### 3. SETUP AND INSTALLATION

1. **Unpack:** Carefully remove the mattress pad from its packaging. Unroll and lay it flat on your mattress.
2. **Position:** Ensure the mattress pad is centered on your bed. The connection point for the controller should be positioned at the foot of the bed.
3. **Secure Fit:** The built-in skirt is designed to stretch and fit mattresses up to 18 inches deep. Pull the skirt over the corners and sides of your mattress to ensure a snug and secure fit.
4. **Connect Controller(s):** For King-sized pads, there are two controllers. Plug each controller's cord into the corresponding receptacle on the mattress pad. Ensure connections are firm.
5. **Plug In:** Plug the power cord(s) from the controller(s) into a 120V AC electrical outlet. Do not use with extension cords or power strips.

6. **Layer Bedding:** Place your fitted sheet and other bedding over the heated mattress pad.

## 4. OPERATING INSTRUCTIONS

---

The digital controller allows for easy and precise temperature control.

1. **Power On:** Press the Power button ( ) to turn on the mattress pad. The LED display will illuminate.
2. **Adjust Heat Setting:** Use the Up (+) and Down (-) arrow buttons to select your desired heat level from 1 to 12. Level 1 is the lowest heat, and Level 12 is the highest.
3. **Pre-Heat Function:** For optimal warmth, turn on the mattress pad approximately 15-30 minutes before use.
4. **Auto Shut-Off:** The pad features a 12-hour selectable auto shut-off for safety and energy efficiency. The controller remembers your last heat setting for convenience.
5. **LED Display:** The LED display will dim automatically after 10 seconds to minimize light disturbance during the night.

6. **Power Off:** Press the Power button ( ) again to turn off the mattress pad.

## 5. CARE AND MAINTENANCE

---

Proper care will extend the life of your heated mattress pad. Always follow these instructions:

1. **Disconnect:** Before washing, always ensure the mattress pad is unplugged from the wall outlet and the controller(s) are detached from the pad.
2. **Pre-Soak (Optional):** For best results, pre-soak the mattress pad for 5-10 minutes in cool water with a small amount of mild detergent.
3. **Machine Wash:** Wash on the gentle or delicate cycle in a washing machine with cold water. Do not bleach.
4. **Rinse:** Rinse thoroughly on the normal cycle.
5. **Machine Dry:** Tumble dry on low heat or air dry. Ensure the pad is completely dry before reconnecting the controller(s) or storing. Do not iron.
6. **Storage:** When not in use, store the mattress pad neatly folded in a cool, dry place.

## 6. TROUBLESHOOTING

If your heated mattress pad is not operating correctly, please refer to the following table before contacting customer support.

Problem	Possible Cause	Solution
Pad does not heat.	Not plugged in; controller not connected securely; power outage; auto shut-off activated.	Ensure power cord is securely plugged into a working outlet. Check that controller is firmly connected to the pad. Verify power is available. Turn off and on again to reset auto shut-off.
Pad heats unevenly.	Pad is bunched or folded; internal wiring issue.	Ensure the pad is laid flat and smooth on the mattress. If problem persists, contact customer support.
Controller display is off or flashing.	Power issue; internal error.	Unplug the unit from the wall for 5 minutes, then plug back in. If flashing, refer to the specific error code in the full manual (if available) or contact support.
Pad is too hot or not hot enough.	Heat setting is too high/low.	Adjust the heat setting using the + and - buttons on the controller to your preferred comfort level.
