5. Maintenance

Proper maintenance will help keep your nanoblock model in excellent condition.

- **Cleaning:** To remove dust, gently wipe the model with a soft, dry cloth or use a soft brush. Avoid using abrasive cleaners or harsh chemicals, as these can damage the plastic.
- **Storage:** If disassembling or storing the model, keep all blocks in a sealed container or bag to prevent loss of the small pieces.
- **Avoid Extreme Conditions:** Do not expose the model to extreme temperatures or prolonged direct sunlight, which can cause discoloration or warping of the plastic.

6. Troubleshooting

While nanoblock kits are generally straightforward, you might encounter minor issues during assembly.

- **Missing Pieces:** If you believe you have missing pieces, carefully re-check the packaging and your work area. Due to their small size, blocks can be easily overlooked. If pieces are genuinely missing, please refer to the "Warranty and Support" section for contact information.
- **Difficulty with Assembly:** If a step seems unclear or difficult, re-examine the instruction booklet carefully. Sometimes rotating the model or viewing the illustration from a different angle can help clarify the placement of blocks.
- **Loose Connections:** Ensure each block is pressed firmly into place. While nanoblocks are designed for a tight fit, insufficient pressure can lead to loose connections.
