button. Below the banner, a woman is sitting on a couch reading a book. In the foreground, the ChunHee intercom system is shown on a wooden table. A blue signal icon is above the device, and colorful musical notes are floating around it. An orange button with a musical note icon and the text "Choice of 5 ringtones" is positioned above the device.

The ChunHee intercom system supports full-duplex communication, allowing both parties to speak and listen simultaneously, similar to a phone call.

No need to signal

Express your love and thoughts to them

Designed for simplicity, the intercom is as easy to use as a traditional phone, making communication effortless.

Installation Options

The intercom units are designed for versatile placement:

- **Hand-held:** Lightweight and portable for easy carrying.
- **Lanyard Hole:** A dedicated hole is provided for attaching a lanyard (lanyard not included).
- **Wall-Mountable:** A keyhole slot on the back allows for wall mounting (screws not included).

If you are sensitive to light, it is recommended to put the intercom upside down when you sleep at night

The intercom units can be carried with a lanyard or conveniently mounted on a wall for fixed locations.

Range and Sound Quality

The system provides clear, crisp sound quality without feedback. It supports communication over a range of up to 500 feet (approximately 150 meters) in open areas. Performance may vary based on environmental factors and obstacles.

Two charging options

3 Days
Standby

6-8h
Typical Use

Type-C
Charging Cable

1000mAh
Rechargeable
Battery

Power
Adapter

Enjoy reliable communication across distances up to 500 feet, ensuring you stay connected without the need for cellular signals.

Troubleshooting

Low Battery Alert

If the battery is low, the unit will provide an audible "low battery" voice prompt every 20 seconds until it is turned off. This ensures you are always aware when charging is needed.

No Connection/Static

Ensure both units are within the effective communication range. Obstacles like thick walls or multiple floors can reduce range. Try moving closer to the other unit or to an open area.

Poor Sound Quality

Adjust the volume using the "VOL-" and "VOL+" buttons. Ensure there are no obstructions directly in front of the speaker or microphone.

Suitable for intercom calls indoors

The intercom provides clear low battery alerts, prompting you to charge the unit to maintain continuous communication.

Product Specifications

Feature	Detail
Item Weight	15.8 ounces
Package Dimensions	8.5 x 8.5 x 1.81 inches
Country of Origin	China
Item model number	HI05-IM
Batteries	1 Lithium Polymer batteries required. (included)
