Front Panel Features:

- **6.9-inch Capacitive Touchscreen:** For intuitive control and display of all functions.
- **Rotary Knob:** Typically used for volume control and menu navigation.
- **USB Ports:** For media playback, smartphone connection (CarPlay/Android Auto/Mirror Link), and fast charging.
- **Type-C Port:** Additional port for connectivity and charging.
- **Microphone Input:** For external microphone connection to enhance call quality.

5. INSTALLATION

Proper installation is crucial for the performance and longevity of your car stereo. If you are unsure about any steps, consult a professional installer.

5.1 Wiring Diagram

Refer to the following diagram for connecting the car stereo to your vehicle's electrical system and accessories.

Image: Detailed wiring diagram illustrating connections for the car stereo, power source, and rear-view camera.

Key Connections:

- **Power (Yellow Wire):** Connect to a constant 12V power source (battery positive) to retain settings and memory.
- **Accessory (Red Wire):** Connect to a switched 12V power source (ignition/ACC) that turns on and off with the vehicle.
- **Ground (Black Wire):** Connect to a good chassis ground point.
- **Speaker Wires:** Connect to your vehicle's speakers, ensuring correct polarity for each channel (e.g., Front Left +, Front Left -).
- **Reverse Gear Signal (Pink/Black Wire):** Connect to the vehicle's reverse light positive wire. This enables automatic display of the backup camera when reversing.
- **Rear Camera Video Input (Yellow RCA):** Connect the video output from the rear camera to this input.
- **Steering Wheel Control (Key1/Key2):** Connect to your vehicle's steering wheel control wires (if applicable). Configuration may be required in the unit's settings.
- **External Microphone:** Plug the included microphone into the dedicated 3.5mm jack for improved hands-free call quality.

5.2 Physical Installation

The unit is designed for a standard 1 DIN slot. Ensure there is sufficient space behind the dashboard for the unit and wiring. Secure the unit using the provided mounting hardware.

6. OPERATING INSTRUCTIONS

6.1 Power On/Off

The unit will power on automatically when the vehicle's ignition is turned on. To manually turn off the display, press and hold the power button (if available) or use the system settings.

6.2 Apple CarPlay & Android Auto

Connect your iOS or Android smartphone via a USB cable to enable CarPlay or Android Auto. This allows you to access navigation, music, calls, and other compatible apps directly from the car stereo's touchscreen.

- **Connection:** Use a high-quality USB cable to connect your phone to one of the unit's USB ports.
- **Voice Control:** Activate Siri (for iOS) or Google Assistant (for Android) by pressing the voice control button on the unit or steering wheel (if configured) to make calls, get directions, or play music hands-free.

6.3 Mirror Link

Mirror Link allows you to display your smartphone's screen directly onto the car stereo's 6.9-inch touchscreen. This feature is compatible with both Android and iOS devices via a USB cable.

- **Connection:** Connect your smartphone to the unit via a USB cable.
- **Activation:** Select the "Mirror Link" option on the car stereo's menu. Follow any on-screen prompts on your phone to allow screen mirroring.
- **Display:** The phone's screen content will be mirrored on the car stereo display, including video playback in full screen when the phone is rotated.

6.5 FM Radio

Access local and regional radio stations with the integrated FM tuner.

- **Tuning:** Use the touchscreen controls to scan for stations or manually tune to a specific frequency.
- **Presets:** Save your favorite stations to the 18 available preset slots for quick access.
- **RDS:** The unit supports RDS (Radio Data System) for displaying station information (if available).

6.6 USB/Type-C Media Playback & Charging

The unit features USB and Type-C ports for playing media files and fast charging your devices.

- **Media Playback:** Insert a USB drive with compatible audio or video files into the USB port. The unit will automatically detect and allow playback.
- **Fast Charging:** The USB and Type-C ports provide fast charging capabilities for your smartphone or other compatible devices.

6.7 Backup Camera Function

When the vehicle is shifted into reverse gear, the car stereo automatically displays the rear camera feed, assisting with safe parking and maneuvering.

- **Automatic Activation:** The display switches to the camera view automatically when the reverse gear is engaged (requires correct wiring).
- **Features:** The included camera offers HD resolution, a 170° viewing angle, waterproof design, and night vision capabilities.

6.8 Steering Wheel Control

If your vehicle supports steering wheel controls, you can configure them to operate the car stereo, allowing you to adjust volume, change tracks, and answer calls without taking your hands off the wheel.

- **Connection:** Ensure the Key1/Key2 wires are correctly connected during installation.
- **Configuration:** Access the "Steering Wheel Control" settings in the unit's menu to program the buttons according to your preference.
- **Note:** The included remote control for the steering wheel requires a CR2025 button battery. For optimal performance, ensure the remote is pointed towards the unit.

6.9 Audio Equalizer (EQ)

Customize your audio experience using the built-in equalizer. Adjust bass, treble, and other frequency bands to match your musical preferences and vehicle acoustics. The EQ features noise reduction and enhanced bass amplification.

7. MAINTENANCE

To ensure the longevity and optimal performance of your LSLYA car stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid abrasive materials or harsh chemicals.
- **General Cleaning:** Keep the unit's body and surrounding area free from dust and debris. Use a soft, dry cloth.
- **Avoid Liquids:** Do not spill liquids on the unit. If liquid enters the unit, disconnect power immediately and consult a professional.
- **Temperature Control:** Avoid leaving the unit exposed to extreme heat (e.g., direct sunlight in a parked car) or cold, as this can affect performance and lifespan.

8. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	No power connection; Blown fuse; Incorrect wiring.	Check power cable connections (Yellow, Red, Black). Verify vehicle fuse and unit fuse. Ensure Red (ACC) and Yellow (Battery) wires are correctly connected.
Settings are not saved after turning off the car.	Incorrect power wiring (Yellow and Red wires swapped).	Ensure the Yellow wire is connected to a constant 12V source and the Red wire to a switched 12V (ACC) source. Some vehicles may require swapping these wires.
No sound from speakers.	Speaker wires disconnected; Volume too low; Mute activated; Incorrect audio source.	Check all speaker wire connections. Increase volume. Deactivate mute function. Select the correct audio source (FM, Bluetooth, USB).
Bluetooth connection issues.	Phone not in pairing mode; Unit not discoverable; Interference.	Ensure Bluetooth is enabled on both devices. Delete previous pairings and re-pair. Move closer to the unit.
Backup camera not displaying.	Camera not connected; Reverse trigger wire not connected; Faulty camera.	Check camera video cable connection. Verify the reverse trigger wire (Pink/Black) is connected to the reverse light. Test the camera if possible.

Problem	Possible Cause	Solution
Touchscreen unresponsive or slow.	Software glitch; Screen protector interference; Extreme temperature.	Restart the unit. Ensure no debris or screen protector is interfering. Allow unit to reach normal operating temperature.

If the problem persists after trying these solutions, please contact customer support.
