AlveyTech 1079133

AlveyTech Battery Charger Power Cord for Invacare Reliant Patient Lifts - Model 1079133 User Manual

Introduction

This manual provides instructions for the AlveyTech Battery Charger Power Cord, designed for use with Invacare Reliant Patient Lifts, specifically the Reliant 600 Lift. This power cord is an essential component of the wall-mounted charging system, ensuring proper power delivery to your lift's battery charger.

Product Overview

The AlveyTech Battery Charger Power Cord (Model 1079133) is manufactured by Linak for Invacare. It features a standard 2-pin US household male plug for wall sockets and a 2-pin shrouded female connector for the charger end.

This image displays the AlveyTech Battery Charger Power Cord, showing its standard US wall plug on one end and the specialized 2-pin shrouded female connector on the other, with the coiled black cable in between.

Specifications

Feature	Detail
Package Dimensions	15.04 x 5.04 x 1.5 inches
Item Weight	10.5 ounces

Feature	Detail
Item Model Number	1079133
Brand	AlveyTech
Connector Gender	Male-to-Female
Voltage	120 Volts
Plug Format	Type A (US Standard)

Setup Instructions

Connecting the Power Cord

1. Ensure the Invacare Reliant Patient Lift's battery charger is powered off and disconnected from any power source.
2. Locate the power input port on your Invacare Reliant Patient Lift battery charger. This port is designed to accept a 2-pin shrouded female connector.
3. Align the 2-pin shrouded female connector of the AlveyTech power cord with the charger's input port. Gently push the connector firmly into place until it is fully seated.
4. Insert the standard 2-pin US household male plug of the power cord into a functional 120V AC wall outlet.
5. Verify that the connection is secure at both the charger and the wall outlet.

Important: Do not force connections. If the cord does not fit, ensure it is the correct model for your charger.

Operating Instructions

Charging the Battery

1. After connecting the power cord as described in the "Setup Instructions," the battery charger should indicate that it is receiving power (e.g., via an indicator light).
2. Follow the specific charging instructions provided with your Invacare Reliant Patient Lift battery charger. The AlveyTech power cord facilitates the power supply to the charger; it does not control the charging process itself.
3. Allow the battery to charge for the recommended duration as specified by the lift manufacturer.

Caution: Always use the power cord in a dry environment. Avoid exposing the cord or charger to moisture.

Maintenance

General Care

- Regularly inspect the power cord for any signs of damage, such as cuts, fraying, or bent pins.
- If any damage is observed, discontinue use immediately and replace the cord with an authorized AlveyTech replacement.
- Keep the cord clean and free from dust and debris. Wipe with a dry cloth if necessary.
- Store the cord in a cool, dry place when not in use, avoiding sharp bends or kinks.

Warning: Do not attempt to repair a damaged power cord. This can pose a safety hazard.

Troubleshooting

Problem	Possible Cause	Solution
Charger not receiving power	Power cord not fully connected	Ensure both ends of the power cord are securely plugged in.
	Wall outlet is not functional	Test the wall outlet with another device.
	Damaged power cord	Inspect the cord for visible damage. Replace if damaged.
	Charger malfunction	Consult the Invacare Reliant Patient Lift charger manual or contact Invacare support.

Warranty Information

For warranty details regarding your AlveyTech Battery Charger Power Cord, please refer to the documentation provided at the time of purchase or contact AlveyTech customer support.
