- **Stability Check:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Environmental Conditions:** Avoid placing the armoire in direct sunlight or near heat sources, as this can cause fading or warping. Maintain a stable room temperature and humidity.

Troubleshooting

If you encounter issues during assembly or use, refer to the following common solutions:

• **Difficulty with Assembly / Misaligned Holes:**

Carefully review the instruction manual diagrams for the specific step. Ensure you are using the correct parts and hardware for each stage. If holes do not align, double-check that panels are oriented correctly. Do not force components; if a part seems incorrect, re-examine the labels and instructions. In rare cases of manufacturing defects, contact customer support.

• **Wobbly or Unstable Armoire:**

Ensure all screws and fasteners are fully tightened. Verify that the armoire is placed on a flat, level surface. If the floor is uneven, use shims under the base to stabilize it. For added safety, consider securing the armoire to a wall using anti-tip hardware (not included, but recommended for heavy furniture).

• **Doors Not Closing Properly:**

Check the hinge alignment. Most hinges allow for minor adjustments to ensure doors close flush and evenly. Refer to the assembly instructions for hinge adjustment details.
