- **Sink Basin:** Clean the resin basin with a soft cloth and a mild, non-abrasive bathroom cleaner. Rinse thoroughly with water after cleaning.
- **Hardware:** Wipe metal knobs with a soft, dry cloth. Avoid using chemical cleaners on hardware as they may tarnish the finish.

- Avoid prolonged exposure to excessive moisture. Wipe up spills immediately.
- Do not place extremely hot items directly on the vanity top without protection.
- Periodically check all screws and fasteners to ensure they remain tight. Tighten if necessary.

**7. TROUBLESHOOTING**

This section addresses common issues you might encounter.

- **Drawers not closing smoothly:** Check if the drawer slides are clean and free of debris. Ensure the drawer is properly aligned on the slides.
- **Cabinet doors misaligned:** Adjust the hinges using a screwdriver. Most hinges allow for minor adjustments in multiple directions.
- **Water leaks around the sink:** Verify that the faucet and drain connections are properly tightened. Check the silicone sealant around the sink basin for any gaps or deterioration and reapply if necessary.
