IETS GT600

IETS GT600 Filter Cotton Set Instruction Manual

Model: GT600

Introduction

This manual provides comprehensive instructions for the IETS GT600 dust Filter Cotton Set. This set is designed to maintain the optimal performance of your IETS GT600 series laptop cooler by effectively filtering dust. It includes one black filter-cotton and three white dust cloths, each serving a specific purpose in dust prevention and system maintenance.

Package Contents

- 1 x Black Filter-Cotton
- 3 x White Dust Cloths

Compatibility

This filter cotton set is exclusively designed for and compatible with IETS GT600 series laptop cooling pads. Ensure your device is an IETS GT600 series model before installation.

Setup and Installation

To install the filter cotton, locate the intake grille on your IETS GT600 series laptop cooler. The design allows for easy disassembly and assembly. Carefully place the filter cotton into the designated slot beneath the intake grille. Ensure it is seated properly to prevent dust from entering the cooling system.

The image illustrates the simple process of detaching and attaching the filter cotton to the GT600 series product. The intake grille is visible, highlighting the area where the filter is placed for effective dust filtration.

Operating Principles

The IETS GT600 filter cotton set works by preventing dust and other particulate matter from entering the laptop cooler's internal components. The bottom intake design of the GT600 series, combined with these filters, also helps prevent hot air backflow, ensuring that only cool, filtered air is drawn into the system for efficient cooling.

Maintenance

Regular maintenance of your filter cotton set is crucial for sustained performance of your IETS GT600 series cooler.

Black Filter-Cotton

- The black filter-cotton is designed for repeated use.
- It is detachable and washable. To clean, remove the filter, gently wash it with water, and allow it to air dry completely before reinstallation.

White Dust Cloths

- The white dust cloths are disposable and recommended for replacement.
- It is recommended to replace the white dust cloth every 2 to 6 months, depending on usage and environmental dust levels.

A detailed view of one of the filter components, likely the black filter-cotton, showcasing its texture and design for effective dust capture.

Troubleshooting

If you experience reduced airflow or increased dust accumulation within your GT600 series cooler, consider the following:

- **Incorrect Installation:** Ensure the filter cotton is correctly seated and not obstructing the airflow.
- **Clogged Filters:** Check if the black filter-cotton is dirty and requires cleaning, or if the white dust cloth needs replacement.
- **Environmental Factors:** High dust environments may require more frequent cleaning or replacement of filters.

Specifications

Brand Name	IETS
Model Name	GT600
Manufacturer Part Number	RN-1GXS-6IHW
Material Type	Sponge
Color	Black (filter-cotton) / White (dust cloth)
Number of Layers	4
Item Weight	0.01 Kilograms (approx. for the set)
Package Dimensions	7.87 x 7.76 x 2.24 inches

Warranty Information
