Slevoo SL-PET22

Slevoo SL-PET22 Pet Grooming Kit User Manual

Model: SL-PET22

Introduction

Thank you for choosing the Slevoo SL-PET22 Pet Grooming Kit. This comprehensive system is designed to provide a convenient and mess-free grooming experience for your pets at home. Featuring a powerful vacuum with a HEPA filter, it effectively collects pet hair and dander during grooming, ensuring a cleaner environment. Please read this manual thoroughly before use to ensure proper operation, maintenance, and safety.

Safety Instructions

- Always ensure the device is unplugged before cleaning or performing any maintenance.
- Do not immerse the main vacuum unit in water or other liquids.
- Keep the device out of reach of children and pets when not in use.
- Use only the attachments provided by Slevoo.
- Do not operate the device if the power cord or plug is damaged.
- Avoid using the device on wet pets or in wet environments.
- Monitor your pet during grooming to ensure their comfort and safety.
- If your pet shows signs of distress, stop grooming immediately.

Package Contents

Verify that all items are present in your package:

- Slevoo Vacuum Unit with 1.5L Dust Cup
- Flexible Hose
- Power Cord
- Grooming Brush
- Electric Clippers (cordless and rechargeable)
- De-shedding Tool
- Massage Brush
- Two Cleaning Tools (e.g., crevice tool, cleaning brush)

- Six Guide Combs for Clippers (1/8", 1/4", 3/8", 1/2", 3/4", 1")

Product Overview

The Slevoo SL-PET22 integrates a powerful vacuum system with multiple grooming tools to manage pet hair effectively. The main unit features a strong 11000Pa suction and a 1.5L dust cup, coupled with an H13 true HEPA filter to capture hair, dander, and odors. The system operates at a low noise level (57-65dB) with two adjustable suction levels to ensure your pet's comfort.

Setup

1. **Unpack:** Carefully remove all components from the packaging.
2. **Connect Hose:** Insert one end of the flexible hose into the suction port on the main vacuum unit until it clicks securely into place.
3. **Attach Tool:** Select the desired grooming tool and attach it to the other end of the flexible hose. Ensure it is firmly connected.
4. **Power Connection:** Plug the power cord into a suitable electrical outlet. The power cord is 12.6FT long, and the hose is 5FT long, providing ample reach.
5. **Clipper Charging:** If using the electric clippers, ensure they are charged. The clippers are cordless and rechargeable.

Operating Instructions

General Operation

1. **Power On:** Press the power button on the main vacuum unit to turn it on.
2. **Adjust Suction:** The unit has 2 adjustable suction levels. Press the suction adjustment button to cycle between the low and high settings. Start with the lower setting to allow your pet to adapt to the sound and sensation. The noise level ranges from 57-65dB.
3. **Grooming:** Gently move the attached grooming tool over your pet's coat. The vacuum will collect loose hair directly into the dust cup.
4. **Power Off:** After grooming, press the power button to turn off the unit and unplug it from the outlet.

Using Specific Tools

- **Grooming Brush:** Ideal for daily brushing to remove loose hair and dander. The vacuum suction pulls the hair directly from the brush, preventing mess.
- **Electric Clippers:** Use for trimming your pet's coat. Select one of the six guide combs (1/8" to 1") to achieve the desired hair length. The clippers are cordless for flexible use. Ensure the clipper is charged before use.

Image: Electric clippers with six guide comb sizes for various trimming lengths.

- **De-shedding Tool:** Designed to effectively remove loose undercoat hair, reducing shedding around your home. Use with gentle strokes.
- **Massage Brush:** Provides a relaxing massage for your pet while stimulating blood circulation. Can also help loosen dirt and dead skin.
- **Cleaning Tools:** Use the provided cleaning tools to clean the vacuum unit, hose, and other attachments as needed.

Maintenance

Emptying the Dust Cup

The 1.5L dust cup should be emptied regularly to maintain optimal suction performance.

1. Ensure the vacuum unit is turned off and unplugged.
2. Press the release button on the dust cup and lift it from the main machine.
3. Open the dust cup cover and dispose of the collected pet hair and debris into a waste bin.

4. Close the dust cup cover and reattach the dust cup to the main unit, ensuring it clicks into place.

Image: Instructions for removing and emptying the 1.5L dust cup.

HEPA Filter Maintenance

The H13 true HEPA filter helps trap fine particles and odors. It should be cleaned periodically to maintain air quality and suction efficiency.

- Remove the dust cup as described above.
- Locate and carefully remove the HEPA filter from the dust cup assembly.
- Tap the filter gently over a waste bin to dislodge dust and debris. For a more thorough clean, you may rinse it under cool running water. Ensure the filter is completely dry before reinserting it.
- Reassemble the filter and dust cup, then attach to the main unit.

Tool Cleaning

- After each use, detach the grooming tool from the hose.

- Use the provided cleaning tools or a soft brush to remove any remaining hair or debris from the grooming attachments.
- For the electric clippers, regularly oil the blades to ensure smooth operation and longevity.

Troubleshooting

Problem	Possible Cause	Solution
No power	Not plugged in; power outlet fault	Ensure power cord is securely plugged into a working outlet.
Low suction power	Dust cup full; filter clogged; hose/tool blockage	Empty dust cup. Clean HEPA filter. Check hose and grooming tools for blockages.
Clipper not working	Battery low; blades clogged	Recharge the clipper battery. Clean hair from blades and oil them.
Excessive noise	Blockage in fan or motor area	Turn off and unplug. Inspect for any foreign objects in the vacuum unit or hose.

Specifications
