CARE & MAINTENANCE

To ensure the longevity and appearance of your GloTika storage shelf, follow these simple care instructions:

- **Cleaning:** Wipe the surface with a dry, soft cloth. For tougher spots, a slightly damp cloth can be used, followed immediately by a dry cloth to prevent water spots or rust.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong detergents, or chemical solvents, as these can damage the finish.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.
- **Weight Distribution:** Always distribute items evenly across the shelves to prevent strain on the frame.

TROUBLESHOOTING

If you encounter any issues with your storage shelf, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Shelf feels wobbly or unstable.	Anti-tilt kits not installed or loose; uneven floor; loose connections.	Ensure anti-tilt kits are properly installed and secured to the wall. Check and tighten all screws. Adjust leveling feet if applicable.
Items fall off the top shelf easily.	Shelf is not level; excessive weight; unstable items.	Verify the shelf is level. Reduce weight on the top shelf. Place heavier items on lower shelves. Use baskets or containers for small, unstable items.
Difficulty fitting over the toilet.	Toilet dimensions exceed shelf clearance.	Measure your toilet's width and height to ensure it fits within the shelf's dimensions (26" W x 39" H clearance from floor to bottom shelf).
