2. SAFETY INFORMATION

Always adhere to the following safety precautions to prevent personal injury or damage to the appliance.

- **Gas Safety:** Ensure proper ventilation. Do not store flammable materials near the oven. In case of gas leak, turn off gas supply, open windows, and do not operate electrical switches.
- **Electrical Safety:** The oven must be properly grounded. Do not use extension cords. Disconnect power before servicing.
- **Burn Hazard:** Oven surfaces become hot during operation. Use oven mitts when handling hot items. Keep children away from the oven.
- **Installation:** Installation must be performed by a qualified technician in accordance with local codes and regulations.
- **Cleaning:** Always allow the oven to cool before cleaning. Do not use abrasive cleaners or sharp objects.

3. SETUP AND INSTALLATION

This Franke oven is designed for built-in installation. Proper installation is crucial for safety and performance. It is recommended that installation be carried out by a certified professional.

3.1. Pre-Installation Checks

- Verify that the gas supply type (Natural Gas) matches the oven's requirements.
- Ensure the electrical supply (240 Volts) is compatible and properly grounded.
- Confirm cabinet dimensions meet the oven's requirements.

3.2. Dimensions

The oven dimensions are approximately 90 cm (width) x 60 cm (depth) x 60 cm (height). Refer to the diagram below for detailed installation measurements.

3.3. Gas and Electrical Connections

All gas and electrical connections must comply with local building and safety codes. A qualified technician must perform these connections.

4. OPERATING INSTRUCTIONS

Familiarize yourself with the control panel before operating the oven.

4.1. Control Panel

The oven features mechanical controls for temperature, function selection, and a timer.

- **Temperature Knob:** Used to set the desired cooking temperature.
- **Function Selector Knob:** Used to select cooking modes such as Gas Oven, Gas Grill, or Convection.
- **Timer Knob:** Used to set cooking duration or a minute minder. The timer function is available.

4.2. First Use

Before first use, clean the oven interior with a damp cloth. Heat the empty oven at maximum temperature for approximately 30 minutes to burn off any manufacturing residues. Ensure good ventilation during this process.

4.3. Cooking Modes

- **Gas Oven:** Ideal for baking and roasting.
- **Gas Grill:** Suitable for grilling meats and browning dishes.
- **Convection Heating:** Utilizes a fan to circulate hot air, ensuring even cooking and faster results.

4.4. Using the Timer

The integrated timer can be set for a specific cooking duration. Once the set time expires, an audible signal will sound, and the oven may turn off depending on the model's specific timer functionality.

5. CARE AND MAINTENANCE

Regular cleaning and maintenance will prolong the life of your oven and ensure optimal performance.

5.1. Cleaning the Interior

- Allow the oven to cool completely before cleaning.
- Remove oven racks and accessories.
- Wipe spills immediately with a damp cloth. For stubborn stains, use a mild oven cleaner specifically designed for gas ovens, following the product instructions.
- Avoid abrasive pads or harsh chemicals that can damage the oven's interior finish.

5.2. Cleaning the Exterior

The stainless steel exterior can be cleaned with a soft cloth and warm soapy water. For best results, use a stainless steel cleaner and polish, wiping in the direction of the grain. Do not use abrasive cleaners or scouring pads.

5.3. Replacing Oven Light

Ensure the oven is disconnected from the power supply before attempting to replace the oven light bulb. Refer to a qualified technician if unsure.

6. TROUBLESHOOTING

Before contacting service, review the following common issues and their potential solutions.

Problem	Possible Cause	Solution
Oven not heating	No gas supply; Power outage; Control knob not set correctly.	Check gas valve; Verify power supply; Ensure control knob is set to a cooking function and temperature.
Uneven cooking	Improper rack position; Overcrowding the oven; Door not fully closed.	Use recommended rack positions; Avoid overcrowding; Ensure oven door is securely closed.
Timer not working	Timer not set correctly; Mechanical issue.	Refer to "Using the Timer" section; If issue persists, contact service.
Gas odor	Gas leak; Unlit burner.	Immediately turn off gas supply, open windows, and contact a qualified technician. Do not operate electrical switches.

If the problem persists after attempting these solutions, contact Franke customer support or a qualified service technician.
