Zupapa 8FT Climbing Dome with Slide

Zupapa 8FT Climbing Dome with Slide User Manual

Model: 8FT Geometric Dome Climber with Slide

Brand: Zupapa

SAFETY INFORMATION

Please read and understand all safety information before assembly and use of the Zupapa Climbing Dome with Slide. Failure to follow these instructions may result in serious injury.

- The maximum fall height of an 8ft dome climber is 3ft. Ensure adequate safety surfacing is installed around the play area.
- The maximum weight capacity for this climbing dome is 440 lbs. Do not exceed this limit.
- This 8ft dome climber is suitable for 1-6 players at a time. Overcrowding can lead to accidents.
- Adult supervision is required at all times when children are using the climbing dome.
- Regularly inspect the product for any loose parts, damage, or wear and tear. Tighten all bolts and replace any damaged components immediately.
- Clear the play area of any obstacles or hazards before use.
- Do not allow children to wear loose clothing, scarves, or anything that could get caught on the structure.

PRODUCT OVERVIEW

The Zupapa Climbing Dome with Slide is a versatile outdoor play structure designed for children aged 3-8 years. It combines a geometric dome climber with a smooth slide, offering opportunities for climbing, crawling, and sliding activities. Its robust construction ensures durability and safety for active play.

Image: The Zupapa 8FT Climbing Dome with Slide, featuring blue and green metal bars, red connectors, a yellow platform, and a green slide. Three children are shown interacting with the structure in a grassy backyard.

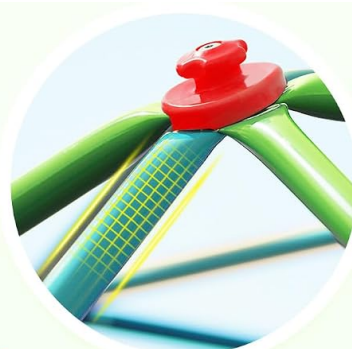

Key features include:

- **Rust Protection:** Constructed from rustproof metal tubes using hot galvanization and spray coating processes, making it weather-resistant for both indoor and outdoor use.
- **Sturdy Grip:** Features high-density polyethylene (HDPE) climbing grips, designed to be small and easy for children to grasp securely.
- **Developmental Benefits:** Encourages gross motor skill development, independence, and autonomous exploration through climbing and sliding.

Climbing Frame

Maximum Load Capacity : 440LBS

Suitable for Kids 3-8 to Climb and Slide

COMPONENTS

The Zupapa Climbing Dome with Slide consists of the following main components:

- Metal Tubes (various lengths and colors for the dome structure)
- Connectors (red, for joining tubes)
- Climbing Grips (HDPE, for hand and foot placement)
- Slide (green, smooth surface)
- Fabric Platform (yellow, for resting area)
- Hardware (screws, nuts, washers, tools for assembly)

For a detailed list of all parts and quantities, please refer to the official [Installation Manual \(PDF\)](#).

SETUP AND ASSEMBLY

Assembly of the Zupapa Climbing Dome with Slide requires careful attention to detail. It is recommended to have at least two adults for efficient and safe assembly.

1. Unpack all components and verify against the parts list in the Installation Manual.
2. Lay out all tubes and connectors in an organized manner.
3. Begin assembling the dome structure according to the step-by-step instructions provided in the manual.
4. **Important Hint:** Do not tighten all the bolts completely during the initial assembly phases. Leave them loose enough so you can move the bars around and align them properly. This flexibility is crucial for fitting all pieces together.
5. Once all components are in place and the structure is fully assembled, go back and securely tighten all bolts and nuts. The updated design features lengthened screws and added nuts for improved stability and easier assembly.
6. Attach the slide and fabric platform as per the manual's instructions.
7. Perform a final inspection to ensure all connections are secure and there are no loose parts.

For detailed visual instructions, please refer to the official [Installation Manual \(PDF\)](#).

OPERATION AND USAGE

The Zupapa Climbing Dome with Slide provides a dynamic play environment for children. Ensure proper usage to maximize enjoyment and safety.

- Children can climb on the geometric dome structure, utilizing the sturdy grips for support.
- The slide offers a fun descent from the platform. Ensure children slide feet first and one at a time.
- The yellow fabric platform provides a small resting area within the dome.
- Always ensure children are within the recommended age range of 3-8 years and adhere to the maximum weight capacity of 440 lbs.
- Constant adult supervision is mandatory during play.

MAINTENANCE

Regular maintenance will extend the lifespan of your Zupapa Climbing Dome with Slide and ensure continued safety.

- **Routine Inspection:** Periodically check all bolts, nuts, and connections to ensure they are tight. Re-tighten as necessary.
- **Component Check:** Inspect metal tubes, slide, and climbing grips for any signs of damage, cracks, rust, or excessive wear. Replace any damaged parts immediately.
- **Cleaning:** Clean the structure regularly with mild soap and water. Rinse thoroughly and dry to prevent water spots or residue buildup. Avoid abrasive cleaners.
- **Weather Protection:** Although designed to be weather-resistant with hot galvanization and spray coating, consider covering the play set during extreme weather conditions or prolonged periods of non-use to further protect it.
- **Ground Stability:** Ensure the climbing dome remains on a stable, level surface. If moved, re-check stability and connections.

Hot-dip Galvanizing Technology

Anti-rust Time is 5 Times Longer

Image: A diagram showing the five layers of the hot-dip galvanizing technology, including steel tube, iron-zinc alloy, galvanized layer, reinforcement layer, and thickened spray paint coating, which provides enhanced rust protection.

TROUBLESHOOTING

If you encounter issues with your Zupapa Climbing Dome with Slide, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Difficulty during assembly	Bolts tightened too early; misaligned holes; incorrect part orientation.	Ensure all bolts are left loose until the entire structure is assembled. Refer to the Installation Manual for correct part orientation. If holes are misaligned, contact customer support.
Structure feels wobbly or unstable	Loose bolts; uneven ground.	Re-tighten all bolts securely. Move the structure to a level surface.
Parts missing or damaged upon arrival	Shipping damage; packaging error.	Contact Zupapa customer support immediately with your purchase details and a description of the missing/damaged parts.

If the problem persists or is not listed here, please contact Zupapa customer support for further assistance.

SPECIFICATIONS

- **Product Dimensions:** 97 x 72 x 36 inches (Length x Width x Height)

- **Item Weight:** 56.7 pounds
- **Manufacturer Recommended Age:** 36 months - 8 years
- **Maximum Load Capacity:** 440 lbs
- **Maximum Fall Height:** 3 ft
- **Player Capacity:** 1-6 children
- **Materials:** Rustproof metal tubes (hot galvanized, spray coated), High-Density Polyethylene (HDPE) grips, Fabric platform.
- **ASIN:** B0D2XLZ1ZL
- **Manufacturer:** YANGZHOU HAIQI SPORTS EQUIPMENT CO.,LTD
