## SETUP AND ASSEMBLY

This bathroom vanity requires assembly. All necessary hardware (screws, metal door hinges, handles, drawer slides, anti-toppling device) and an instruction manual are provided. Follow the steps carefully to ensure correct and safe assembly.

### Before You Begin:

- Unpack all components and verify against the parts list in the included assembly manual.

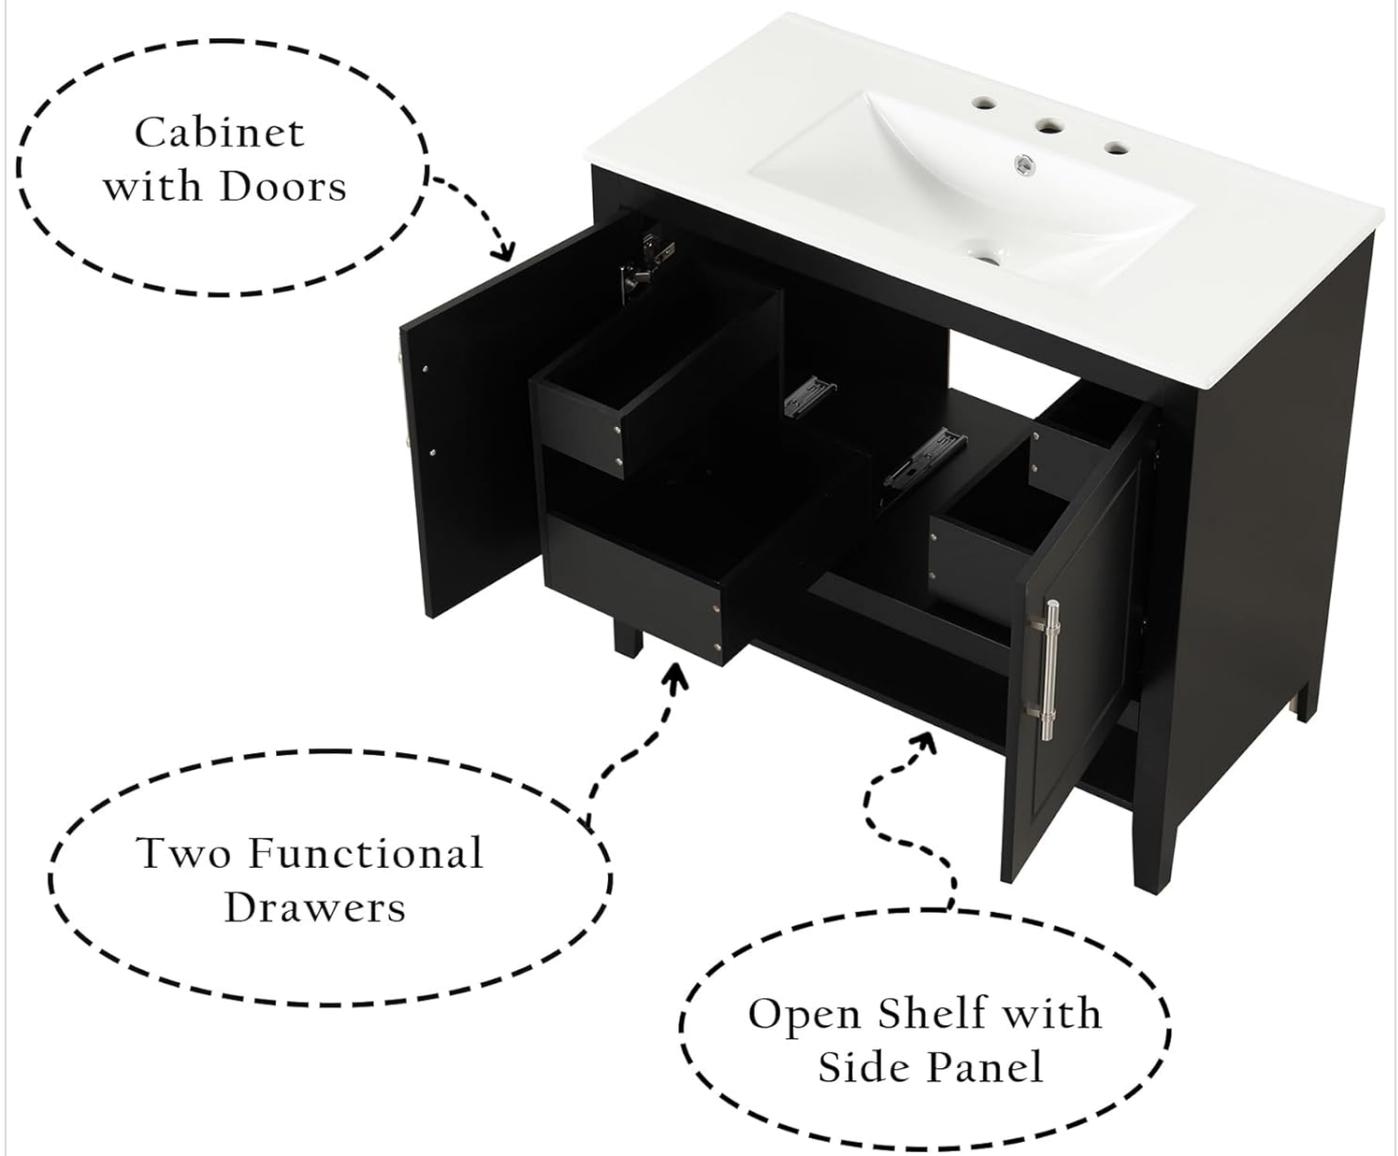

- Ensure you have adequate space for assembly.
- Gather necessary tools (e.g., screwdriver, hammer, level).
- Review the assembly instructions provided in the product packaging thoroughly before starting.

### **Assembly Steps (General Overview):**

1. Assemble the main cabinet frame using the provided screws and connectors.
2. Install the drawer slides and assemble the drawers.
3. Attach the cabinet doors using the stainless steel door hinges.
4. Secure the gold handles to the doors and drawers.
5. Place the ceramic sink top onto the assembled cabinet.
6. Install the anti-toppling device if required for stability.

*Refer to the detailed step-by-step assembly guide included in your product packaging for specific instructions and diagrams.*

## OPERATING THE VANITY

The Dolonm Bathroom Vanity is designed for straightforward use. Once assembled and installed, its primary function is to provide a functional sink area and organized storage.

### Sink Usage:

- Ensure a faucet (not included) is properly installed and connected to water lines before use.
- The ceramic sink is designed for daily washing and hygiene.
- The overflow with a metal circle prevents water from spilling over if the tap is accidentally left on.

### Storage Functionality:

- **Cabinet Doors:** Open the two front doors to access the main storage compartment. Built-in shelves provide space for larger items like shampoos and shower gels.
- **Drawers:** Utilize the partitioned drawers for neatly storing smaller bathroom essentials such as cosmetics, toiletries, and accessories. The smooth slides ensure easy opening and closing.
- **Open Shelf:** The bottom open shelf is ideal for storing towels or decorative items, providing easy access.

## MAINTENANCE AND CARE

---

Proper care and maintenance will extend the life and preserve the appearance of your Dolonm Bathroom Vanity.

### General Cleaning:

- **Cabinet Surface:** The painted finish is water-proof and stain-proof. Wipe surfaces with a soft, damp cloth and mild soap. Avoid abrasive cleaners or harsh chemicals that can damage the finish.
- **Ceramic Sink:** Clean the ceramic sink with non-abrasive bathroom cleaners. Rinse thoroughly after cleaning to prevent residue buildup.
- **Hardware:** Wipe metal handles and hinges with a soft, dry cloth. Avoid using chemical cleaners on metal parts.

## Preventative Measures:

- Wipe up spills immediately to prevent water damage, especially around seams and edges.
- Avoid placing extremely hot items directly on the sink or cabinet surface.
- Do not overload drawers or shelves to prevent damage to slides and structural components.

## TROUBLESHOOTING

---

This section addresses common issues you might encounter with your bathroom vanity.

### Common Issues and Solutions:

**Issue: Drawers do not slide smoothly.**

**Solution:** Check if the drawer slides are properly aligned and free of obstructions. Ensure all screws securing the slides are tightened. Lubricate slides with a silicone-based lubricant if necessary.

**Issue: Cabinet doors are misaligned or do not close properly.**

**Solution:** Adjust the screws on the door hinges. Most hinges allow for minor adjustments to align doors vertically, horizontally, and in depth. Refer to the hinge manufacturer's instructions if available, or consult a general guide on cabinet hinge adjustment.

**Issue: Water stains or residue on the ceramic sink.**

**Solution:** Clean the sink regularly with a non-abrasive cleaner. For stubborn stains, a paste of baking soda and water can be applied, left for a few minutes, then scrubbed gently and rinsed.

**Issue: Vanity feels wobbly or unstable.**

**Solution:** Ensure the vanity is placed on a level surface. Check that all assembly screws are tightened. If an anti-toppling device was included, ensure it is properly installed and secured to the wall.
