UGREEN 45355

UGREEN Magnetic Phone Desk Mount for Bed (Model 45355)

Instruction Manual

Introduction

This manual provides detailed instructions for the safe and effective use of your UGREEN Magnetic Phone Desk Mount for Bed, Model 45355. Please read this manual thoroughly before installation and operation to ensure optimal performance and longevity of the product. Keep this manual for future reference.

Safety Information

- Ensure the clamp is securely fastened to a stable surface before attaching your device.
- Do not overload the mount beyond its maximum weight capacity of 4.85 lbs (2.2 kg).
- Avoid placing the mount in locations where it could obstruct pathways or create a tripping hazard.
- Keep the magnetic head away from sensitive electronic devices that may be affected by magnetic fields.
- Do not attempt to disassemble or modify the product, as this may void the warranty and pose a safety risk.
- Keep out of reach of children.

Package Contents

Verify that all items are present in the package:

- UGREEN Magnetic Phone Desk Mount (Main Arm Assembly)
- Desk Clamp
- Magnetic Phone Holder Head
- Metal Ring (for non-MagSafe devices)
- Instruction Manual (this document)

Setup Instructions

Follow these steps to assemble and install your UGREEN Magnetic Phone Desk Mount:

1. Attach the Desk Clamp

1. Choose a stable surface such as a desk, headboard, or table edge. The clamp can accommodate surfaces up to 2.83 inches (7.2 cm) thick.
2. Unscrew the clamp knob until the opening is wide enough to fit over your chosen surface.
3. Position the clamp and tighten the knob firmly until it is secure. Ensure the clamp is stable and does not wobble. The protective silicone pads on the clamp prevent damage to your furniture.

Image: Visual guide demonstrating how to attach the clamp to a surface, highlighting the maximum compatible thickness of 2.83 inches.

2. Insert the Main Arm Assembly

4. Insert the base of the main arm assembly into the opening on the top of the tightened desk clamp.
5. Tighten the screw on the side of the clamp to secure the arm in place. The arm should be able to rotate 360 degrees at the base.

3. Attach the Magnetic Phone Holder Head

6. Locate the magnetic phone holder head. It features a ball joint for flexible positioning.
7. Attach the magnetic phone holder head to the end of the main arm assembly. Ensure it is firmly screwed or clicked into place, depending on the design.

4. Prepare Your Device (for non-MagSafe phones)

If your phone is an iPhone 12 series or newer, or uses a MagSafe-compatible case, you can directly attach it to the magnetic holder. For older iPhone models (e.g., iPhone 11 and earlier) or Android phones, use the included metal ring:

8. Clean the back surface of your phone or phone case thoroughly.
9. Peel off the adhesive backing from the metal ring.
10. Carefully center and press the metal ring onto the back of your phone or case. Apply firm pressure for a few seconds to ensure strong adhesion.

Image: Illustration of how MagSafe-compatible iPhones attach directly, and how to use the adhesive metal ring for other smartphone models.

Operating Instructions

1. Attaching Your Phone

- Align the back of your MagSafe-compatible phone (or phone with the attached metal ring) with the magnetic phone holder head.
- The strong N52 magnets will securely hold your device in place.

Image: A smartphone being attached to the magnetic holder, demonstrating the strong 25N magnetic connection.

Image: Visual representation of the secure magnetic attachment, emphasizing that the phone will "Never Fall Off" due to strong magnetic

force.

2. Adjusting the Arm and Viewing Angle

- The mount features two adjustable arms that can rotate 180 degrees at their joints.
- The magnetic holder head can rotate 360 degrees and tilt to achieve the desired viewing angle.
- Carefully position the arms and head to achieve your preferred height and angle for hands-free viewing.

Maintenance

- **Cleaning:** Wipe the mount with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid abrasive cleaners or solvents.
- **Inspection:** Periodically check all screws and joints to ensure they remain tight. Re-tighten if necessary.
- **Storage:** When not in use for extended periods, store the mount in a clean, dry place away from direct sunlight and extreme temperatures.

Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Phone does not attach securely to the magnetic holder.	Phone is not MagSafe compatible. Metal ring is not properly attached or is missing. Thick phone case interfering with magnetic connection.	Ensure your phone is MagSafe compatible or has the metal ring correctly installed. Re-attach the metal ring, ensuring it is centered and firmly pressed. Try removing the phone case or using a MagSafe-compatible case.
Mount wobbles or feels unstable.	Clamp is not tightened sufficiently. Arm assembly is not secured in the clamp. Surface is too thin or unstable.	Re-tighten the desk clamp firmly. Ensure the arm's base is fully inserted and secured by the clamp's side screw. Move the mount to a thicker, more stable surface.
Arm joints are loose and do not hold position.	Normal wear or adjustment needed.	Tighten the screws at the arm joints if they become loose over time.
