### Pre-Installation Checklist:

- Ensure power is disconnected at the main circuit breaker.
- Confirm you have all necessary tools (screwdriver, wire strippers, ladder, etc.).
- Verify the electrical box is securely mounted and rated for ceiling fan support.

### Installation Steps:

1. **Mounting Bracket Installation:** Secure the mounting bracket to the ceiling electrical box using the provided screws and washers. Ensure it is firmly attached.

3. **Hanging the Fan:** Carefully lift the fan assembly and hang it from the mounting bracket.
4. **Wiring Connections:** Connect the fan's electrical wires to the household wiring according to the wiring diagram in the detailed manual. Use the provided wire nuts and ensure all connections are secure.
5. **Canopy Installation:** Slide the canopy up to the ceiling and secure it to the mounting bracket, covering the wiring connections.
6. **Blade Attachment:** Attach each fan blade to the motor housing using the provided screws. Ensure all blades are securely fastened.
7. **Light Kit Installation:** Connect the light kit wires to the fan motor assembly wires. Secure the light kit to the bottom of the fan.

## Maintenance

Regular maintenance ensures optimal performance and longevity of your ceiling fan.

- **Cleaning:** Periodically clean the fan blades and motor housing with a soft, damp cloth. Do not use abrasive cleaners or solvents that could damage the finish.
- **Tighten Fasteners:** Annually, check all screws and fasteners on the fan and mounting hardware to ensure they are secure. Loose connections can cause wobbling or noise.
- **Light Source:** The integrated LED light source is designed for long life and is not user-replaceable. If the light fails, contact customer support.

## Troubleshooting

If you experience issues with your fan, refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|---|---|---|
| Fan does not start | No power to the fan; loose wire connections; remote control battery low or not paired. | Check circuit breaker. Ensure all wiring connections are secure. Replace remote batteries or re-pair the remote according to the full manual. |
| Light does not work | Loose wire connection to the light kit; light kit failure. | Check light kit wiring connections. If light still fails, contact customer support. |
| Fan wobbles | Loose blade screws; unbalanced blades; loose mounting bracket. | Ensure all blade screws are tight. Check for any bent blades. Verify the mounting bracket is securely fastened to the ceiling. |
| Noisy operation | Loose screws; fan not properly balanced; internal motor issue. | Check all screws for tightness. Ensure blades are clean and free of obstructions. If noise persists, contact customer support. |
