Klipsch CORE 100 + SUB 100

Klipsch Flexus Sound System: CORE 100 + SUB 100 User Manual

Model: CORE 100 + SUB 100 | Brand: Klipsch

INTRODUCTION

The Klipsch Flexus Core 100 Sound System, powered by Onkyo, is designed to enhance your home entertainment experience. This 2.1-channel sound bar and subwoofer system provides exceptional acoustics and features proprietary Klipsch Transport technology, serving as a foundational component for a comprehensive home audio setup.

PACKAGE CONTENTS

Before you begin, ensure all components are present:

- Klipsch Flexus CORE 100 Sound Bar
- Klipsch Flexus SUB 100 Subwoofer
- Power Cables
- Remote Control
- HDMI Cable

SETUP

1. Placement

Position the CORE 100 Sound Bar centrally below your television. The SUB 100 Subwoofer can be placed anywhere in the room, ideally near a wall or corner for optimal bass performance. Ensure both units have adequate ventilation.

Image: A Klipsch Flexus Sound Bar positioned on a media console beneath a television, with the subwoofer placed on the floor to the left. This illustrates a typical setup for home entertainment.

2. Connections

Connect the sound bar to your television using one of the following methods:

1. **HDMI eARC:** For the best audio quality and control, connect an HDMI cable from the HDMI eARC port on the sound bar to the HDMI eARC/ARC port on your TV.
2. **Digital Optical:** If your TV does not have an HDMI eARC/ARC port, connect an optical cable from the sound bar's optical input to your TV's optical output.
3. **USB:** For direct audio playback from a USB device.

Connect the power cables to both the sound bar and the subwoofer, then plug them into a wall outlet.

3. Subwoofer Pairing

The Flexus SUB 100 Subwoofer is pre-paired with the CORE 100 Sound Bar for easy setup. Once both units are powered on, they should automatically connect. If connection issues occur, refer to the troubleshooting section.

OPERATING INSTRUCTIONS

Power On/Off

Press the power button on the sound bar or the remote control to turn the system on or off.

Input Selection

Use the input button on the remote or sound bar to cycle through available inputs (HDMI eARC, Optical, Bluetooth, USB).

Volume Control

Adjust the volume using the volume up/down buttons on the remote or sound bar.

Bluetooth Connectivity

To pair a Bluetooth device:

1. Press the Bluetooth button on the remote or sound bar. The indicator light will flash.
2. Enable Bluetooth on your device and select "Klipsch Flexus CORE 100" from the list of available devices.
3. Once connected, the indicator light will become solid.

Dolby Atmos Processing

The Flexus Core 100 features Dolby Atmos processing technology, providing immersive, multidimensional sound for compatible content. Ensure your source device and content support Dolby Atmos for the full experience.

Klipsch Connect Plus App Control

For advanced control and customization, download the Klipsch Connect Plus App. The app allows you to:

- Access EQ presets or create custom EQ mixes.
- Activate Night Mode.
- Enable Dialogue Boost.
- Control volume and input selection.
- Manage additional Flexus components (e.g., surround speakers) if added.

MAINTENANCE

To ensure the longevity and optimal performance of your Klipsch Flexus Sound System:

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the sound bar and subwoofer. Avoid abrasive cleaners or solvents.
- **Ventilation:** Ensure proper airflow around both units to prevent overheating. Do not block ventilation openings.

- **Environment:** Keep the system away from direct sunlight, heat sources, excessive dust, moisture, and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound from sound bar	Incorrect input selected; cables not connected properly; TV audio output settings incorrect.	Verify input selection. Check all cable connections (HDMI, Optical). Ensure TV audio output is set to external speakers or PCM.
No sound from subwoofer	Subwoofer not powered on; not paired with sound bar; volume too low.	Ensure subwoofer is plugged in and powered on. If not automatically paired, refer to the manual for manual pairing instructions (usually involves pressing a pair button on both units). Increase subwoofer volume level.
Bluetooth pairing issues	Device too far; sound bar not in pairing mode; interference.	Ensure device is within range. Put sound bar into pairing mode. Turn off other Bluetooth devices nearby.
Remote control not working	Dead batteries; obstruction; remote sensor blocked.	Replace batteries. Remove any obstructions between remote and sound bar. Ensure remote sensor on sound bar is not blocked.

SPECIFICATIONS

Feature	Detail
Model Name	Flexus CORE 100, SUB 100
