- **Insufficient Cooling/Heating:** Verify that the exhaust hose is properly installed and sealed in the window kit. Ensure the air filter is clean and not obstructed. Check that the room size is within the unit's specified capacity.
- **Water Full Indicator:** If the unit stops operating and displays a water full indicator, drain the water from the unit using the drainage hose.
- **Unusual Odor:** A slight odor may be present during the first few uses; this is normal and will dissipate. Ensure proper ventilation.
