OPERATING INSTRUCTIONS

Height Adjustment

The desk features a triple electric motor lifting system for smooth and quiet height adjustments. The height range is from 23.6 inches (seated position) to 49.2 inches (standing position), accommodating a wide range of user heights. The travel speed is approximately 1.4 inches per second.

Control Panel

The digital keypad allows for precise control and includes the following features:

- **4 Memory Presets:** Program and save your preferred sitting and standing heights for quick transitions.
- **Anti-Collision System:** Detects obstacles during movement and stops to prevent damage.
- **Child Lock:** Engages to prevent accidental height adjustments.

- **Upper & Lower Limits:** User-programmable limits for height range customization.

MAINTENANCE

To ensure the longevity and optimal performance of your Desky L-Shaped Electric Standing Desk, follow these maintenance guidelines:

- **Cleaning:** Wipe the hardwood desktop with a soft, damp cloth. For the metal frame, use a mild cleaner if necessary. Avoid abrasive cleaners or solvents.
- **Inspections:** Periodically check all screws and connections to ensure they are tight.
- **Cable Management:** Ensure cables are neatly organized and not pinched or strained.
- **Weight Distribution:** Distribute weight evenly across the desktop to prevent undue stress on the lifting mechanism.

TROUBLESHOOTING

If you encounter issues with your desk, consider the following common solutions:

- **Desk Not Moving:** Check if the power cord is securely plugged into both the desk and the wall outlet. Ensure the child lock is not activated.
- **Uneven Movement:** Verify that the desk is not overloaded beyond its weight capacity. Ensure all frame components are correctly assembled and tightened.
- **Error Codes:** Refer to the specific error code displayed on the hand controller and consult the detailed troubleshooting section in the full product manual (if provided separately) or contact customer support.
- **Noise During Operation:** A low noise level (40 dB) is normal. If unusual or excessive noise occurs, ensure no objects are obstructing the lifting columns.
