

FGIEU CT-1250

FGIEU 5V Charger for Remington Shavers and Trimmers (Model CT-1250) - User Manual

Model: CT-1250 | Brand: FGIEU

INTRODUCTION

This manual provides essential instructions for the safe and effective use of your FGIEU 5V replacement charger, Model CT-1250. This charger is designed to power and charge various Remington shaver and trimmer models. Please read this manual thoroughly before use and retain it for future reference.

SAFETY INFORMATION

Your FGIEU charger is equipped with multiple safety features to protect both the device and the user. Adhere to the following guidelines:

- **Over-Voltage Protection:** Prevents damage from excessive voltage input.
- **Over-Load Protection:** Safeguards against drawing too much current.
- **Over-Current Protection:** Protects against current surges.
- **Short Circuit Protection:** Automatically shuts off in case of a short circuit.
- **Over-Temperature Protection:** Prevents overheating during operation.
- **Over-Charge Protection:** Protects connected devices from being overcharged.
- Ensure the charger is used in a dry environment. Avoid exposure to water or high humidity.
- Do not attempt to disassemble or modify the charger.
- Keep out of reach of children.

PACKAGE CONTENTS

Verify that all items are present in your package:

- 1 x FGIEU 5V Charger (Model CT-1250)
- 1 x User Manual (this document)

COMPATIBILITY

This charger is specifically designed for various Remington shaver and trimmer models. Please ensure your device is listed below or matches the charger's specifications (5V output, PA-0510N / PA-0505N part

number, special plug type).

Compatible Remington Models:

- PF7500, PF7600
- PG6137, PG6170, PG6171, PG6250, PG6255
- PR1240, PR1250, PR1260, PR1270, PR1285, PR1340, PR1342, PR1360, PR1362, PR1385, PR1387
- WR5100
- XF85R1, X14R340, X14R470, XF8550, XF8700, XF8705
- HC4250, HC5870, HC5950
- MB4900 Electric Razor

Please Note: This charger is NOT compatible with 12V versions, such as P/N: PA-1204 (e.g., Shaver Model HC6550).

Remington Shaver Charger

SETUP INSTRUCTIONS

Follow these steps to correctly connect your charger:

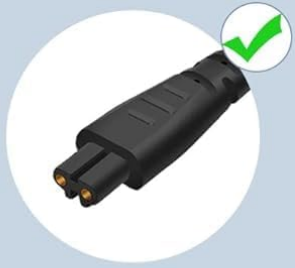

1. **Verify Charger Tip:** Before connecting, carefully examine the charger tip and the charging port of your Remington device. Ensure they match the specific two-pin design of this charger (PA-0510N / PA-0505N). Incorrect charger tips (e.g., round barrel or different pin configurations) will not fit or may damage your device.
2. **Connect to Device:** Insert the charger's two-pin connector firmly into the charging port of your Remington shaver or trimmer.
3. **Connect to Power Outlet:** Plug the charger's wall adapter into a standard 110-240V AC power

outlet.

4. **Confirm Connection:** Ensure both connections are secure. Your device should indicate that it is charging (e.g., an indicator light).

Video 1: This video provides a brief overview of the FGIEU 5V charger for Remington shavers, demonstrating its connection and compact design.

OPERATING INSTRUCTIONS

Once connected as described in the Setup section, the charger will automatically begin charging your Remington device. The charging process is indicated by your device's built-in charging light or display.

- Allow sufficient time for your device to fully charge. Refer to your Remington device's original manual for specific charging times.
- The charger features a 5.9-foot (1.8m) cord for convenient placement.

Figure 5: The charger features an extra-long, durable power cord.

CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your charger:

- Keep the charger clean and dry. Wipe with a soft, dry cloth if necessary.
- Avoid bending or twisting the power cord excessively.
- Store the charger in a cool, dry place when not in use.

- Do not expose to extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Charger does not fit into the device.	Incorrect charger tip type or incompatible device model.	Verify your Remington device model against the compatibility list. Ensure the charger tip matches the device's charging port exactly (two-pin design, not a round barrel). Refer to Figure 4.
Device is not charging.	Loose connection, faulty power outlet, or incompatible device.	Check that the charger is securely plugged into both the device and the wall outlet. Test the outlet with another device. Confirm device compatibility.
Charger feels warm during use.	Normal operation, or potential overload.	A slight warmth is normal. If the charger becomes excessively hot, unplug it immediately and contact support. Ensure the device is compatible and not drawing excessive power.

SPECIFICATIONS

Model Number	CT-1250
Input Voltage	110-240V AC
Frequency Range	50/60 Hz
