3. SETUP

3.1 Unpacking and Assembly

1. Carefully remove all components from the packaging.
2. Attach the quick-disconnect zinc alloy bracket to the guitar body. Ensure it clicks securely into place.
3. Familiarize yourself with the included accessories: portable gig bag, headphones, USB-C charging cable, 1/8" cable, strap, and truss rod wrench.

3.2 Charging the Battery

The HUSH I PRO features a built-in Lithium Polymer battery. Before first use, fully charge the guitar.

- Connect the provided USB-C charging cable to the DATA/CHARGING PORT on the guitar's control panel.
- Plug the other end into a compatible USB power adapter (not included) or a computer USB port.
- The charging indicator light will show the charging status. Charge promptly when the low battery indicator appears to ensure normal use.

3.3 Initial Tuning

The HUSH I PRO has a headless design with tuners located at the body. A truss rod wrench is included for adjustments.

- Locate the built-in tuner on the control panel (refer to Section 4.1).
- Pluck each string individually and adjust the corresponding tuning peg until the tuner indicates the correct pitch.
- For initial setup or significant changes, the tuning allen key hidden in the guitar body may be necessary to

adjust the bottom strings.

4. OPERATING THE HUSH I PRO

4.1 H1 Multi-Effects Preamp System

The H1 preamp system is the core of the HUSH I PRO's sound capabilities. It features a display and various controls for effects, tone, and volume.

5. MAINTENANCE

5.1 General Care

- Keep the guitar clean by wiping it with a soft, dry cloth after each use.
- Avoid exposing the guitar to extreme temperatures or humidity.
- Store the guitar in its gig bag when not in use, especially during travel.

5.2 Battery Care

To prolong battery life, ensure you charge the guitar promptly when the low battery indicator appears. Avoid completely draining the battery frequently.

5.3 String Replacement

The HUSH I PRO uses alloy steel strings. Replacing strings is straightforward due to the headless design.

- Loosen the tuning pegs at the body end.
- Remove the old strings.
- Insert new strings through the bridge and secure them at the tuning pegs.
- Tune the guitar using the built-in tuner.

5.4 Neck and Fretboard

The guitar features a Mahogany/Maple neck and Laurel fretboard.

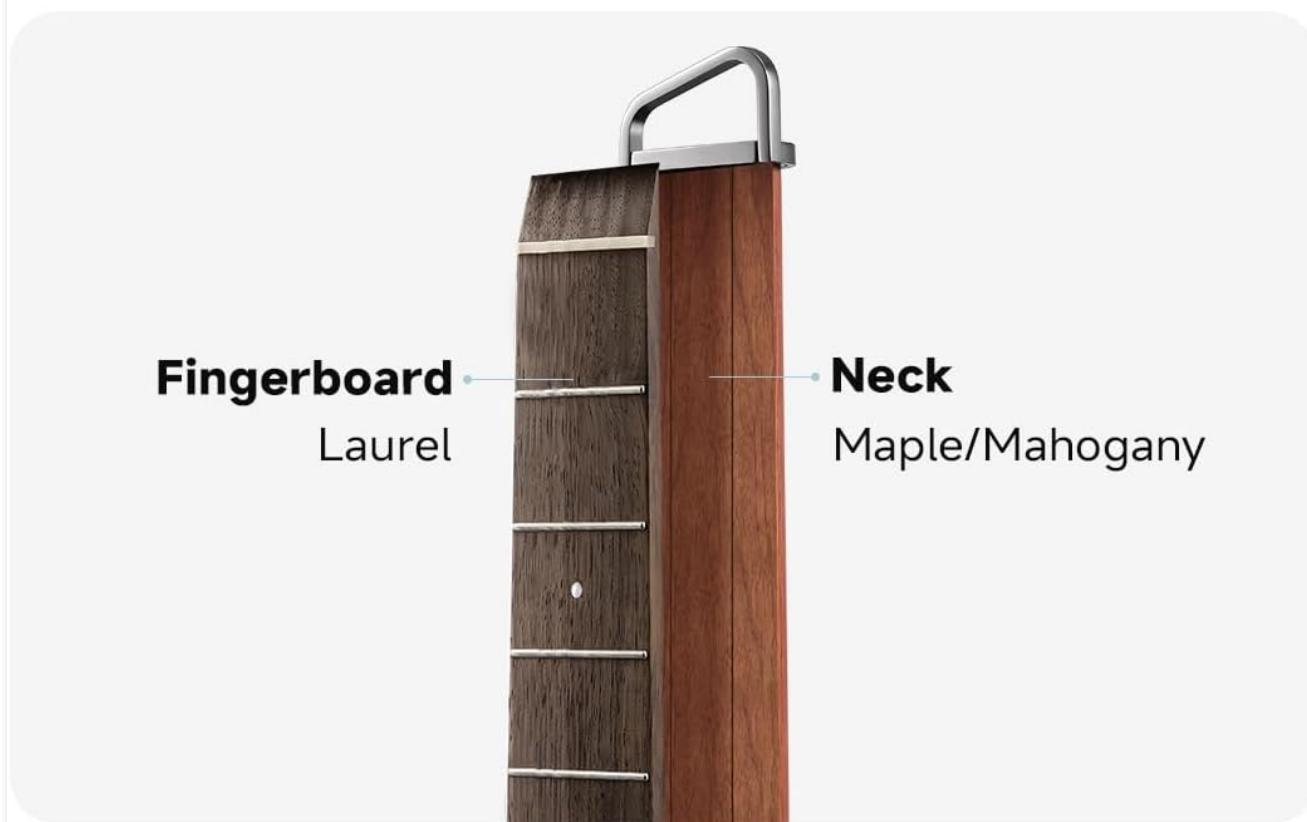

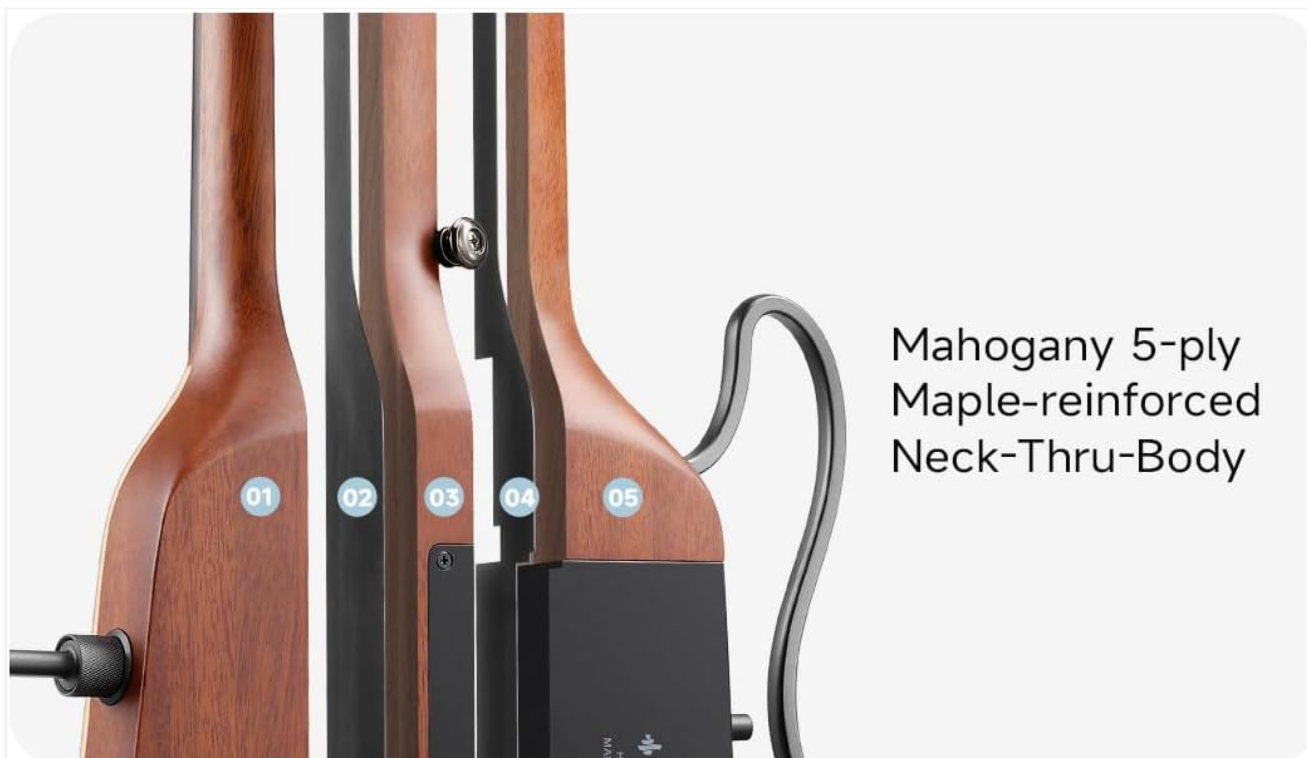

Figure 9: Neck and Fretboard Construction

If you experience string buzz or high action, use the provided truss rod wrench to make minor adjustments to the neck relief. It is recommended to consult a professional luthier for significant adjustments or if you are unsure.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No sound or low volume	Low battery; Volume knob too low; Cable issue; Incorrect output device connection.	Charge the guitar; Increase Master Volume; Check cable connections; Ensure output device (headphones/amp) is properly connected and powered.
Distortion or noise through headphones/output	Impedance mismatch with output device/earphones; High input gain.	Try replacing with compatible equipment (headphones/cables); Adjust input gain settings if available on connected device.
Bluetooth static/noise	Interference; Device compatibility.	Ensure no other devices are causing interference; Try different headphones or streaming devices.
String buzz or high action	Neck relief; Saddle/nut height.	Use the provided truss rod wrench for minor neck adjustments. For persistent issues, consult a professional luthier.
