PRODUCT OVERVIEW

The Leebein YMG-820 is a versatile electric spin scrubber designed to simplify various cleaning tasks. It features a powerful motor, an extendable handle for reaching high or low areas, and multiple interchangeable brush heads for different surfaces and cleaning needs.

Main Components:

- **Main Unit:** Contains the motor, battery, and control buttons.
- **Extension Handle:** Allows for adjustable length to clean hard-to-reach areas.
- **Brush Head Connector:** Where different brush heads attach.
- **Charging Port:** Located on the main unit, typically with a waterproof cover.

ASSEMBLY AND SETUP

1. **Charge the Scrubber:** Before first use, fully charge the scrubber. Open the waterproof cover of the charging port and connect the charging cable. The indicator light will show charging status (e.g., red for charging, green for fully charged).
2. **Attach the Extension Handle (Optional):** To extend the reach, align the extension handle with the main unit and twist clockwise until it locks securely. To remove, twist counter-clockwise.
3. **Attach a Brush Head:** Select the appropriate brush head for your cleaning task. Align the brush head with the connector on the main unit (or extension handle) and push firmly until it clicks into place. Ensure it is securely fastened.

OPERATING INSTRUCTIONS

1. **Prepare the Surface:** For best results, pre-wet the surface to be cleaned and apply your preferred cleaning solution directly

to the surface or the brush head.

2. **Power On:** Press the power button on the main unit to turn on the scrubber. The scrubber typically has multiple speed settings. Press the power button again to cycle through speeds or turn off.
3. **Begin Cleaning:** Gently press the rotating brush head against the surface. Allow the scrubber's rotation to do the work; avoid applying excessive pressure, which can slow down the motor.
4. **Adjust Angle:** The scrubber head can often be adjusted to different angles for ergonomic cleaning. Refer to the product's physical design for specific angle adjustment mechanisms.
5. **Power Off:** After cleaning, press the power button to turn off the scrubber.

BRUSH HEAD USAGE GUIDE

CHARGING THE SCRUBBER

To ensure optimal performance, fully charge the scrubber before each extended use or when the battery indicator shows low power.

1. Locate the charging port on the main unit. It is typically covered by a waterproof silicone plug.
2. Carefully open the waterproof plug.
3. Insert the small end of the provided charging cable into the scrubber's charging port.
4. Connect the USB end of the charging cable to a compatible USB power adapter (not included) or a USB port on a computer.
5. The indicator light will illuminate (e.g., red) to show that charging is in progress.
6. Once fully charged, the indicator light will change color (e.g., green) or turn off.
7. Disconnect the charging cable and securely close the waterproof plug to prevent water ingress during use.

Note: Do not operate the scrubber while it is charging.

MAINTENANCE AND CLEANING

Cleaning the Brush Heads:

- After each use, remove the brush head from the scrubber.
- Rinse the brush head thoroughly under running water to remove dirt and cleaning solution residue.
- For stubborn grime, use a mild soap and water to clean the bristles.
- Allow the brush heads to air dry completely before storing.

Cleaning the Main Unit:

- Wipe the main unit and extension handle with a damp cloth.
- Do not submerge the main unit in water or rinse it directly under a tap.
- Ensure the charging port cover is securely closed before cleaning the main unit.
- Do not use abrasive cleaners or solvents, as they may damage the surface.

STORAGE

- Store the Leebein YMG-820 Electric Spin Scrubber in a cool, dry place away from direct sunlight and extreme temperatures.
- Ensure the device is clean and dry before storage.
- Keep all brush heads and accessories together to prevent loss.
