# Logitech Wave Keys MK670 Combo Ergonomic Wireless Keyboard and Mouse Bundle User Manual

Model: MK670 Combo

## INTRODUCTION

---

This manual provides detailed instructions for the setup, operation, and maintenance of your Logitech Wave Keys MK670 Combo. This ergonomic wireless keyboard and mouse bundle is designed to enhance comfort and productivity across both Windows and Mac systems. It features a distinctive wave-shaped keyboard layout and an integrated cushioned palm rest to support a natural typing posture and reduce wrist strain. The full-size wireless mouse offers smooth tracking and a contoured design for reliable performance.

## SETUP

---

Follow these steps to set up your Logitech Wave Keys MK670 Combo:

1. **Insert Batteries:** The keyboard requires two AAA batteries, and the mouse requires one AA battery. Open the battery compartments on the underside of each device and insert the batteries, ensuring correct polarity.
2. **Connect the USB Unifying Receiver:** Locate the USB unifying receiver, typically stored within the mouse's battery compartment. Plug this receiver into an available USB port on your computer (Windows or Mac).
3. **Power On Devices:** Turn on the keyboard and mouse using their respective power switches. The devices should automatically connect to your computer via the unifying receiver.
4. **Adjust Keyboard Tilt:** The keyboard features adjustable feet on its underside. You can extend these feet to achieve a preferred typing angle or keep them folded for a flat profile.

## OPERATING INSTRUCTIONS

### Keyboard Usage

- **Ergonomic Design:** The wave-shaped key layout and integrated palm rest are designed to promote a more natural hand and wrist posture, reducing strain during prolonged use.
- **Function Keys:** The keyboard includes dedicated function keys (F1-F12) and media control keys for quick access to common tasks such as volume control, media playback, and application shortcuts.
- **Operating System Compatibility:** The keyboard is compatible with both Windows and Mac operating systems. Specific keys may have dual labels (e.g., Start/Cmd, Alt/Opt) to indicate their function across different platforms.

## MAINTENANCE

- **Cleaning:** Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to clean the surfaces of the keyboard and mouse. Avoid harsh chemicals or abrasive materials.
- **Battery Replacement:** The keyboard and mouse are designed for long battery life. When batteries are low, replace them promptly with new AAA (keyboard) and AA (mouse) alkaline batteries. Dispose of old batteries according to local regulations.
- **Storage:** When not in use for extended periods, turn off the devices to conserve battery life. Store them in a dry, cool place away from direct sunlight.

## TROUBLESHOOTING

- **No Connection:** If the keyboard or mouse does not connect, ensure the USB unifying receiver is securely plugged into a working USB port. Check that the devices are powered on and have fresh batteries. Try plugging the receiver into a different USB port.

- **Lag or Intermittent Connection:** Move the devices closer to the USB receiver. Ensure there are no large metal objects or other wireless devices interfering with the signal between the devices and the receiver.
- **Keys or Buttons Not Responding:** Check for debris under the keys or buttons. If the issue persists, try re-pairing the devices with the unifying receiver using the Logi Options+ app or by following Logitech's support instructions.
- **Battery Life Issues:** Ensure you are using high-quality alkaline batteries. Extreme temperatures can affect battery performance.
