5. Installation

The Silonn Electric Fireplace offers two primary installation methods: wall-mounted and recessed. Choose the method that best suits your space and aesthetic preferences.

Ensure the wall material is suitable for supporting the weight of the fireplace. Use appropriate mounting hardware (included in the tool set) and follow the detailed instructions provided in the separate installation guide for secure attachment.

5.2 Recessed Installation

For a seamless, built-in look, the fireplace can be recessed into a wall cavity. This method requires proper framing within the wall. Refer to the table below for recommended framing dimensions:

Fireplace Size	Required Framing Width	Required Framing Height	Required Framing Depth
60 inches	57.1" (1452mm)	16.5" (420mm)	4.7" (120mm)
