

Biorunn 8-Core, 8GB+256GB

Biorunn Android Car Stereo Instruction Manual

Model: 8-Core, 8GB+256GB for Toyota Prius XW50 (2015-2020)

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, maintenance, and troubleshooting of your Biorunn Android Car Stereo. Please read this manual thoroughly before using the product to ensure proper function and safety. Keep this manual for future reference.

2. PRODUCT OVERVIEW

The Biorunn Android Car Stereo is an advanced in-dash navigation and multimedia system designed for the Toyota Prius XW50 (2015-2020). It features a 9-inch IPS touchscreen display, an 8-core processor, 8GB RAM, and 256GB ROM, providing a responsive and powerful user experience. Key features include:

- Built-in Wireless Car-Play and Android Auto for seamless smartphone integration.
- Bluetooth 5.0 for hands-free calling and audio streaming.
- Integrated GPS navigation with support for various map applications.
- Digital Sound Processor (DSP) for enhanced audio quality.
- FM/AM radio with RDS functionality.
- Support for split-screen multitasking.
- Built-in 4G LTE and 5G WiFi connectivity.
- Steering Wheel Control (SWC) compatibility.

3. SETUP

3.1 Installation

Professional installation is highly recommended for this car stereo unit. Incorrect installation can lead to damage to the unit or the vehicle's electrical system. Ensure the vehicle's battery is disconnected before beginning installation.

3.2 Initial Power-On

1. After installation, reconnect the vehicle's battery.
2. Turn on the vehicle's ignition. The stereo unit should power on automatically.
3. Follow the on-screen prompts for initial setup, including language selection and time zone.

3.3 Network Connection (Wi-Fi / 4G LTE)

To access online features, connect the unit to the internet.

- **Wi-Fi:** Go to Settings > Network & Internet > Wi-Fi. Select your desired network and enter the password.
- **4G LTE:** Insert a compatible 4G SIM card into the designated slot on the unit (SIM card not included). The unit will automatically detect and connect to the cellular network.

Built-in 4G Lte and WIFI

The built-in 4G module allows you to connect to the cellular network almost anywhere, anytime. No need to open your cellular hotspot connection every time.

Note: 4G Card is Not included)

4. OPERATING INSTRUCTIONS

4.1 Basic Operation

- **Power On/Off:** The unit typically powers on with the vehicle's ignition. A long press on the power button (if available) may turn the screen off or put the unit into standby.
- **Volume Control:** Adjust volume using the physical knobs/buttons on the unit or steering wheel controls.
- **Touchscreen:** Navigate the interface by tapping, swiping, and pinching on the 9-inch IPS display.

4.2 Wireless Car-Play / Android Auto

This unit supports wireless Car-Play (for iOS devices) and Android Auto (for Android devices).

1. Ensure Bluetooth is enabled on your smartphone and the car stereo.
2. On the car stereo, open the "Car Link" or similar application.
3. Connect your phone to the car stereo via Bluetooth.
4. Once connected, follow the on-screen prompts to initiate Car-Play or Android Auto.
5. For wired connection, connect your phone via a USB cable.

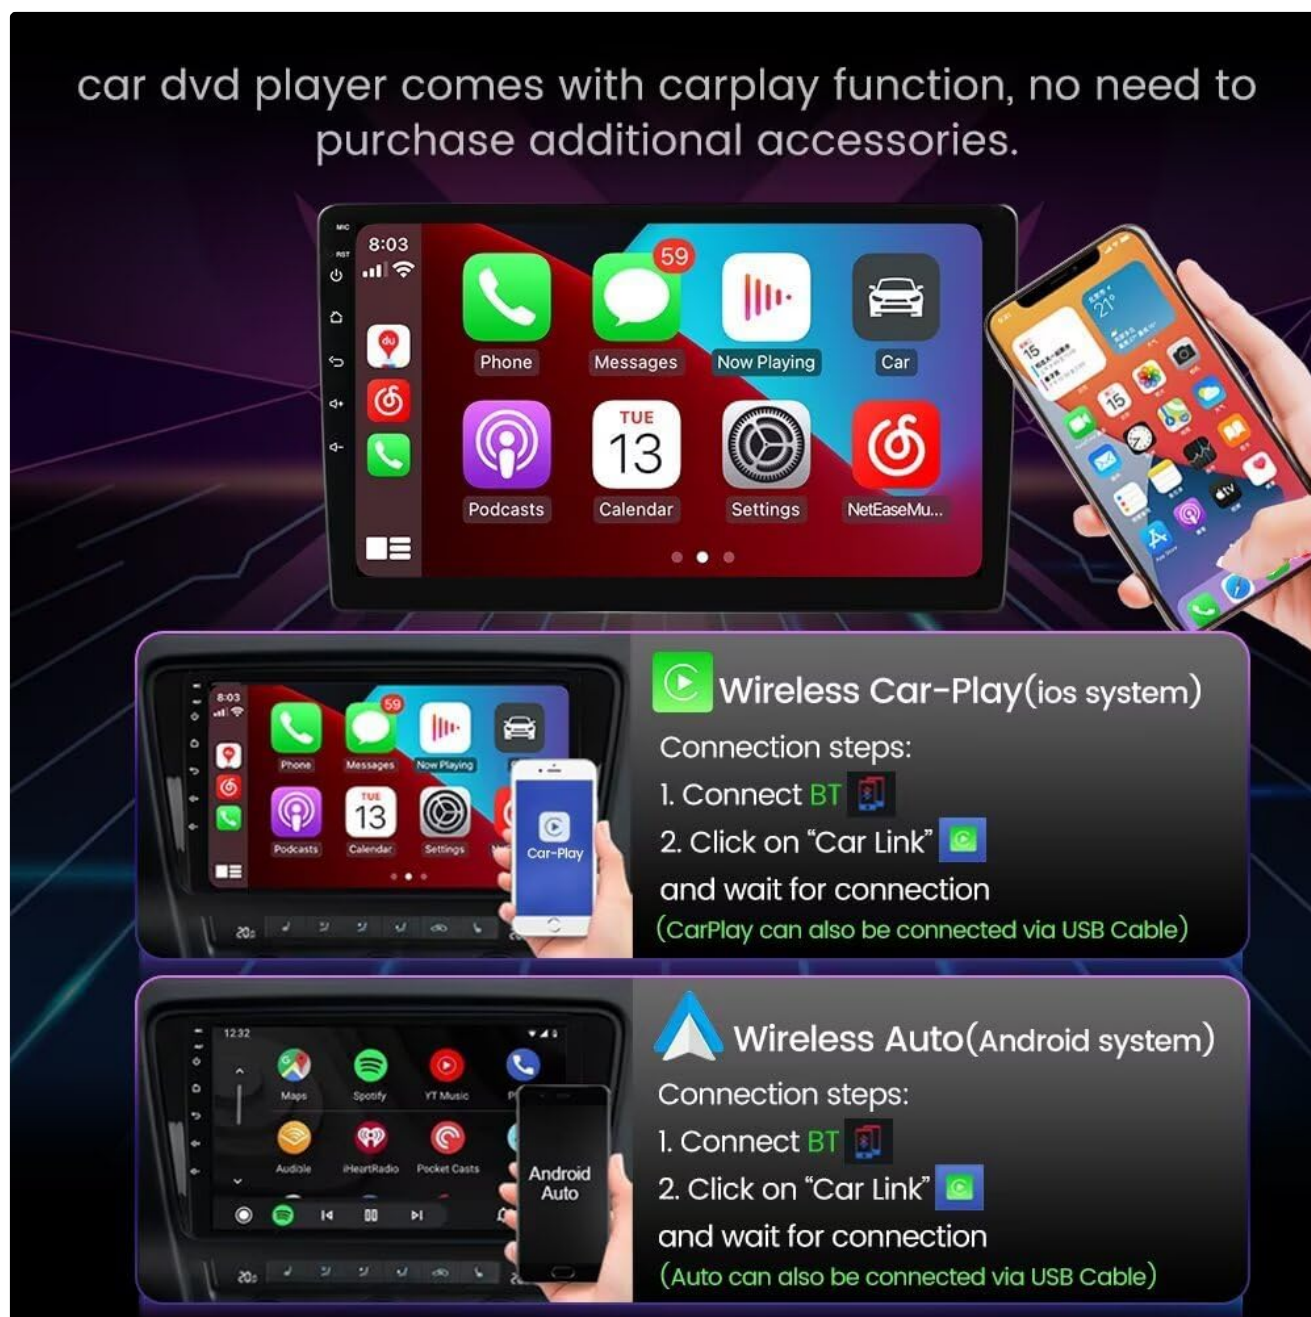

Image: Visual guide showing how to connect an iPhone for Wireless Car-Play and an Android phone for Wireless Android Auto, detailing the Bluetooth and 'Car Link' steps.

4.3 GPS Navigation

The unit features a built-in global positioning system. You can use pre-installed navigation apps or download others from the Google Play Store.

- Open your preferred navigation application from the main menu.
- Enter your destination and follow the voice and on-screen directions.
- The system supports real-time traffic conditions if connected to the internet.

GPS NAVIGATION

Built-in global positioning system, omni-directional map display, synchronous display real-time traffic conditions, rapid and accurate positioning

GPS BDS GLONASS

The following maps are supported

For Navitel

For iGO

For Mapbox

For Google

5. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit exterior. For stubborn smudges, a slightly damp cloth with a mild, non-abrasive cleaner can be used. Avoid harsh chemicals.
- **Software Updates:** Periodically check for software updates via the unit's settings menu (if available) to ensure optimal performance and access to new features. A stable internet connection is required for updates.
- **Temperature:** Avoid exposing the unit to extreme temperatures.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring, blown fuse, vehicle battery issue.	Check power connections and fuses. Ensure vehicle battery is charged. Consult a professional installer.

Problem	Possible Cause	Solution
No sound.	Volume too low, incorrect audio source, speaker wiring issue.	Increase volume. Verify correct audio source. Check speaker connections.
GPS not acquiring signal.	GPS antenna not connected, poor satellite visibility.	Ensure GPS antenna is properly connected and positioned. Move to an open area for better signal reception.
Bluetooth connection issues.	Bluetooth off on device/unit, pairing error.	Ensure Bluetooth is enabled on both devices. Delete previous pairings and re-pair.
Touchscreen unresponsive.	Temporary software glitch.	Restart the unit (turn vehicle ignition off and on). If persistent, contact support.
