

## Arwibon Q06Pro

# Arwibon Q06Pro Electric Scooter User Manual

Model: Q06Pro

## 1. INTRODUCTION

---

This manual provides essential information for the safe operation, maintenance, and troubleshooting of your Arwibon Q06Pro Electric Scooter. Please read this manual thoroughly before operating the scooter to ensure proper use and to prevent damage or injury.

The Arwibon Q06Pro is a high-performance electric scooter designed for adult use, featuring a powerful 5600W dual motor system, long-range battery, and robust off-road capabilities.

## 2. SAFETY INFORMATION

---

**WARNING: Failure to follow these safety instructions could result in serious injury or death.**

- Always wear a helmet and appropriate safety gear (knee pads, elbow pads, gloves) when riding.
- Do not ride in wet conditions, heavy rain, or through puddles.
- Do not exceed the maximum weight limit of 550 lbs (250 kg).
- Ensure all bolts and quick releases are securely tightened before each ride.
- Familiarize yourself with local laws and regulations regarding electric scooter use.
- Avoid riding on steep slopes exceeding 35 degrees.
- Do not perform stunts or aggressive maneuvers.
- Keep fingers and hair away from moving parts.
- Charge the battery only with the provided chargers in a well-ventilated area.

## 3. PACKAGE CONTENTS

---

Verify that all items are present in the package:

- Arwibon Q06Pro Electric Scooter
- 2 x Chargers

- 2 x Pairs of Spare Brake Pads
- User Manual (this document)

## 4. SETUP AND ASSEMBLY

---

The Arwibon Q06Pro is designed for quick and easy assembly. Follow these steps:

1. **Unfolding the Scooter:** Carefully lift the handlebar stem until it locks into the upright position. Ensure the folding mechanism is securely latched.
2. **Handlebar Installation:** Attach the handlebars to the stem, ensuring they are aligned and tightened securely.
3. **Initial Charge:** Before first use, fully charge the scooter's battery. Connect the chargers to the charging ports and then to a power outlet. The charging time is approximately 7 hours for a full charge.

## 5. OPERATING INSTRUCTIONS

---

### 5.1 Powering On/Off

To power on the scooter, press and hold the power button on the display. To power off, press and hold the power button again until the display turns off.

### 5.2 Riding the Scooter

- **Starting:** Place one foot on the deck and push off with the other foot to gain initial momentum. Once moving, gently press the accelerator lever.
- **Acceleration:** The Q06Pro features a responsive accelerator. Gradually increase pressure for smooth acceleration. The 5600W dual motor allows for speeds up to 40 MPH.
- **Braking:** The scooter is equipped with dual oil brakes. Apply both brake levers simultaneously for effective and safe stopping.
- **Headlights:** The scooter has dual ultra-bright front LED headlights for improved visibility, especially at night. Activate them via the control panel.

## 6. MAINTENANCE

### 6.1 Battery Care

- Charge the battery regularly, even if the scooter is not in use, to maintain battery health.
- Avoid completely draining the battery before recharging.
- Store the scooter in a cool, dry place when not in use.
- Use only the original chargers provided.

Image 6.1: The Arwibon Q06Pro's deck with vibrant lighting, indicating the location of the dual charging ports for efficient power replenishment.

## 6.2 Tire Care

The 11-inch heavy-duty vacuum off-road tires require regular inspection.

- Check tire pressure regularly and inflate to the recommended PSI (refer to tire sidewall for details).
- Inspect tires for wear, cuts, or punctures before each ride.

## 6.3 Brake System

The dual oil brake system is crucial for safety.

- Regularly check brake pad wear. Replace pads when they are worn down (spare pads are included).
- Ensure brake levers provide firm and consistent braking action. If braking feels spongy, professional service may be required.

## 6.4 General Cleaning

Clean the scooter with a damp cloth. Do not use high-pressure water jets or immerse the scooter in water.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Scooter does not power on.	Low battery; Loose connections.	Charge the battery fully; Check all cable connections.
Reduced range or power.	Battery degradation; Under-inflated tires.	Ensure full charge; Check and inflate tires to correct pressure.
Brakes feel weak.	Worn brake pads; Air in hydraulic system.	Replace brake pads; Seek professional service for brake bleeding.

Problem	Possible Cause	Solution
Unusual noises during operation.	Loose components; Debris in wheels/motor.	Inspect all fasteners; Clean wheels and motor area.

If you encounter issues not listed here or if solutions do not resolve the problem, please contact customer support.

## 8. SPECIFICATIONS
