# Domi 14'x24' Outdoor Hardtop Gazebo Instruction Manual

Model: 14'x24'-double roof

## INTRODUCTION

---

Thank you for choosing the Domi 14'x24' Outdoor Hardtop Gazebo. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

This spacious gazebo measures 24' L x 14' W x 10.5' H, offering 336 square feet of coverage. It features a durable powder-coated aluminum frame, a galvanized steel double roof, and includes both mosquito netting and privacy curtains. The design incorporates a water gutter system for efficient drainage and is built to withstand various weather conditions.

## SAFETY INFORMATION

---

Always prioritize safety during assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- **Secure Foundation:** Always secure the gazebo to a stable foundation using the pre-drilled bases on each leg. Proper anchoring is crucial for stability, especially in windy conditions.
- **Weight Limits:** Be cautious when using hooks to hang items. Ensure they do not exceed the weight limit of 20 LBS per hook. Overloading can compromise the structural integrity.
- **Fire Safety:** Keep the area around the gazebo clear of flammable materials when using lights, heaters, or other heat sources. Maintain adequate clearance from open flames.
- **Weather Conditions:** While designed for various weather, extreme conditions like heavy snow accumulation or severe winds may require additional precautions or temporary disassembly. Monitor local weather forecasts.
- **Assembly Personnel:** Assembly typically requires at least two to three adults. Do not attempt to

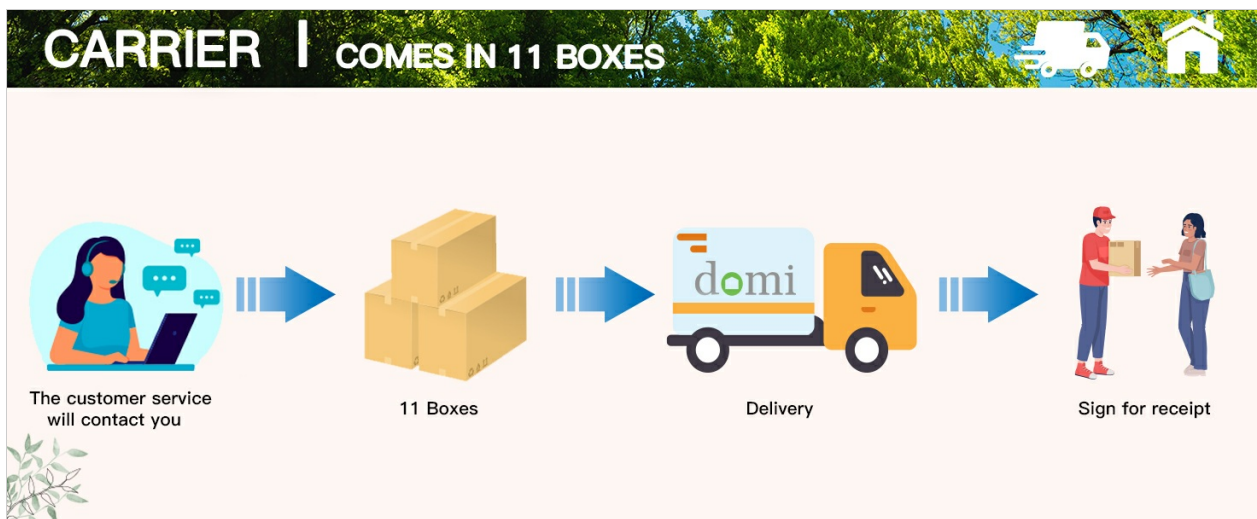

assemble alone.

## SETUP AND ASSEMBLY

Assembly of the Domi Hardtop Gazebo requires careful attention to detail and multiple individuals. It is recommended to allocate sufficient time for this process.

### 1. Unpacking and Inventory

The gazebo typically arrives in multiple heavy boxes (e.g., 11 boxes). Upon receipt, carefully unpack all components. Before starting assembly, perform a complete inventory of all parts against the provided parts list in the instruction manual. Check for any hidden dents or dings on longer braces and legs. If any parts are missing or damaged, contact customer service immediately.

### 2. Frame Assembly

Begin by assembling the main aluminum frame. The frame is constructed from powder-coated aluminum, designed for durability and rust resistance. Ensure all connections are aligned correctly.

**Important Tip:** Leave all bolts and nuts loose during the initial stages of frame assembly. This allows for flexibility to align parts. Only tighten them securely once the entire section or frame is fully assembled and aligned. The only exception may be the bolts connecting legs to the top plate, which might be difficult to reach later.

### 3. Column Installation

The gazebo features sturdy 4.72"x4.72" aluminum stand poles. These provide superior stability compared to thinner columns found in other gazebos.

# Superior Column Thickness Compared to Others

All-aluminum 4.7-inch column

*Image: A visual comparison demonstrating the superior thickness of the Domi gazebo's 4.72-inch aluminum columns against thinner alternatives.*

## 4. Roof Panel Installation

The roof consists of galvanized steel double-layer panels. Install these panels systematically. It is often easier to tighten roof panels as you go, rather than waiting until the entire roof structure is in place, especially for trailing edges near corners.

# Double Roof-Gutter Design

Classic Design

Enhance Air Circulation

Anti-UV

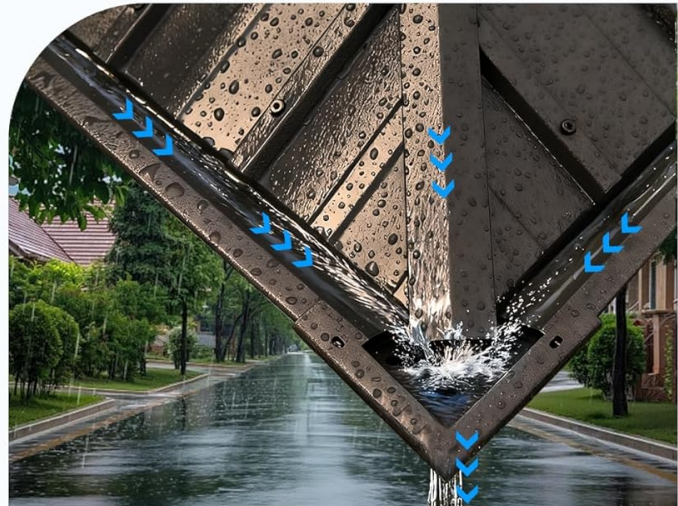

High-Efficiency Drainage

Suitable for Rainy

Easy to Clean

*Image: The double-layer roof design with integrated gutter system, illustrating efficient water drainage.* After installing roof panels, inspect for any gaps or areas where daylight is visible. Apply the provided high-quality silicone sealant to these areas to ensure waterproof integrity. Also, consider applying sealant where panels meet cross members.

## 5. Curtains and Netting

The gazebo includes both mosquito netting and privacy curtains. The curtains are typically zipped together in sections (e.g., four long pieces and two short pieces for a 12x18 model). The main curtains attach to the outside track, while the mosquito netting attaches to the inside track.

## OPERATING YOUR GAZEBO

Your Domi Hardtop Gazebo is designed to enhance your outdoor living space with comfort and functionality.

### Ventilation and Sun Protection

The ventilated double-layer roof promotes air circulation, helping to keep the interior cool. The roof also provides anti-UV protection, shielding occupants from harmful sun rays. The privacy curtains can be adjusted to provide additional shade or privacy as needed.

# Dimension of Domi Gazebo

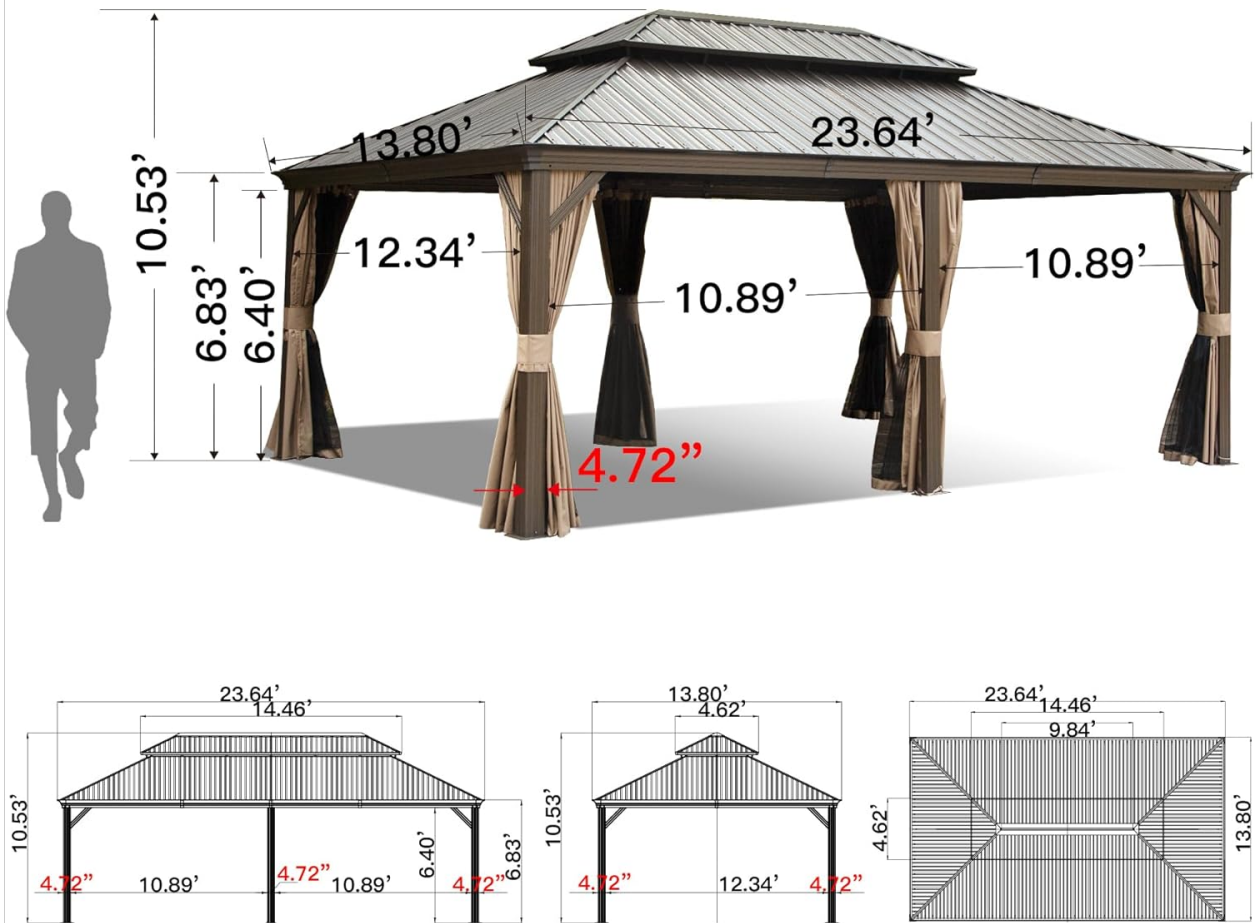

Image: The gazebo shown in various configurations, illustrating its ability to ventilate, act as a screenhouse, and provide sun shade.

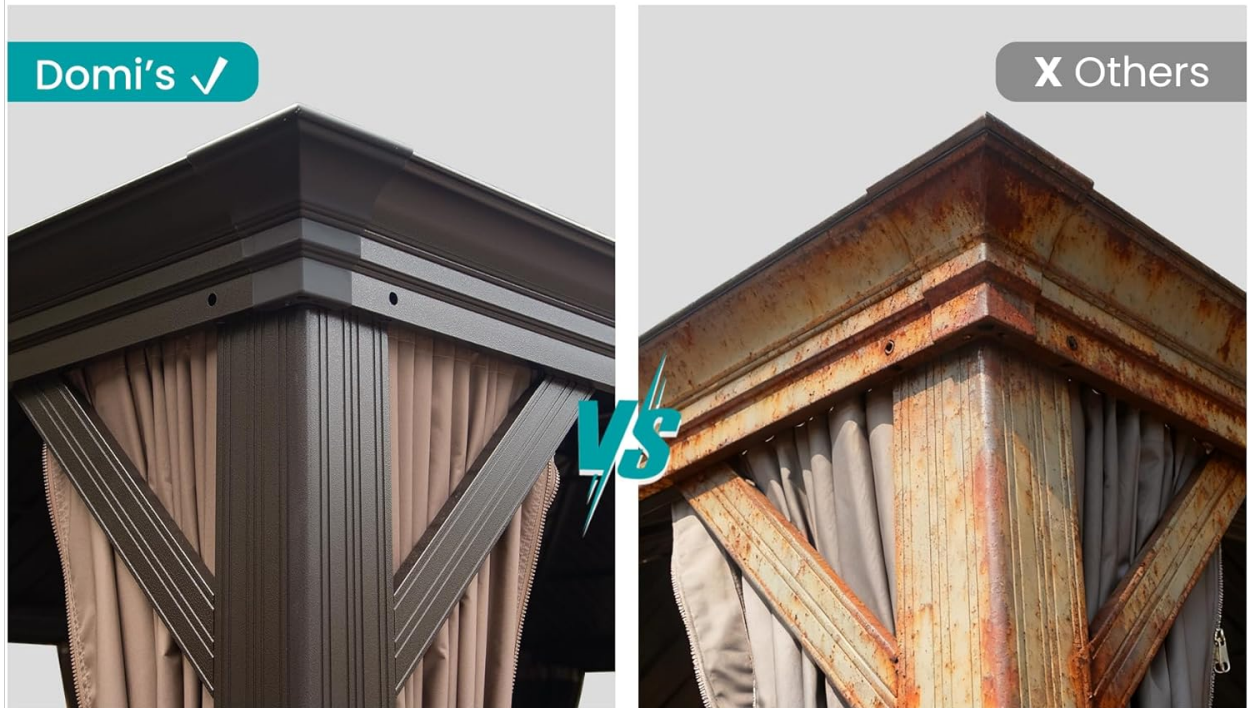

## Insect Protection

Utilize the double-sided zipper mosquito netting to create an enclosed space, protecting against insects while maintaining good ventilation and an open view.

## Accessory Hooks

The gazebo is equipped with ceiling hooks for multifunctionality. These hooks can be used to hang lights, fans, or decorative items, enhancing the ambiance of your outdoor space. Remember to adhere to the 20 LBS weight limit per hook.

# Why Settle for Less? Choose All-Aluminum

## All-Aluminum Structure

100% Rustproof Aluminum

Stronger, Lighter, Longer-Lasting

Low Maintenance – No Peeling or Fading

Built to Withstand Harsh Weather

## Mixed or Steel Materials

✗ Prone to Rust and Corrosion

✗ Heavier and Harder to Install

✗ Paint May Chip or Fade Over Time

✗ Shorter Lifespan in Outdoor Use

## MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your Domi Hardtop Gazebo.

- **Frame Cleaning:** The powder-coated aluminum frame is resistant to fading, rust, and corrosion. Clean the frame periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Roof Cleaning:** The galvanized steel roof is designed for durability. Clean the roof panels as needed to remove leaves, debris, or dirt. The sloped design and water gutter system facilitate easy cleaning and prevent water accumulation.
- **Curtains and Netting:** The mosquito netting and privacy curtains can be cleaned according to their fabric care instructions, typically with mild soap and water. Ensure they are completely dry before storing or zipping up for extended periods to prevent mildew.
- **Fastener Check:** Periodically check all bolts and nuts to ensure they remain tight. Re-tighten any loose fasteners to maintain structural integrity.
- **Winter Care:** In areas with heavy snowfall, it is recommended to clear snow from the roof to prevent

excessive weight accumulation, although the gazebo is designed to withstand significant snow loads (up to 2500 LBS).

## TROUBLESHOOTING

This section addresses common issues that may arise during assembly or use.

- **Missing or Damaged Parts:** If you discover missing or damaged components upon unboxing, contact Domi customer service immediately for replacements.
- **Difficulty Aligning Parts:** During assembly, ensure all bolts are kept loose until a section is fully assembled. This flexibility allows for easier alignment of holes. Once aligned, then tighten all fasteners.
- **Roof Leaks:** If leaks occur after assembly, re-inspect the roof panels for any gaps. Apply additional silicone sealant to any visible openings or seams where water might penetrate. Ensure the gutter system is clear of debris.
- **Wobbly Structure:** A wobbly gazebo often indicates loose fasteners. Re-check and tighten all bolts and nuts throughout the frame. Ensure the gazebo is securely anchored to a stable, level surface.
- **Curtain/Netting Snags:** Ensure the tracks for the curtains and netting are clear of obstructions. Lubricate zippers if they become stiff.

## SPECIFICATIONS

Feature	Detail
Brand	domi outdoor living
Model	14'x24'-double roof
Material	Aluminum Frame, Galvanized Steel Roof
Style	Modern, Classic
Product Dimensions (L x W x H)	283.68" x 165.6" x 126.36" (14'x24' footprint)
Item Weight	574 Pounds
Frame Material	Aluminum
Water Resistance Level	Waterproof
Shape	Rectangular
Ultraviolet Light Protection	Anti-UV
Assembly Required	Yes
Wind Rating	Up to 40 MPH
Snow Load Capacity	Up to 2500 LBS

Ventilate

Screenhouse
