OLEVS SCX-S-G2871

OLEVS Men's Leather Analog Quartz Watch SCX-S-G2871 Instruction Manual

Model: SCX-S-G2871

INTRODUCTION

This manual provides detailed instructions for the OLEVS Men's Leather Analog Quartz Watch, Model SCX-S-G2871. Please read this manual thoroughly to ensure proper use, maintenance, and to understand all features of your new timepiece.

Image: Front view of the OLEVS Men's Leather Analog Quartz Watch, Model SCX-S-G2871, featuring a black dial with Roman numerals and three sub-dials, encased in a rose gold-tone case with a brown leather strap.

PRODUCT FEATURES

The OLEVS SCX-S-G2871 watch is designed with several functional and aesthetic features:

- **Multifunction Design:** Features three sub-dials supporting stopwatch functions (60-minute counter, 60-second counter), a moon phase display, and a calendar display.
- **Luminous Display:** Hands and markers are coated with luminous material for visibility in low-light conditions.
- **Water Resistance:** Rated for 3ATM daily waterproofing, suitable for daily sweating, hand washing, and light rain. Not suitable for bathing, swimming, or diving.
- **Durable Construction:** Equipped with a high hardness coated mirror for scratch resistance and a breathable leather strap.
- **Versatile Style:** Designed to complement various occasions, from formal to casual.

WATCH COMPONENTS

Familiarize yourself with the main components of your OLEVS watch:

OLEVS WATCHES FOR MEN

Fashion Wrist Watches

Image: Diagram illustrating the watch's functional components, including the crown for time and date adjustment, and the two pushers for chronograph control.

1. **Crown (Middle Knob):** Used for setting the time and date.
2. **Upper Pusher:** Activates and pauses the chronograph (stopwatch) function.
3. **Lower Pusher:** Resets the chronograph to zero.
4. **Sub-dials:**
 - 60-minute chronograph sub-dial
 - 60-second chronograph sub-dial
 - Moon phase / 24-hour indicator
5. **Date Window:** Displays the current date.

SETUP INSTRUCTIONS

Setting the Time:

1. Pull the crown out to the second position (farthest out).
2. Turn the crown to adjust the hour and minute hands to the correct time. Ensure the 24-hour indicator (part of the moon phase sub-dial) is correctly set for AM/PM if applicable.
3. Push the crown back to the normal position to start the watch.

Setting the Date:

1. Pull the crown out to the first position (halfway out).
2. Turn the crown to adjust the date in the date window.
3. Once the correct date is set, push the crown back to the normal position.

Note: Avoid setting the date between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism.

OPERATING THE CHRONOGRAPH (STOPWATCH)

The chronograph function allows for precise timing of events:

1. **Start:** Press the upper pusher to start the chronograph. The 60-second sub-dial will begin to move.

2. **Pause:** Press the upper pusher again to pause the chronograph. The elapsed time will be displayed on the sub-dials.
3. **Resume:** Press the upper pusher again to resume timing from where it was paused.
4. **Reset:** After pausing, press the lower pusher to reset all chronograph hands to their zero positions.

CARE AND MAINTENANCE

Water Resistance:

30m waterproof

Precision waterproof performance, innovation and enhancement of anti-fog, strong pressure waterproof

Image: The OLEVS watch being splashed with water, demonstrating its 3ATM water resistance for daily use.

Your OLEVS watch is 3ATM water-resistant. This means it can withstand:

- Daily sweating
- Washing hands
- Light rain

Important: Do not wear the watch for bathing, swimming, diving, or any activities involving prolonged water immersion or high-pressure water exposure.

Cleaning:

Wipe the watch case and strap regularly with a soft, dry cloth to remove dirt and moisture. For the leather strap, avoid excessive moisture and harsh chemicals to preserve its quality.

Strap Replacement:

The leather strap can be replaced if desired. Ensure any replacement strap is of the correct width (20mm) and compatible with the watch's spring bar mechanism.

TROUBLESHOOTING

- **Watch not running:** Check if the crown is fully pushed in. If the watch is new, it may need to be wound or the battery may need activation.
- **Date not changing:** Ensure the time is set correctly, especially the AM/PM cycle. Avoid setting the date between 9 PM and 3 AM.
- **Chronograph not resetting to zero:** This may indicate a need for calibration or service.
- **Water damage:** If water enters the watch, immediately take it to a professional watch repair service.

For any persistent issues or problems not covered here, please contact the seller directly for assistance.
