## Goohome Large Chicken Coop Metal Chicken Run

# Goohome 10 ft. x 20 ft. Large Chicken Coop Metal Chicken Run Instruction Manual

## 1. Introduction

Thank you for choosing the Goohome 10 ft. x 20 ft. Large Chicken Coop Metal Chicken Run. This manual provides essential information for the safe assembly, operation, and maintenance of your new poultry enclosure. Please read these instructions carefully before beginning assembly and retain them for future reference.

## 2. Safety Information

Always prioritize safety during assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- **Adult Assembly Required:** This product requires assembly by adults. Keep children and pets away from the assembly area.
- **Wear Protective Gear:** Wear gloves and eye protection during assembly to prevent cuts or scrapes from metal edges.
- **Check for Damage:** Before assembly, inspect all components for damage. Do not proceed with assembly if any parts are bent, broken, or missing.

- **Secure Placement:** Choose a level, stable outdoor surface for installation. Ensure the coop is anchored securely to the ground to prevent tipping in strong winds.
- **Regular Inspection:** Periodically check all connections, bolts, and ground anchors to ensure they remain tight and secure.
- **Proper Use:** This chicken coop is designed for poultry and small animals. Do not use it for purposes other than its intended design.

## 3. Package Contents

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

- Galvanized Metal Frame Poles
- PVC Coated Hexagonal Wire Mesh Rolls
- Connectors and Hardware (bolts, nuts, wire ties)
- Lockable Steel Door Assembly
- Waterproof and Anti-UV Oxford Cloth Cover
- Reinforcement Ground Nails/Stakes
- Instruction Manual

## 4. Setup and Assembly Instructions

Follow these steps carefully for proper assembly. It is recommended to have at least two adults for assembly.

### 4.1. Prepare the Area

1. Clear a level, open area of approximately 10 ft. x 20 ft. for the coop installation.
2. Ensure the ground is firm and free of debris.

### 4.2. Assemble the Frame

1. Unpack all galvanized metal frame poles and connectors.
2. Begin by connecting the base frame poles, ensuring they form a stable rectangular foundation.
3. Attach the vertical support poles to the base, followed by the roof frame poles. Refer to the included diagram for the correct orientation of each section.
4. Secure all connections with the provided bolts and nuts, tightening them firmly but not excessively to avoid stripping.

### 4.3. Install the Wire Mesh

1. Unroll the PVC coated hexagonal wire mesh.
2. Starting from one end, attach the mesh to the frame using the provided wire ties. Ensure the mesh is taut and securely fastened to all frame poles.
3. Overlap mesh sections slightly if necessary and secure them together with wire ties to prevent gaps.
4. Pay close attention to the bottom edge of the mesh, ensuring it is flush with the ground to prevent animals from digging underneath.

### 4.4. Attach the Door and Reinforce

1. Install the lockable steel door assembly into the designated opening in the frame. Ensure it swings freely and the locking mechanism functions correctly.
2. Use the reinforcement ground nails/stakes to secure the base of the coop to the ground. Drive them firmly into the soil at regular intervals around the perimeter.

Figure 4.1: Reinforcement nails and door connection details.

Figure 4.2: Key components for assembly and protection.

### 4.5. Install the Cover

1. Drape the waterproof and anti-UV Oxford cloth cover over the roof frame.
2. Secure the cover to the frame using the provided fasteners or ties, ensuring it is taut and covers the designated area completely. The pitched roof design allows for efficient water runoff.

## 5. Operating Instructions

The Goohome Chicken Coop is designed for ease of use and animal safety.

- **Access:** Use the lockable steel door for easy entry and exit when feeding, cleaning, or tending to your poultry. Always ensure the door is securely latched to prevent escapes and protect against predators.
- **Protection:** The PVC coated hexagonal wire mesh provides a secure barrier against predators, while the small gaps prevent your animals from escaping.
- **Weather Resistance:** The durable UV and water-resistant Oxford cloth cover protects your chickens from sun, rain, and light snow. The pitched roof design facilitates water and debris runoff.

Figure 5.1: Weather protection features of the coop cover.

## 6. Maintenance

Regular maintenance will ensure the longevity and safety of your chicken coop.

- **Cleaning:** Periodically clean the metal frame and wire mesh with mild soap and water. Rinse thoroughly and allow to air dry.
- **Cover Care:** Clean the Oxford cloth cover as needed with a soft brush and water. Avoid harsh chemicals that could damage the material. Ensure the cover remains securely attached, especially during windy conditions.
- **Hardware Check:** Annually, or more frequently if exposed to harsh weather, inspect all bolts, nuts, and wire ties. Tighten any loose connections.
- **Ground Anchors:** Verify that the ground nails/stakes remain firmly in place. Re-secure if they have loosened.
- **Mesh Inspection:** Check the wire mesh for any signs of damage, such as tears or bent sections, which could compromise animal safety. Repair or replace damaged sections promptly.

## 7. Troubleshooting

If you encounter issues with your chicken coop, consider the following common solutions:

- **Coop feels unstable:** Ensure all frame connections are tightly secured. Verify that the ground nails are fully driven into stable ground. Consider adding additional anchoring if in a high-wind area.
- **Door does not close properly:** Check for any obstructions in the door frame or hinges. Ensure the frame is square and level. Adjust hinges or latch if necessary.
- **Water pooling on cover:** Ensure the cover is taut and properly positioned over the pitched roof. Clear any debris that may be accumulating on the cover.
- **Mesh appears loose:** Re-tighten wire ties or add more ties to secure the mesh firmly to the frame.

## 8. Specifications

Key specifications for the Goohome 10 ft. x 20 ft. Large Chicken Coop Metal Chicken Run:

| Feature | Detail |
|---|---|
| Model Name | Large Chicken Coop Metal Chicken Run |
| Overall Dimension | 10 ft. x 20 ft. x 6.36 ft. (119.28"L x 230.64"W x 76.32"H) |
| Material | Galvanized Metal Frame, PVC Coated Hexagonal Wire Mesh |
| Cover Material | 240D Oxford Cloth (Waterproof & Anti-UV) |
| Color | Silver |
| Item Weight | 10 pounds (Product only, not shipping weight) |
| Specific Uses | Outdoor Poultry Enclosure |
| Special Feature | Portable (referring to ease of assembly/disassembly) |
