5. INSTALLATION GUIDE

Follow these steps carefully for proper installation of your Eridanus One Piece Toilet:

1. **Lock the mounting bolts into position:** Secure the mounting bolts onto the floor flange.

2. **Apply the wax ring gasket:** Evenly apply the wax ring gasket around the rear of the trapway on the bottom of the toilet.

3. **Position the toilet on the floor flange:** Carefully lower the toilet onto the floor flange, aligning the bolts with the holes in the toilet base.

4. **Install the washers and nuts onto the bolts:** Secure the toilet to the floor flange using the provided washers and nuts. Tighten firmly but do not overtighten.

5. **Connect the supply line:** Connect the water supply line (not included) to the fill valve at the back of the toilet. Ensure a tight, leak-free connection.

6. **Perform a flush test:** Once the water supply is connected and the tank fills, perform a test flush to check for any leaks and ensure proper flushing operation.

7. **Assemble cover caps:** Assemble and install the side cover caps to conceal the mounting bolts.

8. **Install the seat hinges:** Place the seat hinges onto the designated holes on the toilet bowl.

9. **Align the pre-drilled holes on the seat with the hinges:** Carefully align the toilet seat with the installed hinges.

10. **Adjust the seat to align with the bowl:** Ensure the seat is properly centered and aligned with the toilet bowl.

11. **Fasten the hinge and put the cover on:** Secure the hinges and place the decorative covers over them.

12. **Install the seat cover:** Gently lower the soft-closing seat into place.

6. OPERATING INSTRUCTIONS

The Eridanus One Piece Toilet is designed for efficient and powerful flushing with water conservation in mind.

- **Dual Flush System:** The toilet features dual flush options (1.1/1.6 GPF - Gallons Per Flush). Use the smaller button for liquid waste (1.1 GPF) and the larger button for solid waste (1.6 GPF) to optimize water usage.
- **Siphon Turbo Flush Technology:** This technology ensures a 360° all-round washing with every flush, providing a powerful and thorough cleaning of the bowl.
- **Soft-Closing Seat:** The soft-close seat ensures a quiet and gentle closing, preventing loud slams and extending the life of the seat.

7. MAINTENANCE

Regular cleaning and maintenance will help keep your Eridanus toilet in excellent condition.

- **Cleaning:** The one-piece design and fully skirted trapway simplify cleaning. Use a soft cloth and mild, non-abrasive cleaners. Avoid harsh chemicals or abrasive pads that can damage the ceramic surface or seat finish.
- **Seat Removal:** For thorough cleaning, the quick-release seat can be easily detached by pressing the release buttons and gently pulling the seat upwards.
- **Flushing Mechanism:** Periodically inspect the flushing mechanism for any debris or mineral buildup. The patent self-cleaning and clog-free technology helps maintain performance.

8. TROUBLESHOOTING

If you encounter any issues with your Eridanus toilet, please refer to the following common troubleshooting tips:

- **Weak Flush:** Check the water level in the tank. Ensure the fill valve is fully open and the water supply line is not kinked. Verify that the flush valve is operating correctly and not obstructed.
- **Continuous Running Water:** Inspect the flapper or flush valve for proper sealing. Ensure the fill valve is not overfilling the tank. Adjust the float if necessary.
- **Leaks:** Check all connections for tightness, especially the supply line and the bolts securing the toilet to the floor. Inspect the wax ring for proper seal. If leaks persist, professional assistance may be required.
- **Slow Tank Fill:** Ensure the water supply valve is fully open. Check the fill valve for any blockages or debris.
