# WILDGAME INNOVATIONS eDRENALINE 6V/12V Battery Charger Instruction Manual

Model: WGI-WGIBC0005

## INTRODUCTION

The Wildgame Innovations eDRENALINE 6V/12V Battery Charger is designed to efficiently charge sealed lead-acid rechargeable batteries. This compact and powerful charger features an adjustable voltage switch and a charge status light indicator, making it a reliable accessory for maintaining your outdoor equipment's power needs.

## SAFETY INFORMATION

### Caution:

- Charge only Sealed Lead Acid type rechargeable batteries.
- Other types of batteries may burst, causing personal injury or damage.
- Ensure proper voltage selection (6V or 12V) to prevent battery damage.

## PRODUCT OVERVIEW

The eDRENALINE Battery Charger is a robust unit designed for durability and ease of use. It includes:

- Adjustable voltage switch (6V or 12V)
- Charge status light indicator
- Large alligator clips with protective boot covers
- 4.5-foot long power cord

Image: The Wildgame Innovations eDRENALINE 6V/12V Battery Charger, showing the main unit with its power plug, coiled cord, and red and black alligator clips. The label on the charger indicates its voltage and model information.

## SETUP AND OPERATING INSTRUCTIONS

### 1. Determine Voltage:

Identify the correct output voltage (6V or 12V) required for the rechargeable battery you intend to charge. Refer to your

battery's specifications.

## 2. Set Voltage Switch:

Locate the selector switch on the AC adapter and set it to the appropriate voltage (either 6V or 12V) to match your battery. Incorrect voltage selection can damage the battery.

## 3. Connect to Battery:

First, connect the red (positive) alligator clip from the charger to the corresponding positive terminal on your battery. Then, connect the black (negative) alligator clip to the negative terminal on the battery. Ensure a secure connection.

## 4. Connect to Power Source:

Once the alligator clips are securely connected to the battery, plug the AC adapter into a standard 110-volt power source. The charging process will begin.

## 5. Monitor Charge Status:

Observe the charge indicator light on the charger:

- **Red Light:** Indicates the battery is low and charging.
- **Green Light:** Indicates the battery is fully charged.

The charge time will vary depending on the battery's current charge level and capacity. Use brand new batteries for better efficiency.

## MAINTENANCE

To ensure the charger provides a consistent and effective charge over time, regular maintenance is recommended:

- Keep the alligator clips clean and free of any dirt, corrosion, or build-up. Accumulation on the clips can interfere with proper charging.
- Store the charger in a dry, cool place when not in use.

## TROUBLESHOOTING

If the charger light does not turn green after an appropriate charging period, or if the battery does not seem to be charging:

- Verify that the voltage switch on the charger is set correctly (6V or 12V) for your battery type.
- Ensure the alligator clips are securely and correctly connected to the positive (red) and negative (black) terminals of the battery.
- Check the power outlet to confirm it is functioning correctly.
- Inspect the alligator clips for any build-up or corrosion and clean them if necessary.
- If the battery is in poor condition, it may not accept a charge or may take significantly longer. Consider testing the battery with another device or replacing it if it's old or damaged.

## SPECIFICATIONS

Feature	Detail
Model Number	WGI-WGIBC0005

Brand	Wildgame Innovations
Input Voltage	110 Volts AC (for power source)
Output Voltage	6 Volts DC / 12 Volts DC (selectable)
Output Current	1.0 Amp
Product Dimensions	2.4"D x 4"W x 8.8"H
Item Weight	4.2 ounces
Cord Length	4.5 feet
Compatibility	Sealed Lead Acid rechargeable batteries (6V or 12V)

## WARRANTY INFORMATION

This product comes with a 1-year warranty. Please note that this warranty DOES NOT COVER damage, expense, or injury caused by unauthorized repairs, alterations, improper connection, shipping, neglect, or collateral loss.

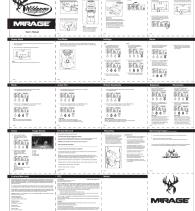

## SUPPORT

For further assistance or inquiries regarding your Wildgame Innovations eDRENALINE Battery Charger, please refer to the manufacturer's official website or contact their customer support directly. Keep your product model number (WGI-WGIBC0005) handy for quicker service.
