10. Troubleshooting

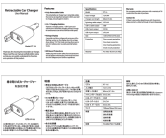

Problem	Possible Cause	Solution
Charger not powering on (no LED light)	Loose connection; vehicle's cigarette lighter socket is off or fused; charger malfunction.	Ensure the charger is firmly inserted. Check if the vehicle's power outlet is active. Inspect vehicle's fuse box for a blown fuse.
Device not charging or charging slowly	Loose cable connection; device not compatible with fast charging; damaged cable; multiple devices drawing too much power.	Ensure cables are securely connected. Verify your device supports fast charging. Try a different cable or port. Reduce the number of devices charging simultaneously.
Charger or device overheating	Overload; poor ventilation; environmental factors.	Disconnect devices and allow the charger to cool. Ensure adequate ventilation around the charger. Avoid charging in direct sunlight or extremely hot environments.
Retractable cable not retracting smoothly	Internal mechanism obstruction or damage.	Gently pull the cable fully out until it clicks, then release. If the issue persists, contact customer support.
