REIBII 5 Tier-14"D x 29"W x 63"H

REIBII 5-Tier Heavy Duty Storage Shelves

Model: 5 Tier-14"D x 29"W x 63"H

Brand: REIBII

Introduction

This manual provides detailed instructions for the assembly, operation, and maintenance of your REIBII 5-Tier Heavy Duty Storage Shelves. Designed for versatility and durability, this shelving unit offers significant storage capacity for various environments such as garages, kitchens, laundry rooms, and pantries. Please read these instructions carefully before assembly and use to ensure safe and efficient operation.

Safety Information

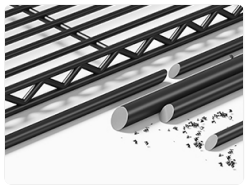

Warning: To prevent injury or damage, adhere to the following safety guidelines:

- This product has a maximum weight capacity of 1020 lbs (204 lbs per shelf). Do not overload the shelves.
- Ensure the shelving unit is assembled on a flat, stable surface.
- Distribute weight evenly across each shelf to maintain stability.
- Use the included anti-tipping parts to secure the unit to a wall, especially in areas prone to earthquakes or if heavy items are stored on upper shelves.
- Keep children and pets away from the unit during assembly.
- Avoid climbing or hanging on the shelving unit.

Package Contents

Verify that all components are present before beginning assembly:

- Instructions Manual
- 5 Tier Wire Shelving Units (individual shelves)
- Vertical Support Poles (multiple sections)
- Plastic Sleeve Clips
- Leveling Feet
- Anti-Dumping Parts (wall anchors)

Assembly Instructions

The REIBII 5-Tier Storage Shelves are designed for tool-free assembly, typically completed in about 15 minutes by one person. Follow these steps:

1. **Attach Leveling Feet:** Screw the leveling feet into the bottom of the four lower pole sections.
2. **Assemble Lower Poles:** Connect the upper and lower pole sections by screwing them together. Ensure they are securely tightened.
3. **Install First Shelf:** Snap two plastic sleeve clips onto each of the four poles at the desired height for the bottom shelf. Ensure the clips are at the same height on all poles. Slide the bottom wire shelf down over the poles until it rests firmly on the clips.
4. **Install Remaining Shelves:** Repeat step 3 for the remaining four shelves, adjusting the height as needed for your storage requirements. Ensure each shelf is level and securely seated on its clips.

5. **Configure 2-in-1 (Optional):** If you wish to create two separate shorter units, simply use two sets of leveling feet and divide the poles and shelves accordingly. Each unit will then function independently.
6. **Secure to Wall:** For added stability, especially with heavy loads or in active environments, use the provided anti-dumping parts to secure the top of the shelving unit to a wall.

Usage and Adjustments

Your REIBII storage shelves are designed for flexible use in various settings. Here's how to maximize its utility:

- **Adjusting Shelf Height:** The shelves can be adjusted in 1-inch increments. To adjust, remove items from the shelf, lift the shelf, reposition the plastic sleeve clips on the poles to the desired height, and then lower the shelf back onto the clips. Ensure all clips are at the same level for stability.
- **2-in-1 Configuration:** The unit can be split into two separate, shorter shelving units. This is ideal for areas with lower ceilings or for creating multiple storage zones. To do this, ensure you have two sets of leveling feet and follow the assembly instructions to build two independent units.
- **Weight Distribution:** Always distribute items evenly across the shelves. Avoid placing all heavy items on one side or concentrating weight in the center of a single shelf.

Care and Maintenance

To ensure the longevity and appearance of your REIBII storage shelves, follow these simple care instructions:

- **Cleaning:** Wipe the shelves and poles with a dry cloth to remove dust and debris. For stubborn marks, use a slightly damp cloth with mild soap, then dry immediately. Avoid abrasive cleaners or harsh chemicals.
- **Inspection:** Periodically check all connections and ensure shelves are securely seated on their clips. Tighten any loose pole sections.
- **Rust Prevention:** The unit features a rustproof finish. However, prolonged exposure to excessive moisture should be avoided to maintain its condition.

Troubleshooting

If you encounter any issues with your shelving unit, consider the following common solutions:

- **Wobbling Unit:** Ensure the unit is on a level surface. Adjust the leveling feet at the bottom of each pole to compensate for uneven floors. Verify all pole sections are tightly screwed together and shelves are firmly seated on their clips.
- **Shelf Not Level:** Check that the plastic sleeve clips for each shelf are positioned at the exact same height on all four poles.
- **Difficulty Assembling:** Refer to the assembly instructions and video. Ensure plastic clips are oriented correctly and poles are fully inserted into the shelves. Sometimes a rubber mallet can help gently tap shelves into place, but avoid excessive force.
- **Overloading:** If shelves appear to sag or deform, reduce the weight on them. Ensure no single shelf exceeds 204 lbs and the total unit does not exceed 1020 lbs.

Warranty and Support

For specific warranty details or if you require further assistance, please contact REIBII customer support. Keep your purchase receipt and model information handy when contacting support.
