### 5.2 Bit Care

Keep the double-ended bits clean and free of debris. Store them securely in the magnetic cap when not in use to prevent loss and maintain their condition.

To prolong battery life, avoid fully discharging the battery frequently. Store the screwdriver in a cool, dry place away from direct sunlight and extreme temperatures. Recharge the battery periodically if the device is not used for extended periods.

## 6. TROUBLESHOOTING

- **Device not turning on:** Ensure the battery is charged. Connect to a USB-C power source and check if the charging indicator lights up.
- **Screwdriver not driving screws:** Verify that the bit is correctly inserted and that you are pressing the appropriate directional button. For stubborn screws, apply manual force once the motor locks.

- **Bits falling out:** Ensure the bit is fully inserted into the magnetic chuck. If the issue persists, inspect the chuck for any obstructions or damage.
- **LED light not working:** The LED light activates automatically when the motor is running. If it does not light up, ensure the device is powered on and the motor is engaged.
