# Safety Vital Stun Gun Flashlight User Manual

Model: B0BN28MRN5

## 1. INTRODUCTION

---

This manual provides essential instructions for the safe and effective use of your Safety Vital Stun Gun Flashlight. Please read this manual thoroughly before operating the device and retain it for future reference. This device is designed for personal protection and features a high-voltage stun function and an integrated LED flashlight.

## 2. SAFETY INFORMATION AND WARNINGS

---

- **Legal Restrictions:** Stun guns may be illegal in certain jurisdictions. It is the user's responsibility to understand and comply with all local, state, and federal laws regarding the possession and use of this device.
- **Intended Use:** This device is intended for self-defense purposes only. Misuse may result in serious injury or legal consequences.
- **Keep Out of Reach of Children:** Store the device securely where children cannot access it.
- **Avoid Contact with Sensitive Areas:** Do not apply the stun function to the head, neck, or chest area.
- **Do Not Use on Individuals with Medical Conditions:** Avoid using on individuals with pacemakers, heart conditions, or other serious medical conditions.
- **Water and Moisture:** Do not expose the device to water or extreme moisture.
- **Temperature Extremes:** Avoid storing or using the device in extremely hot or cold environments.
- **Charging:** Use only the provided charging cord. Do not overcharge.
- **Disassembly:** Do not attempt to disassemble or modify the device. This will void the warranty and may cause malfunction or injury.

## 3. PACKAGE CONTENTS

---

Please verify that all items are present in your package:

- Safety Vital Stun Gun Flashlight

- Holster with belt loop
- Charging Cord

## 4. PRODUCT FEATURES

---

- **Compact and Portable Design:** Easily carried in a purse, backpack, or the included holster.
- **Powerful Stun Function:** Delivers a high-voltage shock for effective self-defense.
- **Integrated LED Flashlight:** Provides illumination in dark environments.
- **Grab Guard Stun Strips:** Side shock strips deter attempts to snatch the device.
- **Double Safety Switch:** Prevents accidental activation of the stun function.
- **Rechargeable Battery:** Convenient and cost-effective power source.

## 5. SETUP AND CHARGING

---

### 5.1 Initial Charge

Before first use, fully charge the stun gun for approximately 8-10 hours. Subsequent charges typically take 4-6 hours. Do not overcharge the device, as this can reduce battery life.

1. Ensure the safety switch is in the "OFF" position.
2. Locate the charging port on the device.
3. Connect the provided charging cord to the device and a standard wall outlet (or appropriate USB power source).
4. A charging indicator light (if present) will illuminate during charging and may change color or turn off when fully charged.
5. Once charging is complete, disconnect the cord.

### 5.2 Familiarizing with Controls

Identify the following components on your device:

- **Stun Electrodes:** Two metal prongs at the top of the device.
- **LED Flashlight:** Located near the stun electrodes.
- **Safety Switch:** A sliding switch, typically with "ON" and "OFF" positions, often combined with flashlight activation.
- **Stun Activation Button:** A separate button that, when pressed with the safety switch in the correct position, activates the stun function.
- **Charging Port:** Where the charging cord connects.

## 6. OPERATING INSTRUCTIONS

---

### 6.1 Using the LED Flashlight

1. Slide the safety switch to the first "ON" position (often indicated by a flashlight icon or a single click).
2. The LED flashlight will illuminate.
3. To turn off the flashlight, slide the safety switch back to the "OFF" position.

### 6.2 Activating the Stun Function

The device features a double safety mechanism to prevent accidental discharge.

1. Slide the safety switch to the second "ON" position (often indicated by a stun icon or a second click past the flashlight position). This arms the stun function.
2. While the safety switch is in the stun-ready position, press and hold the separate stun activation button.
3. A loud crackling sound and visible electrical arc will be produced between the stun electrodes.
4. To cease the stun function, release the stun activation button and slide the safety switch back to the "OFF" position.

Figure 2: Front view of the stun gun, highlighting the stun electrodes and LED flashlight.

### 6.3 Using the Grab Guard Stun Strips

The side panels of the stun gun are equipped with "Grab Guard" technology. If an assailant attempts to grab the device from your hand while the stun function is active, these side strips will deliver a shock, providing an additional layer of protection and helping you retain control of the device.

### 6.4 Test Firing

It is recommended to test fire the stun gun periodically (e.g., once a month) to ensure it is functioning correctly and to familiarize yourself with its operation. Perform test firing in a safe, open area, away from people and flammable materials. Ensure the safety switch is in the stun-ready position and press the stun activation button for no more than one second.

## 7. MAINTENANCE

---

- **Cleaning:** Wipe the device with a dry, soft cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the stun gun in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure the safety switch is in the "OFF" position.
- **Battery Care:** To maintain battery health, recharge the device every 1-2 months, even if not used regularly.

## 8. TROUBLESHOOTING

---

- **Device not turning on/charging:**
  - Ensure the charging cord is securely connected to both the device and the power source.
  - Verify the power outlet is functional.
  - Check if the safety switch is in the "OFF" position during charging.

- **Stun function not activating:**
  - Confirm the safety switch is fully in the stun-ready position.
  - Ensure the stun activation button is being pressed firmly.
  - The battery may be low; recharge the device.
- **Flashlight not working:**
  - Ensure the safety switch is in the flashlight "ON" position.
  - The battery may be low; recharge the device.

If you experience issues not covered here, please contact customer support.
